Quarante-septième édition

Données disponibles
au 31 janvier 2003

United Nations/Nations Unies • New York, 2003

Note

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

In general, statistics contained in the present publication are those available to the United Nations Secretariat up to January 2003 and refer to 2000/2001 or earlier. They therefore reflect country nomenclature currently in use.

The term "country" as used in this publication also refers, as appropriate, to territories or areas.

The designations "developed" and "developing" are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

Symbols of United Nations documents are composed of capital letters combined with figures.

Note

Les appellations employées dans la présente publication et la présentation des données qui y figurent n'impliquent, de la part du Secrétariat de l'Organisation des Nations Unies, aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

En règle générale, les statistiques contenues dans la présente publication sont celles dont disposait le Secrétariat de l'Organisation des Nations Unies jusqu'à janvier 2003 et portent sur la période finissant en 2001. Elles reflètent donc la nomenclature des pays en vigueur à l'époque.

Le terme "pays", tel qu'il est utilisé ci-après, peut également désigner des territoires ou des zones.

Les appellations "développées" et "en développement" sont employées à des fins exclusivement statistiques et n'expriment pas nécessairement un jugement quant au niveau de développement atteint par tel pays ou telle région.

Les cotes des documents de l'Organisation des Nations Unies se composent de lettres majuscules et de chiffres.

Preface

The present United Nations *Statistical Yearbook* is the forty-seventh issue in a series initiated in 1948. It has been prepared by the Statistics Division of the Department of Economic and Social Affairs, and contains series covering, in general, 1991-2000 or 1992-2001. For the most part the statistics presented are those which were available to the Statistics Division as of 31 January 2003.

The 83 tables of the *Yearbook* are based on data compiled by the Statistics Division from over 35 international and national sources. These sources include the United Nations Statistics Division in the fields of national accounts, industry, energy, transport and international trade, the United Nations Statistics Division and Population Division in the field of demographic statistics, and over 20 offices of the United Nations system and international organizations in other specialized fields.

United Nations agencies and other international, national and specialized organizations which furnished data are listed under "Statistical sources and references" at the end of the *Yearbook*. Acknowledgement is gratefully made for their generous cooperation in continually providing data.

The Statistics Division also publishes the *Monthly Bulletin of Statistics* [26]*, which provides a valuable complement to the *Yearbook* by covering current international economic statistics for most countries and areas of the world and quarterly world and regional aggregates. Subscribers to the print version of the *Monthly Bulletin of Statistics* are provided full on-line access to the Internet version. The *MBS On-Line* allows time-sensitive statistics to reach users much faster than the traditional print publication. For further information see <<http://unstats.un.org/unsd/>>.

Recognizing the interest in obtaining statistics in machine-readable form for further study and analysis by users, the *Yearbook* has also been published on CD-ROM for IBM-compatible microcomputers, since the thirty-eighth issue. The CD-ROM contains time series data from 1980 to the most recent year available, and includes the historical data of those series not shown in the present print version due to space limitations. Ad hoc or standing orders for the *Yearbook* in print and/or on CD-ROM may be placed with United Nations Publications sales offices in New York and Geneva. A full list of machine-readable products in statistics available from the United Nations Statistics Division may be obtained, upon request, from the Statistics

* Numbers in square brackets in the text refer to numbered entries in the section "Statistical sources and references".

Préface

La présente édition de l'*Annuaire statistique* des Nations Unies est la quarante-septième d'une série instaurée en 1948. Elle a été préparée par la Division de statistique du Département des affaires économiques et sociales et contient des séries qui portent d'une manière générale sur la période 1991 à 2000 ou 1992 à 2001 et pour lesquelles ont été utilisées les informations dont disposait la Division de statistique au 31 janvier 2003.

Les 83 tableaux de l'*Annuaire* sont établis à partir des données que la Division de statistique a recueillies auprès de plus de 35 sources, internationales et nationales. Ces sources sont: la Division de statistique du Secrétariat de l'Organisation des Nations Unies pour ce qui concerne les comptabilités nationales, les industries manufacturières, l'énergie, les transports et le commerce international, la Division de statistique et la Division de la population du Secrétariat de l'Organisation des Nations Unies pour les statistiques démographiques; et plus de 20 bureaux du système des Nations Unies et d'organisations internationales pour les autres domaines spécialisés.

Les institutions spécialisées des Nations Unies et les autres organisations internationales, nationales et spécialisées qui ont fourni des données sont énumérées dans la section "Sources statistiques et références" figurant à la fin de l'ouvrage. Les auteurs de l'*Annuaire statistique* les remercient de leur généreuse coopération.

La Division de Statistique publie également le *Bulletin Mensuel de Statistiques* [26]*, qui est un complément intéressant à l'*Annuaire Statistique* qui couvre les statistiques économiques courantes sur la plupart des pays et zones du monde et des agrégats trimestriels, au niveau du monde et des grandes régions. Les abonnés à l'édition imprimée du *Bulletin Mensuel de Statistiques* ont aussi à leur disposition le *Bulletin* en ligne, accessible sur Internet. Grâce à "BMS en ligne" les utilisateurs disposent plus rapidement des données conjonctuelles que par la voie traditionnelle de la publication imprimée. Pour des informations supplémentaires, voir <<http://unstats.un.org/unsd/>>.

En raison de l'intérêt que suscite la présentation de statistiques sur des supports lisibles en machine et exploitables directement par l'utilisateur, l'*Annuaire* a été publiée sur disque compact (CD-ROM) pour micro-ordinateurs IBM et compatibles depuis la publication de la trente-huitième édition. Le CD-ROM contient des séries chronologiques allant de 1980 à la dernière année pour laquelle on dispose de statistiques, y compris les données historiques qui, faute d'espace suffisant, n'apparaissent pas dans la présente version imprimée de l'*Annuaire*. Les commandes individuelles et les

* Les chiffres entre crochets dans le texte se réfèrent aux entrées numérotées dans la section «Sources statistiques et références».

Division of the United Nations Secretariat, New York or from the Division's Internet home page <<http://unstats.un.org/unsd/>>.

The *Yearbook* is organized in four parts. The first part, World and Region Summary, presents key world and regional aggregates and totals. In the other three parts, the subject matter is generally presented by countries or areas, with world and regional aggregates shown in some cases only. Parts two, three and four cover, respectively, population and social topics, national economic activity, and international economic relations. The organization of the population and social topics generally follows the arrangement of subject matter in the United Nations *Handbook on Social Indicators* [48]; economic activity is taken up according to the classes of the United Nations International Standard Industrial Classification of All Economic Activities (ISIC) [50]. The tables on international economic relations cover merchandise trade, international tourism (a major factor in international trade in services and balance of payments) and financial transactions including development assistance. Each chapter ends with brief technical notes on statistical sources and methods for the tables it includes. References to sources and related methodological publications are provided at the end of the *Yearbook* in the section "Statistical sources and references".

Annex I provides complete information on country and area nomenclature, and regional and other groupings used in the *Yearbook*. Annex II lists conversion coefficients and factors used in various tables. Symbols and conventions used in the *Yearbook* are shown in the section "Explanatory notes", preceding the Introduction.

A list of tables added to or omitted from the last issue of the *Yearbook* is given in annex III. Tables for which a sufficient amount of new data is not available are not being published in this *Yearbook*. Their titles nevertheless are still listed in the table of contents since it is planned that they will be published in a later issue as new data are compiled by the collecting agency. However, the complete set of tables is retained in the CD-ROM version of the *Yearbook*.

As described more fully in the Introduction below, every attempt has been made to ensure that the series contained in the *Yearbook* are sufficiently comparable to provide a reliable general description of economic and social topics throughout the world. Nevertheless, the reader should carefully consult the footnotes and technical notes for any given table for explanations of general limitations of series presented and specific limitations affecting particular data items; the section "comparability of statistics" should also be consulted. Readers interested in more detailed figures than those shown in the present publication, and in further information on the full range of internationally assembled statistics in specialized fields, should also consult the specialized publications listed in the "Statistical sources and references" at the end of the *Yearbook*.

abonnements à l'*Annuaire statistique* (édition imprimée ou sur CD-ROM) peuvent être adressées aux bureaux de vente des publications des Nations Unies à New York et à Genève ou sur Internet page d'accueil de la Division <<http://unstats.un.org/unsd/>>.

Le plan de l'*Annuaire* comprend quatre parties. La première partie, "Aperçu mondial et régional", se compose des principaux agrégats et totaux aux niveaux mondial et régional. Les trois autres sont consacrées à la population et aux questions sociales (deuxième partie), à l'activité économique nationale (troisième partie) et aux relations économiques internationales (quatrième partie). L'organisation de la deuxième partie, "Population et questions sociales", suit généralement le plan adopté par l'ONU "*Manuel des indicateurs sociaux*" [48]; dans la troisième partie, l'activité économique est présentée conformément aux catégories adoptées par l'ONU dans la *Classification internationale type, par industrie, de toutes les branches d'activité économique* [50]. Les tableaux de la quatrième partie, consacrée aux relations économiques internationales, portent sur le commerce des marchandises, le tourisme international (élément essentiel du secteur international des services et balance des paiements) et les opérations financières, y compris l'aide au développement. Chaque chapitre termine avec une brève note technique sur les sources et méthodes statistiques utilisées pour les tableaux du chapitre. On trouvera à la fin de l'*Annuaire*, dans la section "Sources statistiques et références", des références aux sources et publications méthodologiques connexes.

L'annexe I donne des renseignements complets sur la nomenclature des pays et des zones et sur la façon dont ceux-ci ont été regroupés pour former les régions et autres entités géographiques utilisées dans l'*Annuaire*; l'annexe II fournit des renseignements sur les coefficients et facteurs de conversion employés dans les différents tableaux. Les divers symboles et conventions utilisés dans l'*Annuaire* sont présentés dans la section "Notes explicatives" qui précède l'introduction.

Une liste des tableaux ajoutés et supprimés depuis la dernière édition de l'*Annuaire* figure à l'annexe III. Les tableaux pour lesquels on ne dispose pas d'une quantité suffisante des données nouvelles, n'ont pas été publiés dans cet *Annuaire*. Comme ils seront repris dans une prochaine édition à mesure que des données nouvelles seront dépouillées par l'office statistique d'origine, ses titres figurent toujours dans la table des matières. Tous les tableaux sont cependant repris dans l'édition publiée sur CD-ROM.

Comme il est précisé ci-après dans l'introduction, aucun effort n'a été épargné afin que les séries figurant dans l'*Annuaire* soient suffisamment comparables pour fournir une description générale fiable de la situation économique et sociale dans le monde entier. Néanmoins, le lecteur devra consulter avec soins les renvois individuels et les notes techniques de chaque tableau pour y trouver l'explication des limites générales imposées aux séries présentées et des limites particulières propres à

Needless to say, much more can be done to improve the *Yearbook's* scope, coverage, timeliness, design, and technical notes. The process is inevitably an evolutionary one. Comments on the present *Yearbook* and its future evolution are welcome and should be addressed to the Director, United Nations Statistics Division, New York 10017 USA, or via e-mail to statistics@un.org.

certain types de données; aussi le lecteur devra consulter la section "comparabilité des statistiques". Les lecteurs qui souhaitent avoir des chiffres plus détaillés que ceux figurant dans le présent volume ou qui désirent se procurer des renseignements sur la gamme complète des statistiques qui ont été compilées à l'échelon international dans tel ou tel domaine particulier devraient consulter les publications énumérées dans la section "Sources statistiques et références".

Inutile de dire qu'il reste beaucoup à faire pour mettre l'*Annuaire* pleinement à jour en ce qui concerne son champ, sa couverture, sa mise à jour, sa conception générale, et ses notes techniques. Il s'agit là inévitablement d'un processus évolutif. Les observations sur la présente édition de l'*Annuaire* et les modifications suggérées pour l'avenir seront reçues avec intérêt et doivent être adressées au Directeur de la Division de statistique de l'ONU, New York, N.Y. 10017 (États-Unis d'Amérique), ou e-mail à statistics@un.org.

List of tables

Part One World and Region Summary

Chapter I. *World and region summary*

| | | |
|----|--|----|
| 1. | Selected series of world statistics..... | 9 |
| 2. | Population, rate of increase, birth and death rates, surface area and density..... | 12 |
| 3. | Index numbers of total agricultural and food production..... | 14 |
| 4. | Index numbers of per capita total agricultural and food production..... | 15 |
| 5. | Index numbers of industrial production: world and regions..... | 16 |
| 6. | Production, trade and consumption of commercial energy..... | 24 |
| 7. | Total exports and imports: index numbers..... | 26 |

Part Two Population and Social Statistics

Chapter II. *Population and human settlements*

| | | |
|----|---|----|
| 8. | Population by sex, rate of population increase, surface area and density..... | 35 |
| ** | Population in urban and rural areas, rates of growth and largest urban agglomeration population | |

Chapter III. *Education and literacy*

| | | |
|-----|--|----|
| 9. | Education at the primary, secondary and tertiary levels..... | 49 |
| 10. | Illiterate population by sex..... | 55 |
| ** | Public expenditure on education: total and current | |

Chapter IV. *Health, childbearing and nutrition*

| | | |
|-----|--|----|
| 11. | HIV/AIDS epidemic..... | 65 |
| A. | Estimates of the number of people living with HIV/AIDS, people newly infected with HIV, and AIDS deaths in 2002..... | 65 |
| B. | Reported AIDS cases to the World Health Organization: world and regions ... | 65 |
| C. | Reported AIDS cases..... | 66 |
| 12. | Food supply..... | 73 |
| ** | Selected indicators of life expectancy, childbearing and mortality | |

Chapter V. *Culture and communication*

| | | |
|-----|---|----|
| 13. | Book production: number of titles by UDC classes..... | 81 |
| 14. | Daily newspapers..... | 88 |

Liste des tableaux

Première partie Aperçu mondial et régional

Chapitre I. *Aperçu mondial et régional*

| | | |
|----|---|----|
| 1. | Séries principales de statistiques mondiales..... | 9 |
| 2. | Population, taux d'accroissement, taux de natalité et taux de mortalité, superficie et densité..... | 12 |
| 3. | Indices de la production agricole totale et de la production alimentaire..... | 14 |
| 4. | Indices de la production agricole totale et de la production alimentaire par habitant..... | 15 |
| 5. | Indices de la production industrielle: monde et régions..... | 16 |
| 6. | Production, commerce et consommation d'énergie commerciale..... | 24 |
| 7. | Exportations et importations totales: indices... | 26 |

Deuxième partie Population et statistiques sociales

Chapitre II. *Population et établissements humains*

| | | |
|----|--|----|
| 8. | Population selon le sexe, taux d'accroissement de la population, superficie et densité..... | 35 |
| ** | Population urbaine, population rurale, taux d'accroissement et population de l'agglomération urbaine la plus peuplée | |

Chapitre III. *Instruction et alphabétisation*

| | | |
|-----|--|----|
| 9. | Enseignement primaire, secondaire et supérieur..... | 49 |
| 10. | Population analphabète, selon le sexe..... | 55 |
| ** | Dépenses publiques afférentes à l'éducation: totales et ordinaires | |

Chapitre IV. *Santé, maternité et nutrition*

| | | |
|-----|--|----|
| 11. | L'épidémie de VIH/SIDA..... | 65 |
| A. | Chiffres estimatifs du nombre de personnes vivant avec le VIH/SIDA, nouveaux cas d'infection à VIH et décès dus au SIDA en 2002..... | 65 |
| B. | Cas de SIDA déclarés à l'Organisation mondiale de la santé: monde et régions.... | 65 |
| C. | Cas de SIDA déclarés..... | 66 |
| 12. | Disponibilités alimentaires..... | 73 |
| ** | Choix d'indicateurs de l'espérance de vie, de maternité et de la mortalité | |

Chapitre V. *Culture et communication*

| | | |
|-----|--|----|
| 13. | Production de livres: nombre de titres classés d'après la CDU..... | 81 |
| 14. | Journaux quotidiens..... | 88 |

| | | |
|-----|---|-----|
| 15. | Non-daily newspapers and periodicals | 91 |
| 16. | Cinemas: number, seating capacity and annual attendance | 97 |
| 17. | Cellular mobile telephone subscribers | 103 |
| 18. | Telephones | 112 |
| 19. | Internet users | 122 |
| ** | Television and radio receivers | |

Part Three Economic Activity

Chapter VI. *National accounts and industrial production*

| | | |
|-----|--|-----|
| 20. | Gross domestic product and gross domestic product per capita | 135 |
| 21. | Expenditure on gross domestic product in current prices | 153 |
| 22. | Value added by industries in current prices | 163 |
| 23. | Relationships among the principal national accounting aggregates | 174 |
| 24. | Government final consumption expenditure by function in current prices | 185 |
| 25. | Household consumption expenditure by purpose in current prices | 190 |
| 26. | Index numbers of industrial production | 194 |

Chapter VII. *Financial statistics*

| | | |
|-----|--|-----|
| 27. | Rates of discount of central banks | 227 |
| 28. | Short-term interest rates | 232 |

Chapter VIII. *Labour force*

| | | |
|-----|------------------------------|-----|
| 29. | Employment by industry | 242 |
| | A. ISIC Rev. 2 | 242 |
| | B. ISIC Rev. 3 | 246 |
| 30. | Unemployment | 259 |

Chapter IX. *Wages and prices*

| | | |
|-----|---|-----|
| 31. | Wages in manufacturing | 281 |
| 32. | Producers' prices or wholesale prices | 294 |
| 33. | Consumer price index numbers | 301 |

Chapter X. *Agriculture, forestry and fishing*

| | | |
|-----|--|-----|
| 34. | Agricultural production (index numbers) | 319 |
| 35. | Cereals | 328 |
| 36. | Oil crops, in oil equivalent | 336 |
| 37. | Livestock | 344 |
| 38. | Roundwood | 363 |
| 39. | Fish production | 370 |
| 40. | Fertilizers (production and consumption) | 380 |

| | | |
|-----|---|-----|
| 15. | Journaux non quotidiens et périodiques | 91 |
| 16. | Cinéma: nombre d'établissements, nombre de sièges et fréquentation annuelle | 97 |
| 17. | Abonnés au téléphone mobile | 103 |
| 18. | Téléphones | 112 |
| 19. | Usagers d'Internet | 122 |
| ** | Récepteurs de télévision et de radiodiffusion sonore | |

Troisième partie Activité économique

Chapitre VI. *Comptabilités nationales et production industrielle*

| | | |
|-----|--|-----|
| 20. | Produit intérieur brut et produit intérieur brut par habitant | 135 |
| 21. | Dépenses imputées au produit intérieur brut aux prix courants | 153 |
| 22. | Valeur ajoutée par branche d'activité aux prix courants | 163 |
| 23. | Relations entre les principaux agrégats de comptabilité nationale | 174 |
| 24. | Consommation finale des administrations publiques par fonction aux prix courants | 185 |
| 25. | Dépenses de consommation des ménages par fonction aux prix courants | 190 |
| 26. | Indices de la production industrielle | 194 |

Chapitre VII. *Statistiques financières*

| | | |
|-----|---|-----|
| 27. | Taux d'escompte des banques centrales | 227 |
| 28. | Taux d'intérêt à court terme | 232 |

Chapitre VIII. *Main-d'oeuvre*

| | | |
|-----|----------------------------|-----|
| 29. | Emploi par industrie | 242 |
| | A. CITI Rév. 2 | 242 |
| | B. CITI Rév. 3 | 246 |
| 30. | Chômage | 259 |

Chapitre IX. *Salaires et prix*

| | | |
|-----|---|-----|
| 31. | Salaires dans les industries manufacturières .. | 281 |
| 32. | Prix à la production ou prix de gros | 294 |
| 33. | Indices des prix à la consommation | 301 |

Chapitre X. *Agriculture, forêts et pêche*

| | | |
|-----|---|-----|
| 34. | Production agricole (indices) | 319 |
| 35. | Céréales | 328 |
| 36. | Cultures d'huile, en équivalent d'huile | 336 |
| 37. | Cheptel | 344 |
| 38. | Bois rond | 363 |
| 39. | Production halieutique | 370 |
| 40. | Engrais (production et consommation) | 380 |

Chapter XI. *Manufacturing*

| A. Food, beverages and tobacco | |
| 41. | Sugar (production and consumption)..... 403 |
| 42. | Meat..... 414 |
| 43. | Beer 429 |
| 44. | Cigarettes..... 434 |
| B. Textiles and leather products | |
| 45. | Fabrics (cotton, wool, cellulosic and non-cellulosic fibres) 440 |
| 46. | Leather footwear 448 |
| C. Wood and wood products; paper and paper products | |
| 47. | Sawnwood..... 453 |
| 48. | Paper and paperboard 460 |
| D. Chemicals and related products | |
| 49. | Cement..... 465 |
| 50. | Sulphuric acid 472 |
| E. Basic metal industries | |
| 51. | Pig-iron and crude steel 475 |
| 52. | Aluminium 482 |
| F. Fabricated metal products, machinery and equipment | |
| 53. | Radio and television receivers 486 |
| 54. | Passenger cars 489 |
| 55. | Refrigerators for household use 491 |
| 56. | Washing machines for household use 494 |
| 57. | Machine tools..... 496 |
| 58. | Lorries (trucks)..... 501 |

Chapter XII. *Transport*

| | |
|-----|---|
| 59. | Railways: traffic..... 509 |
| 60. | Motor vehicles in use 519 |
| 61. | Merchant shipping: fleets 536 |
| 62. | International maritime transport..... 546 |
| 63. | Civil aviation 554 |

Chapter XIII. *Energy*

| | |
|-----|--|
| 64. | Production, trade and consumption of commercial energy 572 |
| 65. | Production of selected energy commodities..... 600 |

Chapter XIV. *Environment*

| | |
|-----|---|
| 66. | Land..... 619 |
| 67. | CO ₂ emissions estimates..... 627 |
| 68. | Ozone-depleting chlorofluorocarbons 637 |
| ** | Water supply and sanitation coverage |
| ** | Threatened species |

Chapter XV. *Science and technology, intellectual property*

| | |
|-----|---|
| 69. | Researchers, technicians and other supporting staff engaged in research and development 647 |
|-----|---|

Chapitre XI. *Industries manufacturières*

| | |
|---|---|
| A. Alimentation, boissons et tabac | |
| 41. | Sucre (production et consommation)..... 403 |
| 42. | Viande 414 |
| 43. | Bière..... 429 |
| 44. | Cigarettes..... 434 |
| B. Textiles et articles en cuir | |
| 45. | Tissus (coton, laines, fibres cellulosiques et non cellulosiques) 440 |
| 46. | Chaussures de cuir 448 |
| C. Bois et produits dérivés; papier et produits dérivés | |
| 47. | Sciages 453 |
| 48. | Papiers et cartons 460 |
| D. Produits chimiques et apparentés | |
| 49. | Ciment..... 465 |
| 50. | Acide sulfurique..... 472 |
| E. Industries métallurgiques de base | |
| 51. | Fonte et acier brut 475 |
| 52. | Aluminium..... 482 |
| F. Fabrications métallurgiques, machines et équipements | |
| 53. | Récepteurs radio et télévision..... 486 |
| 54. | Voitures de tourisme..... 489 |
| 55. | Réfrigérateurs à usage domestique..... 491 |
| 56. | Machines à laver à usage domestique 494 |
| 57. | Machines-outils..... 496 |
| 58. | Camions..... 501 |

Chapitre XII. *Transports*

| | |
|-----|--|
| 59. | Chemins de fer: trafic..... 509 |
| 60. | Véhicules automobiles en circulation..... 519 |
| 61. | Transports maritimes: flotte marchande 536 |
| 62. | Transports maritimes internationaux..... 546 |
| 63. | Aviation civile..... 554 |

Chapitre XIII. *Energie*

| | |
|-----|--|
| 64. | Production, commerce et consommation d'énergie commerciale 572 |
| 65. | Production des principaux biens de l'énergie..... 600 |

Chapitre XIV. *Environnement*

| | |
|-----|--|
| 66. | Terres..... 619 |
| 67. | Estimations des émissions de CO ₂ 627 |
| 68. | Chlorofluorocarbones qui appauvrissent la couche d'ozone 637 |
| ** | Accès à l'eau et à l'assainissement |
| ** | Espèces menacées |

Chapitre XV. *Science et technologie, propriété intellectuelle*

| | |
|-----|---|
| 69. | Chercheurs, techniciens et autre personnel de soutien employés à des travaux de recherche et de développement 647 |
|-----|---|

| | | |
|-----|---|-----|
| 70. | Gross domestic expenditure on research and development by source of funds | 652 |
| 71. | Patents | 656 |

Part Four International Economic Relations

Chapter XVI. *International merchandise trade*

| | | |
|-----|---|-----|
| 72. | Total imports and exports | 667 |
| 73. | Total imports and exports: index numbers | 683 |
| 74. | Manufactured goods exports | 689 |

Chapter XVII. *International tourism*

| | | |
|-----|---|-----|
| 75. | Tourist/visitor arrivals by region of origin | 699 |
| 76. | Tourist/visitor arrivals and tourism expenditure | 726 |
| 77. | Tourism expenditure in other countries | 736 |

Chapter XVIII. *Balance of payments*

| | | |
|-----|--------------------------------------|-----|
| 78. | Summary of balance of payments | 747 |
|-----|--------------------------------------|-----|

Chapter XIX. *International finance*

| | | |
|-----|--|-----|
| 79. | Exchange rates | 781 |
| 80. | Total external and public/publicly guaranteed long-term debt of developing countries | 797 |
| | A. Total external debt | 797 |
| | B. Public and publicly guaranteed long-term debt | 799 |

Chapter XX. *Development assistance*

| | | |
|-----|--|-----|
| 81. | Disbursements of bilateral and multilateral official development assistance and official aid to individual recipients | 807 |
| 82. | Net official development assistance from DAC countries to developing countries and multilateral organizations | 817 |
| 83. | Socio-economic development assistance through the United Nations system—Development grant expenditures | 818 |

** Asterisks preceding table names identify tables presented in previous issues of the *Statistical Yearbook* but not contained in the present issue because of insufficient new data. These tables will be updated in future issues of the *Yearbook* when new data become available.

| | | |
|-----|---|-----|
| 70. | Dépenses intérieures brutes de recherche et développement par source de fonds | 652 |
| 71. | Brevets | 656 |

Quatrième partie Relations économiques internationales

Chapitre XVI. *Commerce international des marchandises*

| | | |
|-----|--|-----|
| 72. | Importations et exportations totales | 667 |
| 73. | Importations et exportations totales: indices | 683 |
| 74. | Exportations des produits manufacturés | 689 |

Chapitre XVII. *Tourisme international*

| | | |
|-----|--|-----|
| 75. | Arrivées de touristes/visiteurs par régions de provenance | 699 |
| 76. | Arrivées de touristes/visiteurs et dépenses touristiques | 726 |
| 77. | Dépenses touristiques dans d'autres pays | 736 |

Chapitre XVIII. *Balance des paiements*

| | | |
|-----|---|-----|
| 78. | Résumé des balances des paiements | 747 |
|-----|---|-----|

Chapitre XIX. *Finances internationales*

| | | |
|-----|--|-----|
| 79. | Cours des changes | 781 |
| 80. | Total de la dette extérieure et dette publique extérieure à long terme garantie par l'Etat des pays en développement | 797 |
| | A. Total de la dette extérieure | 797 |
| | B. Dette publique extérieure à long terme garantie par l'Etat | 799 |

Chapitre XX. *Aide au développement*

| | | |
|-----|---|-----|
| 81. | Versements d'aide publique au développement et d'aide publique bilatérales et multilatérales aux bénéficiaires | 807 |
| 82. | Aide publique au développement nette de pays du CAD aux pays en développement et aux organisations multilatérales | 817 |
| 83. | Assistance en matière de développement socioéconomique fournie par le système des Nations Unies—Aide au développement... .. | 818 |

** Ce symbole indique les tableaux publiés dans les éditions précédentes de l'*Annuaire statistique* mais qui n'ont pas été repris dans la présente édition faute de données nouvelles suffisantes. Ces tableaux seront actualisés dans les futures livraisons de l'*Annuaire* à mesure que des données nouvelles deviendront disponibles.

Explanatory notes

In general, the statistics presented in the present publication are based on information available to the Statistics Division of the United Nations Secretariat as of 31 January 2003.

Units of measurement

The metric system of weights and measures has been employed throughout the *Statistical Yearbook*. For conversion coefficients and factors, see annex II.

Country notes and nomenclature

As a general rule, the data presented in the *Yearbook* relate to a given country or area within its present de facto boundaries. A complete list of countries and territories is presented in Annex I.

Changes in country names are reflected in Annex I. The most recent name changes that the reader should be aware of are: Serbia and Montenegro, previously listed as Yugoslavia; and Timor-Leste, formerly listed as East Timor.

It should also be noted that unless otherwise indicated, for statistical purposes the data for China exclude those for Hong Kong Special Administrative Region of China, Macao Special Administrative Region of China and Taiwan province of China.

Symbols and conventions used in the tables

A point (.) is used to indicate decimals.

A hyphen (-) between years, e.g., 1994-1995, indicates the full period involved, including the beginning and end years; a slash (/) indicates a financial year, school year or crop year, e.g., 1994/95.

| | |
|---|----------|
| Not applicable or not separately reported | .. |
| Data not available | ... |
| Magnitude zero | - |
| Less than half of unit employed | 0 or 0.0 |
| Provisional or estimated figure | * |
| United Nations estimate | x |
| Marked break in series | # |

Details and percentages in the tables do not necessarily add to totals because of rounding.

Numbers in square brackets ([]) in the text refer to the numbered entries in the section "Statistical sources and references" at the end of the *Yearbook*.

Notes explicatives

En général, les statistiques qui figurent dans la présente publication sont fondées sur les informations dont disposait la Division de statistique du Secrétariat de l'ONU au 31 janvier 2003.

Unités de mesure

Le système métrique de poids et mesures a été utilisé dans tout l'*Annuaire statistique*. On trouvera à l'annexe II les coefficients et facteurs de conversion.

Notes sur les pays et nomenclature

En règle générale, les données renvoient au pays ou zone en question dans ses frontières actuelles effectives. Une liste complète des pays et territoires figure à l'annexe I.

Le lecteur est renvoyé à l'annexe I où il trouvera une liste des changements de désignation. Les changements de nom de pays survenus récemment sont: Serbie-et-Monténégro, apparaissait antérieurement sous le nom de Yougoslavie; et Timor-Leste, apparaissait antérieurement sous le nom de Timor Oriental.

Il convient de noter aussi que sauf indication contraire, les données statistiques relatives à la Chine ne comprennent pas celles qui concernent la région administrative spéciale de Hong Kong, la région administrative spéciale de Macao et la province chinoise de Taiwan.

Signes et conventions employés dans les tableaux:

| | |
|---|----------|
| Les décimales sont précédées d'un point (.) | |
| Un tiret (-) entre des années, par exemple "1994-1995", indique que la période est embrassée dans sa totalité, y compris la première et la dernière année; une barre oblique (/) renvoie à un exercice financier, à une année scolaire ou à une campagne agricole, par exemple "1994/95". | |
| Non applicable ou non communiqué séparément | .. |
| Données non disponibles | ... |
| Néant | - |
| Valeur inférieure à la moitié de la dernière unité retenue | 0 ou 0.0 |
| Chiffre provisoire ou estimatif | * |
| Estimation des Nations Unies | x |
| Discontinuité notable dans la série | # |

Les chiffres étant arrondis, les totaux ne correspondent pas toujours à la somme exacte des éléments ou pourcentages figurant dans les tableaux.

Les chiffres figurant entre crochets ([]) se réfèrent aux entrées numérotées dans la liste des sources et références statistiques à la fin de l'ouvrage.

Introduction

This is the forty-seventh issue of the United Nations *Statistical Yearbook*, prepared by the Statistics Division, Department of Economic and Social Affairs of the United Nations Secretariat. It presents series covering, in general, 1991-2000 or 1992-2001, based on statistics available to the Statistics Division up to 31 January 2003.

The main purpose of the *Statistical Yearbook* is to provide in a single volume a comprehensive compilation of internationally available statistics on social and economic conditions and activities, at world, regional and national levels, covering, whenever possible, a ten-year period.

Most of the statistics presented in the *Yearbook* are extracted from more detailed, specialized publications prepared by the Statistics Division and by many other international statistical services. Thus, while the specialized publications concentrate on monitoring topics and trends in particular social and economic fields, the *Statistical Yearbook* tables provide data for a more comprehensive, overall description of social and economic structures, conditions, changes and activities. The objective has been to collect, systematize and coordinate the most essential components of comparable statistical information which can give a broad and, to the extent feasible, a consistent picture of social and economic processes at world, regional and national levels.

More specifically, the *Statistical Yearbook* provides systematic information on a wide range of social and economic issues which are of concern in the United Nations system and among the governments and peoples of the world. A particular value of the *Yearbook*, but also its greatest challenge, is that these issues are extensively interrelated. Meaningful analysis of these issues requires systematization and coordination of the data across many fields. These issues include:

- General economic growth and related economic conditions;
- The economic situation in developing countries and progress towards the objectives adopted for the United Nations development decades;
- Population and urbanization, and their growth and impact;
- Employment, inflation and wages;
- Energy production and consumption and the development of new energy sources;
- Expansion of trade;
- Supply of food and alleviation of hunger;
- The financial situation of countries and external payments and receipts;
- Education, training and eradication of illiteracy;
- Improvement in general living conditions;
- Pollution and protection of the environment;

Introduction

La présente édition est la quarante-septième de l'*Annuaire statistique* des Nations Unies, établi par la Division de statistique du Département des affaires économiques et sociales du Secrétariat de l'Organisation des Nations Unies. Elle contient des séries de données qui portent d'une manière générale sur les années 1991 à 2000 ou 1992 à 2001, et pour lesquelles ont été utilisées les informations dont disposait la Division de statistique au 31 janvier 2003.

L'*Annuaire statistique* a principalement pour objet de présenter en un seul volume un inventaire complet de statistiques disponibles sur le plan international et concernant la situation et les activités sociales et économiques aux échelons mondial, régional et national, pour une période d'environ dix ans.

Une bonne partie des données qui figurent dans l'*Annuaire* existent sous une forme plus détaillée dans les publications spécialisées établies par la Division de statistique et par bien d'autres services statistiques internationaux. Alors que les publications spécialisées suivent essentiellement l'évolution dans certains domaines socio-économiques précis, l'*Annuaire statistique* présente les données de manière à fournir une description plus globale et exhaustive des structures, conditions, transformations et activités socio-économiques. On a cherché à recueillir, systématiser et coordonner les principaux éléments de renseignements statistiques comparables, de manière à dresser un tableau général et autant que possible cohérent des processus socio-économiques en cours aux échelons mondial, régional et national.

Plus précisément, l'*Annuaire statistique* a pour objet de présenter des renseignements systématiques sur toutes sortes de questions socio-économiques qui sont liées aux préoccupations actuelles du système des Nations Unies ainsi que des gouvernements et des peuples du monde. Le principal avantage de l'*Annuaire* — et aussi la principale difficulté à surmonter — tient à ce que ces questions sont étroitement interdépendantes. Pour en faire une analyse utile, il est essentiel de systématiser et de coordonner les données se rapportant à de nombreux domaines différents. Ces questions sont notamment les suivantes:

- La croissance économique générale et les aspects connexes de l'économie;
- La situation économique dans les pays en développement et les progrès accomplis vers la réalisation des objectifs des décennies des Nations Unies pour le développement;
- La population et l'urbanisation, leur croissance et leur impact;
- L'emploi, l'inflation et les salaires;
- La production et la consommation d'énergie et la mise en valeur des énergies nouvelles;
- L'expansion des échanges;

— Assistance provided to developing countries for social and economic development purposes.

Organization of the *Yearbook*

The contents of the *Statistical Yearbook* are planned to serve a general readership. The *Yearbook* endeavours to provide information for various bodies of the United Nations system as well as for other international organizations, for governments and non-governmental organizations, for national statistical, economic and social policy bodies, for scientific and educational institutions, for libraries and for the public. Data published in the *Statistical Yearbook* are also of interest to companies and enterprises and to agencies engaged in marketing research.

The 83 tables of the *Yearbook* are grouped into four broad parts:

- Part One: World and Region Summary (chapter I, tables 1-7);
- Part Two: Population and Social Statistics (chapters II-V: tables 8-19);
- Part Three: Economic Activity (chapters VI-XV: tables 20-71);
- Part Four: International Economic Relations (chapters XVI-XX: tables 72-83).

These four parts together present data at two levels of aggregation. The more aggregated information shown in Part One provides an overall picture of development at the world and region levels. More specific and detailed information for analysis concerning individual countries or areas is presented in the three following parts. Each of these parts is divided into chapters, by topic, and each chapter ends with a section on "Technical notes", which provides brief descriptions of major statistical concepts, definitions and classifications required for interpretation and analysis of the data. Systematic information on the methodology used for the computation of the figures can be found in the publications on methodology of the United Nations and its agencies, listed in the section "Statistical sources and references" at the end of the *Yearbook*. Additional general information on statistical methodology is provided in the section below on "Comparability of statistics" and in the explanatory notes following the Introduction.

Part One, World and Region Summary, comprises seven tables highlighting the principal trends in the world as well as in each of the regions and in the major economic and social sectors. It contains global totals of important aggregate statistics needed for the analysis of economic growth, the structure of the world economy, major changes in world population and expansion of external merchandise trade. The global totals are, as a rule, subdivided into major geographical areas.

Part Two, Population and Social Statistics, comprises 12 tables which contain more detailed statistical series on population, social conditions and levels of living, for example, illiteracy, health, culture and communication.

— Les approvisionnements alimentaires et la lutte contre la faim;

— La situation financière, les paiements extérieurs et les recettes extérieures;

— L'éducation, la formation et l'élimination de l'analphabétisme;

— L'amélioration des conditions de vie;

— La pollution et la protection de l'environnement;

— L'assistance fournie aux pays en développement à des fins socio-économiques.

Présentation de l'*Annuaire*

Le contenu de l'*Annuaire statistique* a été préparé à l'intention de tous les lecteurs intéressés. Les renseignements fournis devraient pouvoir être utilisés par les divers organismes du système des Nations Unies ainsi que par d'autres organisations internationales, par les gouvernements et les organisations non gouvernementales, par les organismes nationaux de statistique et de politique économique et sociale, par les institutions scientifiques et les établissements d'enseignement, les bibliothèques et les particuliers. Les données publiées dans l'*Annuaire statistique* peuvent également intéresser les sociétés et entreprises, et les organismes spécialisés dans les études de marché.

Les 83 tableaux de l'*Annuaire* sont groupés en quatre parties:

— La première partie: Aperçu mondial et régional (chapitre I, tableaux 1 à 7);

— La deuxième partie: Statistiques démographiques et sociales (chapitres II à V, tableaux 8 à 19);

— La troisième partie: Activité économique (chapitres VI à XV, tableaux 20 à 71);

— La quatrième partie: Relations économiques internationales (chapitres XVI à XX, tableaux 72 à 83).

Ces quatre parties présentent les données à deux niveaux d'agrégation: les valeurs les plus agrégées qui figurent dans la première partie donnent un tableau global du développement à l'échelon mondial et régional, tandis que les trois autres parties contiennent des renseignements plus précis et détaillés qui se prêtent mieux à une analyse par pays ou par zones. Chacune de ces trois parties est divisée en chapitres portant sur des sujets donnés, et chaque chapitre comprend une section intitulée "Notes techniques" où l'on trouve une brève description des principales notions, définitions et classifications statistiques nécessaires pour interpréter et analyser les données. Les méthodes de calcul utilisées sont décrites de façon systématique dans les publications se référant à la méthodologie des Nations Unies et de leurs organismes, énumérées à la fin de l'*Annuaire* dans la section "Sources et références statistiques". Le lecteur trouvera un complément d'informations générales ci-après dans la section intitulée "Comparabilité des statistiques", ainsi que dans les notes explicatives qui suivent l'introduction.

Of the 52 tables in Part Three, Economic Activity, 27 provide data on national accounts, index numbers of industrial production, interest rates, labour force, wages and prices, transport, energy, environment, science and technology and intellectual property; 25 tables provide data on production in the major branches of the economy (using, in general, the International Standard Industrial Classification, ISIC), namely agriculture, hunting, forestry and fishing, and manufacturing. Consumption data are combined with the production data in tables on specific commodities, where feasible.

Part Four, International Economic Relations, comprises 12 tables on international merchandise trade, balance of payments, international tourism, international finance and development assistance.

An index (in English only) is provided at the end of the *Yearbook*.

Annexes and regional groupings of countries or areas

The annexes to the *Statistical Yearbook* and the section "Explanatory notes" preceding the Introduction, provide additional essential information on the *Yearbook's* contents and presentation of data.

Annex I provides information on countries or areas covered in the *Yearbook* tables and on their grouping into geographical regions. The geographical groupings shown in the *Yearbook* are generally based on continental regions unless otherwise indicated. However, strict consistency in this regard is impossible. A wide range of classifications is used for different purposes in the various international agencies and other sources of statistics for the *Yearbook*. These classifications vary in response to administrative and analytical requirements.

Similarly, there is no common agreement in the United Nations system concerning the terms "developed" and "developing" when referring to the stage of development reached by any given country or area, and its corresponding classification in one or the other grouping. The *Yearbook* thus refers more generally to "developed" or "developing" regions on the basis of conventional practice. Following this practice, "developed regions" comprises Northern America, Europe and the former USSR, Australia, Japan and New Zealand, while all of Africa and the remainder of the Americas, Asia and Oceania comprise the "developing regions". These designations are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

Annex II provides detailed information on conversion coefficients and factors used in various tables, and annex III provides listings of tables added and omitted in the present edition of the *Yearbook*.

La première partie, intitulée "Aperçu mondial et régional", comprend sept tableaux présentant les principales tendances dans le monde et dans les régions ainsi que dans les principaux secteurs économiques et sociaux. Elle fournit des chiffres mondiaux pour les principaux agrégats statistiques nécessaires pour analyser la croissance économique, la structure de l'économie mondiale, les principaux changements dans la population mondiale et l'expansion du commerce extérieur de marchandises. En règle générale, les chiffres mondiaux sont ventilés par grandes régions géographiques.

La deuxième partie, intitulée "Statistiques démographiques et sociales", comporte 12 tableaux où figurent des séries plus détaillées concernant la population, les conditions sociales et les niveaux de vie, notamment des données sur l'alphabétisation, la santé, la culture et la communication.

La troisième partie, intitulée "Activité économique", comporte 52 tableaux, 27 qui présentent des statistiques concernant les comptes nationaux, les nombres indices relatifs à la production industrielle, les taux d'intérêt, la population active, les prix et les salaires, le transport, l'énergie, l'environnement, la science et technologie, et la propriété intellectuelle; et 25 qui présentent des données sur la production des principales branches d'activité économique (en utilisant en général la *Classification internationale type, par industrie, de toutes les branches d'activité économique*): agriculture, chasse, sylviculture et pêche, et industries manufacturières. Les tableaux traitant de certains produits de base associent autant que possible les données relatives à la consommation aux valeurs concernant la production.

La quatrième partie, intitulée "Relations économiques internationales", comprend 12 tableaux relatifs au commerce international de marchandises, aux balances des paiements, au tourisme international, aux finances internationales, et à l'aide au développement.

Un index (en anglais seulement) figure à la fin de l'*Annuaire*.

Annexes et groupements régionaux des pays et zones

Les annexes à l'*Annuaire statistique* et la section intitulée "Notes explicatives" qui précède l'introduction, offrent d'importantes informations complémentaires quant à la teneur et à la présentation des données figurant dans le présent ouvrage.

L'annexe I donne des renseignements sur les pays ou zones couverts par les tableaux de l'*Annuaire* et sur leur regroupement en régions géographiques. Sauf indication contraire, les groupements géographiques figurant dans l'*Annuaire* sont généralement fondés sur les régions continentales, mais une présentation absolument systématique est impossible à cet égard car les diverses institutions internationales et autres sources de statistiques employées pour la confection de l'*Annuaire*

Comparability of statistics

One major aim of the *Statistical Yearbook* is to present series which are as nearly comparable across countries as the available statistics permit. Considerable efforts are also made among the international suppliers of data and by the staff of the *Yearbook* to ensure the compatibility of various series by coordinating time periods, base years, prices chosen for valuation and so on. This is indispensable in relating various bodies of data to each other and to facilitate analysis across different sectors. Thus, for example, relating data on economic output to those on employment makes it possible to derive some trends in the field of productivity; relating data on exports and imports to those on national product allows an evaluation of the relative importance of external trade in different countries and reveals changes in the role of trade over time.

In general, the data presented reflect the methodological recommendations of the United Nations Statistical Commission, issued in various United Nations publications, and of other international bodies concerned with statistics. Publications containing these recommendations and guidelines are listed in the section "Statistical sources and references" at the end of the *Yearbook*. Use of international recommendations not only promotes international comparability of the data but also ensures a degree of compatibility regarding the underlying concepts, definitions and classifications relating to different series. However, much work remains to be done in this area and, for this reason, some tables can serve only as a first source of data, which require further adjustment before being used for more in-depth analytical studies. While on the whole, a significant degree of comparability has been achieved in international statistics, there are many limitations, for a variety of reasons.

One common cause of non-comparability of economic data is different valuations of statistical aggregates such as national income, wages and salaries, output of industries and so forth. Conversion of these and similar series originally expressed in national prices into a common currency, for example into United States dollars, through the use of exchange rates, is not always satisfactory owing to frequent wide fluctuations in market rates and differences between official rates and rates which would be indicated by unofficial markets or purchasing power parities. For this reason, data on national income in United States dollars which are published in the *Yearbook* are subject to certain distortions and can be used as only a rough approximation of the relative magnitudes involved.

The use of different kinds of sources for obtaining data is another cause of incomparability. This is true, for example, in the case of employment and unemployment, where data are collected from such non-comparable sources as sample surveys, social insurance statistics and establishment surveys.

emploi, selon l'objet de l'exercice, des classifications fort différentes en réponse à diverses exigences d'ordre administratif ou analytique.

Il n'existe pas non plus dans le système des Nations Unies de définition commune des termes "développé" et "en développement" pour décrire le niveau atteint en la matière par un pays ou une zone donnés ni pour les classer dans l'un ou l'autre de ces groupes. Ainsi, dans l'*Annuaire*, on s'en remet à l'usage pour qualifier les régions de "développées" ou "en développement". Selon cet usage, les régions développées sont l'Amérique septentrionale, l'Europe et l'ancienne URSS, l'Australie, le Japon et la Nouvelle-Zélande, alors que toute l'Afrique et le reste des Amériques, l'Asie et l'Océanie constituent les régions en développement. Ces appellations sont utilisées pour plus de commodité dans la présentation des statistiques et n'impliquent pas nécessairement un jugement quant au stade de développement auquel est parvenu tel pays ou telle zone.

L'annexe II fournit des renseignements sur les coefficients et facteurs de conversion employés dans les différents tableaux, et l'annexe III contient les listes de tableaux qui ont été ajoutés ou omis dans la présente édition de l'*Annuaire*.

Comparabilité des statistiques

L'*Annuaire statistique* a principalement pour objet de présenter des statistiques aussi comparables d'un pays à l'autre que les données le permettent. Les sources internationales de données et les auteurs de l'*Annuaire* ont réalisés des efforts considérables pour faire en sorte que les diverses séries soient compatibles en harmonisant les périodes de référence, les années de base, les prix utilisés pour les évaluations, etc. Cette démarche est indispensable si l'on veut rapprocher divers ensembles de données pour faciliter l'analyse intersectorielle de l'économie. Ainsi, en liant les données concernant la production à celles de l'emploi, on parvient à dégager certaines tendances dans le domaine de la productivité; de même, en associant les données concernant les exportations et importations aux valeurs du produit national, on obtient une évaluation de l'importance relative des échanges extérieurs dans différents pays et de l'évolution du rôle joué par le commerce.

De façon générale, les données sont présentées selon les recommandations méthodologiques formulées par la Commission de statistique de l'ONU et par les autres organisations internationales qui s'intéressent aux statistiques. Les titres des publications contenant ces recommandations et lignes directrices figurent à la fin de l'ouvrage dans la section intitulée "Sources et références statistiques". Le respect des recommandations internationales tend non seulement à promouvoir la comparabilité des données à l'échelon international, mais elle assure également une certaine comparabilité entre les concepts, les définitions et classifications utilisés. Mais comme il reste encore beaucoup à faire dans ce domaine, les don-

Non-comparability of data may also result from differences in the institutional patterns of countries. Certain variations in social and economic organization and institutions may have an impact on the comparability of the data even if the underlying concepts and definitions are identical.

These and other causes of non-comparability of the data are briefly explained in the technical notes to each chapter.

Statistical sources and reliability and timeliness of data

Statistics and indicators have been compiled mainly from official national and international sources, as these are more authoritative and comprehensive, more generally available as time series and more comparable among countries than other sources. In a few cases, official sources are supplemented by other sources and estimates, where these have been subjected to professional scrutiny and debate and are consistent with other independent sources. The comprehensive international data sources used for most of the tables are presented in the list of "Statistical sources and references" at the end of the *Yearbook*.

Users of international statistics are often concerned about the apparent lack of timeliness in the available data. Unfortunately, most international data are only available with a delay of at least one to three years after the latest year to which they refer. The reasons for the delay are that the data must first be processed by the national statistical services at the country level, then forwarded to the international statistical services and processed again to ensure as much consistency across countries and over time as possible.

nées présentées dans certains tableaux n'ont qu'une valeur indicative et nécessiteront des ajustements plus poussés avant de pouvoir servir à des analyses approfondies. Bien que l'on soit parvenu, dans l'ensemble, à un degré de comparabilité appréciable en matière de statistiques internationales, diverses raisons expliquent que subsistent encore de nombreuses limitations.

Une cause commune de non-comparabilité des données réside dans la diversité des méthodes d'évaluation employées pour comptabiliser des agrégats tels que le revenu national, les salaires et traitements, la production des différentes branches d'activité industrielle, etc. Il n'est pas toujours satisfaisant de ramener la valeur des séries de ce type — exprimée à l'origine en prix nationaux — à une monnaie commune (par exemple le dollar des États-Unis) car les taux de change du marché connaissent fréquemment de fortes fluctuations tandis que les taux officiels ne coïncident pas avec ceux des marchés officieux ni avec les parités réelles de pouvoir d'achat. C'est pourquoi les données relatives au revenu national, qui sont publiées dans l'*Annuaire* en dollars des États-Unis, souffrent de certaines distorsions et ne peuvent servir qu'à donner une idée approximative des ordres de grandeur relatifs.

Le recours à des sources diverses pour la collecte des données est une autre facteur qui limite la comparabilité, en particulier dans les secteurs de l'emploi et du chômage où les statistiques sont obtenues par des moyens aussi peu comparables que les sondages, le dépouillement des registres d'assurances sociales et les enquêtes auprès des entreprises.

Dans certains cas, les données ne sont pas comparables en raison de différences entre les structures institutionnelles des pays. Certaines variations dans l'organisation et les institutions économiques et sociales peuvent affecter la comparabilité des données même si les concepts et définitions sont fondamentalement identiques.

Ces causes de non-comparabilité des données sont parmi celles qui sont brièvement expliquées dans les notes techniques de chaque chapitre.

Origine, fiabilité et actualité des données

Les statistiques et les indicateurs sont fondés essentiellement sur des données provenant de sources officielles nationales et internationales; c'est en effet la meilleure source si l'on veut des données fiables, complètes et comparables et si l'on a besoin de séries chronologiques. Dans quelques cas, les données officielles sont complétées par des informations et des estimations provenant d'autres sources qui ont été examinées par des spécialistes et confirmées par des sources indépendantes. On trouvera à la fin de l'*Annuaire* la liste des "Sources statistiques et références", qui récapitule les sources des données internationales utilisées pour la plupart des tableaux.

Les utilisateurs des statistiques internationales se plaignent souvent du fait que les données disponibles ne sont pas actualisées. Malheureusement, la plupart des données internationales ne sont disponibles qu'avec un délai de deux ou trois ans après la dernière année à laquelle elles se rapportent. S'il en est ainsi, c'est parce que les données sont d'abord traitées par les services statistiques nationaux avant d'être transmises aux services statistiques internationaux, qui les traitent à nouveau pour assurer la plus grande comparabilité possible entre les pays et entre les périodes.

Part One World and Region Summary

Chapter I World and region summary (tables 1-7)

This part of the *Statistical Yearbook* presents selected aggregate series on principal economic and social topics for the world as a whole and for the major regions. The topics include population and surface area, agricultural and industrial production, motor vehicles in use, external trade, government financial reserves, and energy production and consumption. More detailed data on individual countries and areas are provided in the subsequent parts of the present *Yearbook*. These comprise Part Two: Population and Social Statistics; Part Three: Economic Activity; and Part Four: International Economic Relations.

Regional totals may contain incomparabilities between series owing to differences in definitions of regions and lack of data for particular regional components. General information on regional groupings is provided in annex I of the *Yearbook*. Supplementary information on regional groupings used in specific series is provided, as necessary, in table footnotes and in the technical notes at the end of chapter I.

Première partie Aperçu mondial et régional

Chapitre I Aperçu mondial et régional (tableaux 1 à 7)

Cette partie de l'*Annuaire statistique* présente, pour le monde entier et ses principales subdivisions, un choix d'agrégats ayant trait à des questions économiques et sociales essentielles: population et superficie, production agricole et industrielle, véhicules automobiles en circulation, commerce extérieur, réserves financières publiques, et la production et la consommation d'énergie. Des statistiques plus détaillées pour divers pays ou zones figurent dans les parties ultérieures de l'*Annuaire*, c'est-à-dire dans les deuxième, troisième et quatrième parties intitulées respectivement: population et statistiques sociales, activités économiques et relations économiques internationales.

Les totaux régionaux peuvent présenter des incomparabilités entre les séries en raison de différences dans la définition des régions et de l'absence de données sur tel ou tel élément régional. A l'annexe I de l'*Annuaire*, on trouvera des renseignements généraux sur les groupements régionaux. Des informations complémentaires sur les groupements régionaux pour certaines séries bien précises sont fournies, lorsqu'il y a lieu, dans les notes figurant au bas des tableaux et dans les notes techniques à la fin du chapitre I.

Population, rate of increase, birth and death rates, surface area and density [*cont.*]

Population, taux d'accroissement, taux de natalité et taux de mortalité, superficie et densité [*suite*]

Source:

United Nations Division, New York, "Demographic Yearbook 2000" and the demographic statistics database.

- 1 Population per square kilometre of surface area. Figures are merely the quotients of population divided by surface area and are not to be considered as either reflecting density in the urban sense or as indicating the supporting power of a territory's land and resources.
- 2 Hawaii, a state of the United States of America, is included in Northern America rather than Oceania.
- 3 The European portion of Turkey is included in Western Asia rather than Europe.

Source:

Organisation des Nations Unies, Division de statistique, New York, "Annuaire démographique 2000" et la base de données pour les statistiques démographiques.

- 1 Habitants per kilomètre carré. Il s'agit simplement du quotient calculé en divisant la population par la superficie et n'est pas considéré comme indiquant la densité au sens urbain du mot ni l'effectif de population que les terres et les ressources du territoire sont capables de nourrir.
- 2 Hawaii, un Etat des Etats-Unis d'Amérique, est compris en Amérique septentrionale plutôt qu'en Océanie.
- 3 La partie européenne de la Turquie est comprise en Asie Occidentale plutôt qu'en Europe.

- 1 Northern America (Canada and the United States), Europe, Australia, Israel, Japan, New Zealand and South Africa.
- 2 Latin America and the Caribbean, Africa (excluding South Africa), Asia (excluding Israel and Japan), Oceania (excluding Australia and New Zealand).
- 3 Canada and the United States only.
- 4 Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden and the United Kingdom.

- 1 Amérique septentrionale (le Canada et les États-Unis), Europe, l'Australie, l'Israël, la Nouvelle-Zélande et l'Afrique du Sud.
- 2 Amérique latine et Caraïbes, Afrique (non compris l'Afrique du Sud), Asie (non compris l'Israël et le Japon), Océanie (non compris l'Australie et la Nouvelle-Zélande).
- 3 Le Canada et les États-Unis seulement.
- 4 L'Autriche, la Belgique, le Danemark, la Finlande, la France, l'Allemagne, la Grèce, l'Irlande, l'Italie, le Luxembourg, les Pays-Bas, le Portugal, l'Espagne, la Suède et le Royaume-Uni.

Table 6 follows overleaf

Le tableau 6 est présenté au verso

6

Production, trade and consumption of commercial energy

Thousand metric tons of oil equivalent and kilograms per capita

Production, commerce et consommation d'énergie commerciale

Milliers de tonnes d'équivalent pétrole et kilogrammes par habitant

| Regions | Year | Primary energy production – Production d'énergie primaire | | | | | Changes in stocks | | Imports Importations | Exports Exportations |
|----------------|------|---|-------------------|---------------------|------------|----------------------------|--------------------------|-----------|-------------------------|-------------------------|
| | | Total | Solids Solides | Liquids Liquides | Gas Gaz | Electricity Électricité | Variations des stocks | | | |

+ Pour les Etats membres de ce groupement, voir annexe I – Autres groupements.

1 The regional analysis in this table is in accordance with the groupings of countries or areas specified in table 69.

2 Quantum indices are derived from value data and unit value indices. They are base period weighted.

1 L'analyse régionale dans ce tableau est conforme aux groupes des pays ou zones paraissant dans le tableau 69.

2 Les indices du quantum sont calculés à partir des chiffres de la valeur et des indices de valeur unitaire. Ils sont à coefficients de pondération correspondant à la période en base.

3 Regional aggregates are current period weighted.

3 Les totaux régionaux sont à coefficients de pondération correspondant à la période en cours.

4 This classification is intended for statistical convenience and does not necessarily express a judgement about the stage reached by a particular country in the development process.

4 Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stage de développement auquel est parvenu un pays donné.

5 Unit value index of exports divided by unit value index of imports.

5 Indices de la valeur unitaire des exportations divisé par l'indice de la valeur unitaire des importations.

6 Beginning 1 January 1998, data refer to South Africa only. Prior to January 1998, data refer to South African Common Customs Area.

6 A compter de janvier 1998, les données se rapportent qu'à l'Afrique du Sud. Avant janvier 1998, les données se rapportent à l'Union Douanière de l'Afrique

7

Total exports and imports: index numbers

Quantum and unit value indices and terms of trade (1990 = 100)

Exportations et importations totales: indices

Indices du quantum et de la valeur unitaire et termes de l'échange (1990 = 100)

- 7 Indices, except those for Europe, are based on estimates prepared by the International Monetary Fund.
- 8 Beginning 1 January 1992, data refer to the Federal Republic of Yugoslavia. Prior to that date, data refer to the Socialist Federal Republic of Yugoslavia.

méridionale.

- 7 Le calcul des indices, sauf ceux pour l'Europe, sont basés sur les estimations préparées par le Fonds monétaire international.
- 8 A partir de 1er janvier 1992 les données se rapportent à la République fédérative de Yougoslavie. Avant cette date les données se rapportent à la République socialiste fédérative de Yougoslavie.

Technical notes, tables 1-7

Table 1: The series of world aggregates on population, production, transport, external trade and finance have been compiled from statistical publications and databases of the United Nations and the specialized agencies and other institutions [1, 6, 7, 8, 9, 15, 22, 23, 24, 25]. These sources should be consulted for details on compilation and coverage.

Table 2 presents estimates of population size, rates of population increase, crude birth and death rates, surface area and population density for the world and regions. Unless otherwise specified, all figures are estimates of the order of magnitude and are subject to a substantial margin of error.

The population estimates and rates presented in this table were prepared by the Population Division of the United Nations Secretariat and published in *World Population Prospects: 2000 Revision* [29].

The average annual percentage rates of population growth were calculated by the Population Division of the United Nations Secretariat, using an exponential rate of increase formula.

Crude birth and crude death rates are expressed in terms of the average annual number of births and deaths respectively, per 1,000 mid-year population. These rates are estimated.

Surface area totals were obtained by summing the figures for the individual countries or areas.

Density is the number of persons in the 2000 total population per square kilometre of total surface area.

The scheme of regionalization used for the purpose of making these estimates is presented in annex I. Although some continental totals are given, and all can be derived, the basic scheme presents eight macro regions that are so drawn as to obtain greater homogeneity in sizes of population, types of demographic circumstances and accuracy of demographic statistics.

Tables 3-4: The index numbers in table 3 refer to agricultural production, which is defined to include both crop and livestock products. Seeds and feed are excluded. The index numbers of food refer to commodities which are considered edible and contain nutrients. Coffee, tea and other inedible commodities are excluded.

The index numbers of total agricultural and food production in table 3 are calculated by the Laspeyres formula with the base year period 1989-1991. The latter is provided in order to diminish the impact of annual fluctuations in agricultural output during base years on the indices for the period. Production quantities of each commodity are weighted by 1989-1991 average national producer prices and summed for each year. The index numbers are based on production data for a calendar year.

Notes techniques, tableaux 1 à 7

Tableau 1: Les séries d'agrégats mondiaux sur la population, la production, les transports, le commerce extérieur et les finances ont été établies à partir de publications statistiques et bases de données des Nations Unies et les institutions spécialisées et autres organismes [1, 6, 7, 8, 9, 15, 22, 23, 24, 25]. On doit se référer à ces sources pour tous renseignements détaillés sur les méthodes de calcul et la portée des statistiques.

Le *Tableau 2* présente les estimations mondiales et régionales de la population, des taux d'accroissement de la population, des taux bruts de natalité et de mortalité, de la superficie et de la densité de population. Sauf indication contraire, tous les chiffres sont des estimations de l'ordre de grandeur et comportent une assez grande marge d'erreur.

Les estimations de la population et tous les taux présentés dans ce tableau ont été établis par la Division de la population du Secrétariat des Nations Unies et publiés dans "*World Population Prospects: 2000 Revision*" [29].

Les pourcentages annuels moyens de l'accroissement de la population ont été calculés par la Division de la population du Secrétariat des Nations Unies, sur la base d'une formule de taux d'accroissement exponentiel.

Les taux bruts de natalité et de mortalité sont exprimés, respectivement, sur la base du nombre annuel moyen de naissances et de décès par tranche de 1.000 habitants au milieu de l'année. Ces taux sont estimatifs.

On a déterminé les superficies totales en additionnant les chiffres correspondant aux différents pays ou régions.

La densité est le nombre de personnes de la population totale de 2000 par kilomètre carré de la superficie totale.

Le schéma de régionalisation utilisé aux fins de l'établissement de ces estimations est présenté dans l'annexe I. Bien que les totaux de certains continents soient donnés et que tous puissent être déterminés, le schéma de base présente huit grandes régions qui sont établies de manière à obtenir une plus grande homogénéité en ce qui concerne l'ampleur des populations, les types de conditions démographiques et la précision des statistiques démographiques.

Tableaux 3-4: Les indices du tableau 3 se rapportent à la production agricole, qui est définie comme comprenant à la fois les produits de l'agriculture et de l'élevage. Les semences et les aliments pour les animaux sont exclus de cette définition. Les indices de la production alimentaire se rapportent aux produits considérés comme

As in the past, the series include a large number of estimates made by FAO in cases where figures are not available from official country sources.

Index numbers for the world and regions are computed in a similar way to the country index numbers except that instead of using different commodity prices for each country group, "international commodity prices" derived from the Gheary-Khamis formula are used for all country groupings. This method assigns a single "price" to each commodity.

The indexes in table 4 are calculated as a ratio between the index numbers of total agricultural and food production in table 3 described above and the corresponding index numbers of population.

For further information on the series presented in these tables, see the FAO *Production Yearbook* [6] and <www.fao.org>.

Table 5: The index numbers of industrial production are classified according to tabulation categories, divisions and combinations of divisions of the International Standard Industrial Classification of All Economic Activities, Revision 3, (ISIC Rev. 3) [50] for mining (category C), manufacturing (category D), and electricity, gas and water (category E).

The indices indicate trends in value added in constant US dollars. The measure of value added used is the national accounts concept, which is defined as gross output less the cost of materials, supplies, fuel and electricity consumed and services received.

Each series is compiled using the Laspeyres formula, that is, the indices are base-weighted arithmetic means. The weight base year is 1995 and value added, generally at factor values, is used in weighting.

For most countries the estimates of value added used as weights are derived from the results of national industrial censuses or similar inquiries relating to 1995. These data, in national currency, are adjusted to the ISIC where necessary and are subsequently converted into US dollars.

Within each of the ISIC categories (tabulation categories, divisions and combinations of divisions) shown in the tables, the indices for the country aggregations (regions or economic groupings) are calculated directly from the country data. The indices for the World, however, are calculated from the aggregated indices for the groupings of developed and developing countries.

China and the countries of the former USSR (except Russian Federation and Ukraine) are excluded from their respective regions.

Table 6: For a description of the series in table 6, see the technical notes to chapter XIII.

comestibles et contenant des éléments nutritifs. Le café, le thé et les produits non comestibles sont exclus.

Les indices de la production agricole et de la production alimentaire présentés au tableau 3 sont calculés selon la formule de Laspeyres avec les années 1989-1991 comme période de référence, cela afin de limiter l'incidence, sur les indices correspondant à la période considérée, des fluctuations annuelles de la production agricole enregistrée pendant les années de référence. Les chiffres de production de chaque produit sont pondérés par les prix nationaux moyens à la production pour la période 1989-1991 et additionnés pour chaque année. Les indices sont fondés sur les données de production de l'année civile. Comme dans le passé, les séries comprennent un grand nombre d'estimations établies par la FAO lorsqu'elle n'avait pu obtenir de chiffres de sources officielles dans les pays eux-mêmes.

Les indices pour le monde et les régions sont calculés de la même façon que les indices par pays, mais au lieu d'appliquer des prix différents aux produits de base pour chaque groupe de pays, on a utilisé des "prix internationaux" établis d'après la formule de Gheary-Khamis pour tous les groupes de pays. Cette méthode attribue un seul "prix" à chaque produit de base.

Les indices du tableau 4 sont calculés comme ratio entre les indices de la production alimentaire et de la production agricole totale du tableau 3 décrits ci-dessus et les indices de population correspondants.

Pour tout renseignement complémentaire sur les séries présentées dans ces tableaux, voir l'*Annuaire FAO de la production* [6] et <www.fao.org>.

Tableau 5: Les indices de la production industrielle sont classés selon les catégories de classement, les divisions ou des combinaisons des divisions de la Classification Internationale type, par industrie, de toutes les branches d'activité économique, Révision 3 (CITI Rev. 3) [50] qui concernent les industries extractives (la catégorie C) et les industries manufacturières (la catégorie D), ainsi que l'électricité, le gaz et l'eau (la catégorie E).

Ces indices représentent les tendances de la valeur ajoutée en dollars constants des Etats-Unis. La mesure utilisée pour la valeur ajoutée correspond à celle qui est appliquée aux fins de la comptabilité nationale, c'est-à-dire égale à la valeur de la production brute diminuée des coûts des matériaux, des fournitures, de la consommation de carburant et d'électricité ainsi que des services reçus.

Chaque série a été établie au moyen de la formule de Laspeyres, ce qui signifie que les indices sont des moyennes arithmétiques affectées de coefficients de pondération. L'année de base de pondération est l'année 1995 et on utilise généralement pour la pondération la valeur ajoutée aux coûts des facteurs.

Table 7: For a description of the series in table 7, see the technical notes to chapter XVI. The composition of the regions is presented in table 74.

Pour la plupart des pays, les estimations de la valeur ajoutée qui sont utilisées comme coefficients de pondération sont tirées des résultats des recensements industriels nationaux ou enquêtes analogues concernant l'année 1995. Ces données, en monnaie nationale, sont ajustées s'il y a lieu aux normes de la CITI et ultérieurement converties en dollars des Etats-Unis.

A l'intérieur de chacune des subdivisions de la CITI (catégories de classement, divisions et combinaisons des divisions) indiquées dans les tableaux, les indices relatifs aux assemblages de pays (régions géographiques ou groupements économiques) sont calculés directement à partir des données des pays. Toutefois, les indices concernant le *Monde* sont calculés à partir des indices agrégés applicables aux groupements de pays développés et de pays en développement.

La Chine et les pays de l'ancienne URSS (sauf la Fédération de Russie et Ukraine) sont exclus de leurs régions respectives.

Tableau 6: On trouvera une description de la série de statistiques du tableau 6 dans les notes techniques du chapitre XIII.

Tableau 7: On trouvera une description de la série de statistiques du tableau 7 dans les notes techniques du chapitre XVI. La composition des régions est présentée au tableau 74.

Part Two **Population and Social Statistics**

- Chapter II**
Population (table 8)
- Chapter III**
Education and literacy (tables 9 and 10)
- Chapter IV**
Health and nutrition (tables 11 and 12)
- Chapter V**
Culture and communication
(tables 13-19)

Part Two of the *Yearbook* presents statistical series on a wide range of population and social topics for all countries or areas of the world for which data have been made available. The topics include population and population growth, surface area and density; education and the illiterate population; AIDS cases; food supply; book production; newspapers and periodicals; cinemas; telephones; and Internet users.

Deuxième partie **Population et statistiques sociales**

- Chapitre II**
Population (tableau 8)
- Chapitre III**
Instruction et alphabétisation (tableaux 9 et 10)
- Chapitre IV**
Santé et nutrition (tableaux 11 et 12)
- Chapitre V**
Culture et communication
(tableaux 13 à 19)

La deuxième partie de l'*Annuaire* présente, pour tous les pays ou zones du monde pour lesquels des données sont disponibles, des séries statistiques intéressant une large gamme de questions démographiques et sociales: population et croissance démographique, superficie et densité; l' instruction et la population analphabète; cas de SIDA; disponibilités alimentaires; production de livres; journaux et périodiques; cinémas; téléphones; et usagers d'Internet.

statistiques démographiques.

* Provisional.

x Estimates for 1995–2000 prepared by the Population Division of the United Nations.

1 Population per square kilometre of surface area in 2000. Figures are merely the quotients of population divided by surface area and are not to be considered either as reflecting density in the urban sense or as indicating the supporting power of a territory's land and resources.

2 De jure population.

3 Including the enclave of Cabinda.

4 Rate not computed because of apparent lack of comparability between estimates shown for 1995 and 2000.

5 Census results have been adjusted for under-enumeration estimated at 1.4 per cent.

6 Census results, excluding Mayotte.

7 Comprising Bioko (which includes Pagalu) and Rio Muni (which includes Corisco and Elobays).

8 Mid-year estimates have been adjusted for under-enumeration. Census data have not been adjusted for this under-enumeration.

9 Census results for de jure population.

10 Including nomads, estimated at 224 095.

* Données provisoires.

x Estimations pour 1995–2000 établies par la Division de la population de l'Organisation des Nations Unies.

1 Nombre d'habitants au kilomètre carré en 2000. Il s'agit simplement du quotient du chiffre de la population divisé par celui de la superficie: il ne faut pas y voir d'indication de la densité au sens urbain du terme ni de l'effectif de population que les terres et les ressources du territoire sont capables de nourrir.

2 Population de droit.

3 Y compris l'enclave de Cabinda.

4 On n'a pas calculé le taux parce que les estimations pour 1995 et 2000 ne paraissent pas comparables.

5 Les résultats du recensement ont été ajustés pour compenser les lacunes du dénombrement estimées à 1,4 p. 100.

6 Les résultats du recensement, non compris Mayotte.

7 Comprend Bioko (qui comprend Pagalu) et Rio Muni (qui comprend Corisco et Elobays).

8 Les estimations au milieu de l'année tiennent compte d'un ajustement destiné à compenser les lacunes du dénombrement. Les données de recensement ne tiennent pas compte de cet ajustement.

9 Les résultats du recensement. Population de droit.

10 Y compris les nomades, estimées à 224 095.

- 35 Census results, excluding data for Jordanian territory under occupation since June 1967 by Israeli military forces. 35 Les résultats du recensement, non compris les données pour le territoire jordanien occupé depuis juin 1967 par les forces armées israéliennes.
- 36 Excluding alien armed forces, civilian aliens employed by armed forces, foreign diplomatic personnel and their dependants and Korean diplomatic personnel and their dependants outside the country. 36 Non compris les militaires étrangers, les civils étrangers employés par les forces armées, le personnel diplomatique étranger et les membres de leur famille les accompagnant et le personnel diplomatique coréen hors du pays et les membres de leur familles les accompagnant.
- 37 Based on results of sample survey. 37 D'après les résultats d'une enquête par sondage.
- 38 Excluding Palestinian refugees in camps. 38 Non compris les réfugiés de Palestine dans les camps.
- 39 The figures were received from the Palestinian Authority and refer to the Palestinian population. 39 Les chiffres sont fournis par l'autorité palestinienne et comprennent la population palestinienne.
- 40 Census results exclude an estimate for under-enumeration estimated at 2.4 per cent. 40 Les résultats du recensement n'ont pas été ajustés pour compenser les lacunes de dénombrement, estimées à 2,4 p. 100.
- 41 Excluding data for Jammu and Kashmir, the final status of which has not yet been determined, Junagardh, Manavadar, Gilgit and Baltistan. 41 Non compris les données pour le Jammu et le Cachemire, dont le statut définitif n'a pas encore été déterminé, le Junagardh, la Manavadar, le Gilgit et le Baltistan.
- 42 Census results, excluding transients afloat and non-locally domiciled military and civilian services personnel and their dependants and visitors. 42 Les résultats du recensement, non compris les personnes de passage à bord de navires, les militaires et agents civils non résidents et les membres de leur famille les accompagnant, et les visiteurs.
- 43 Including Palestinian refugees. 43 Y compris les réfugiés de Palestine.
- 44 Comprising 7 sheikhdoms of Abu Dhabi, Dubai, Sharjah, Ajman, Umm al Qaiwain, Ras al Khaimah and Fujairah, and the area lying within the modified Riyadh line as announced in October 1955. 44 Comprend les sept cheikhats de Abu Dhabi, Dabai, Ghârdja, Adjman, Oumm-al-Quiwain, Ras al Khaïma et Foudjaira, ainsi que la zone délimitée par la ligne de Riad modifiée comme il a été annoncé en octobre 1955.
- 45 Excluding Faeroe Islands and Greenland. 45 Non compris les îles Féroé et le Groenland.
- 46 Excluding Overseas Departments, namely French Guiana, Guadeloupe, Martinique and Réunion, shown separately. De jure population, but excluding diplomatic personnel outside the country and including foreign diplomatic personnel not living in embassies or consulates. 46 Non compris les départements d'outre-mer, c'est-à-dire la Guyane française, la Guadeloupe, la Martinique et la Réunion, qui font l'objet de rubriques distinctes. Population de droit, non compris le personnel diplomatique hors du pays et y compris le personnel diplomatique étranger qui ne vivent pas dans les ambassades ou les consulats.
- 47 For 1990 census, excluding military personnel stationed outside the country who do not have a personal residence in France. 47 Les données pour le recensement de 1990, non compris les militaires en garnison hors du pays et sans résidence personnelle en France.
- 48 All data shown pertaining to Germany prior to 3 October 1990 are indicated separately for the Federal Republic of Germany and the former German Democratic Republic based on their respective territories at the time indicated. 48 Toutes les données se rapportant à l'Allemagne avant le 3 octobre 1990 figurent dans deux rubriques séparées basées sur les territoires respectifs de la République fédérale d'Allemagne et l'ancienne République démocratique allemande selon la période indiquée.
- 49 Excluding armed forces. 49 Non compris les militaires.
- 50 Census results, include armed forces stationed outside the country, but excluding alien armed forces stationed in the area. 50 Les résultats du recensement, y compris les militaires en garnison hors du pays, mais non compris les militaires étrangers en garnison sur le territoire.
- 51 Mid-year population excludes armed forces stationed outside the country, but includes alien armed forces stationed in the area. 51 Les estimations au milieu de l'année non compris les militaires en garnison hors du pays, mais y compris les militaires étrangers en garnison sur le territoire.
- 52 Data refer to the Vatican City State. 52 Les données se rapportent à l'Etat de la Cité du Vatican.
- 53 Including civilian nationals temporarily outside the country. 53 Y compris les civils nationaux temporairement hors du pays.
- 54 Including Gozo and Comino Islands. 54 Y compris les îles de Gozo et de Comino.
- 55 Census results, based on compilation of continuous accounting and sample surveys. 55 Les résultats du recensement, d'après les résultats des dénombrements et enquêtes par sondage continue.
- 56 Excluding civilian aliens within the country, but including civilian nationals temporarily outside the country. 56 Non compris les civils étrangers dans le pays, mais y compris les civils nationaux temporairement hors du pays.
- 57 Including the Azores and Madeira Islands. 57 Y compris les Açores et Madère.
- 58 Including the Balearic and Canary Islands, and Alhucemas, Ceuta, Chafarinas, Melilla and Penon de Vélez de la Gomera. 58 Y compris les Baléares et les Canaries, Al Hoceïma, Ceuta, les îles Zaffarines, Melilla et Penon de Vélez de la Gomera.
- 59 Inhabited only during the winter season. Census data are for total et 722 687 au 31 mai 1967. 59 N'est habitée que pendant la saison d'hiver. Les données de

Population by sex, rate of population increase, surface area and density [cont.]
 Population selon le sexe, taux d'accroissement de la population,
 superficie et densité [suite]

- population while estimates refer to Norwegian population only. Included also in the de jure population of Norway.
- 60 Excluding Channel Islands and Isle of Man, shown separately.
- 61 Excluding Niue, shown separately, which is part of Cook Islands, but because of remoteness is administered separately.
- 62 Comprising Austral, Gambier, Marquesas, Rapa, Society and Tuamotu Islands.
- 63 Including Christmas, Fanning, Ocean and Washington Islands.
- 64 Including the islands of Huon, Chesterfield, Loyalty, Walpole and Belep Archipelago.
- 65 Including Campbell and Kermadec Islands (population 20 in 1961, surface area 148 km²) as well as Antipodes, Auckland, Bounty, Snares, Solander and Three Kings island, all of which are uninhabited. Excluding diplomatic personnel and armed forces outside the country, the latter numbering 1 936 at 1966 census; also excluding alien armed forces within the country.
- 66 Comprising eastern part of New Guinea, the Bismarck Archipelago, Bougainville and Buka of Solomon Islands group and about 600 smaller islands.
- 67 Comprising the Solomon Islands group (except Bougainville and Buka which are included with Papua New Guinea shown separately), Ontong, Java, Rennel and Santa Cruz Islands.
- recensement se rapportent à la population totale, mais les estimations ne concernent que la population norvégienne, comprise également dans la population de droit de la Norvège.
- 60 Non compris les îles Anglo-Normandes et l'île de Man, qui font l'objet de rubriques distinctes.
- 61 Non compris Nioué, qui fait l'objet d'une rubrique distincte et qui fait partie des îles Cook, mais qui, en raison de son éloignement, est administrée séparément.
- 62 Comprend les îles Australes, Gambier, Marquises, Rapa, de la Société et Tuamotou.
- 63 Y compris les îles Christmas, Fanning, Océan et Washington.
- 64 Y compris les îles Huon, Chesterfield, Loyauté et Walpole, et l'archipel Belep.
- 65 Y compris les îles Campbell et Kermadec (20 habitants en 1961, superficie: 148 km²) ainsi que les îles Antipodes, Auckland, Bounty, Snares, Solander et Three Kings, qui sont toutes inhabitées. Non compris les personnel diplomatique et les militaires hors du pays, ces derniers au nombre de 1 936 au recensement de 1966; non compris également les militaires étrangers dans le pays.
- 66 Comprend l'est de la Nouvelle-Guinée, l'archipel Bismarck, Bougainville et Buka (ces deux dernières du group des Salomon) et environ 600 îlots.
- 67 Comprend les îles Salomon (à l'exception de Bougainville et de Buka dont la population est comprise dans celle de Papouasie - Nouvelle Guinée qui font l'objet d'une rubrique distincte), ainsi que les îles Ontong, Java, Rennel et Santa Cruz.

Technical notes, table 8

Table 8 is based on detailed data on population and its growth and distribution published in the United Nations *Demographic Yearbook* [22], which also provides a comprehensive description of methods of evaluation and limitations of the data.

Unless otherwise indicated, figures refer to de facto (present-in-area) population for the present territory; surface area estimates include inland waters.

Notes techniques, tableau 8

Le *tableau 8* est fondé sur des données détaillées sur la population, sa croissance et sa distribution, publiées dans l'*Annuaire démographique* des Nations Unies [22], qui offre également une description complète des méthodes d'évaluation et une indication des limites des données.

Sauf indication contraire, les chiffres se rapportent à la population effectivement présente sur le territoire tel qu'il est actuellement défini; les estimations de superficie comprennent les étendues d'eau intérieures.

Technical notes, tables 9 and 10

Detailed data and explanatory notes on education and literacy can be found on the UNESCO Institute for Statistics website <www.uis.unesco.org> and in the *UNESCO Statistical Yearbook* [31]. Brief notes which pertain to the statistical information shown in the tables in this chapter are given below.

Table 9: The definitions and classifications applied by UNESCO are those set out in the *Revised Recommendation concerning the International Standardization of Education Statistics* (1978) and the 1976 and 1997 versions of the *International Standard Classification of Education* (ISCED). Data are presented in Table 9 according to the revised terminology of the ISCED-97.

According to the ISCED, these educational levels are defined as follows:

Primary education (ISCED level 1), of which the main function is to provide the basic elements of education at such establishments as elementary schools or primary schools.

Secondary education (ISCED levels 2 and 3), providing general and/or specialized instruction at middle schools, secondary schools, high schools, teaching training schools and schools of a vocational or technical nature.

Tertiary education (ISCED levels 5, 6 and 7) provided at universities, teachers' colleges, and higher professional schools, which requires, as a minimum condition of admission, the successful completion of secondary education or evidence of the attainment of an equivalent level of knowledge.

The ISCED-97 also introduces a new category or level between upper secondary and tertiary education called post-secondary non-tertiary education (ISCED level 4). Beginning 1997, this level is included in secondary education in Table 9 for those countries footnoted accordingly. It is assumed that the programmes which countries now report separately to UNESCO as post-secondary non-tertiary have also been reported in the past, in either secondary or tertiary education depending on the country. These programmes typically fall into two categories: (a) second cycle programmes at upper secondary and (b) access or foundation programmes for entry to tertiary programmes. Countries with type (a) programmes will typically have reported them in the past as secondary programmes whilst countries with type (b) programmes will more often have reported them as tertiary in the past. Some countries will have both types of programmes.

In general, the statistics shown in Table 9 refer to both public and private education. Since 1994, special needs education is, in principle, included in the statistics reported.

Notes techniques, tableaux 9 et 10

On trouvera des données détaillées et des notes explicatives sur l'instruction et l'alphabétisation sur le site Web de l'Institut de statistique de l'UNESCO <www.uis.unesco.org> et dans l'*Annuaire statistique de l'UNESCO* [31]. Ci-après figurent des notes sommaires, relatives aux principaux éléments d'information statistique figurant dans les tableaux.

Tableau 9: Les définitions et classifications appliquées par l'UNESCO sont tirées de la *Recommandation révisée concernant la normalisation internationale des statistiques de l'éducation* (1978) et des versions de 1976 et de 1997 de la *Classification internationale type de l'éducation* (CITE). La terminologie utilisée dans le tableau 9 est celle de la CITE-1997.

Dans la CITE, les niveaux d'enseignement sont définis comme suit:

Enseignement primaire (niveau 1 de la CITE), dispensé par exemple dans les écoles élémentaires ou les écoles primaires, et dont la fonction principale est de fournir un enseignement de base.

Enseignement secondaire (niveaux 2 et 3 de la CITE), dispensé par exemple dans les écoles moyennes, les écoles secondaires, les lycées, les collèges, les écoles de formation des maîtres et les écoles professionnelles ou techniques.

Enseignement supérieur (niveaux 5, 6 et 7 de la CITE), dispensé par exemple dans les universités, les établissements d'enseignement pédagogique et d'enseignement spécialisé, exigeant comme condition minimale d'admission d'avoir achevé avec succès des études secondaires ou de faire preuve de connaissances équivalentes.

La CITE de 1997 introduit également une catégorie nouvelle, à savoir un niveau intermédiaire entre le deuxième cycle de l'enseignement secondaire et l'enseignement supérieur, appelé "enseignement post secondaire qui n'est pas du supérieur" (niveau 4 de la CITE). À compter de 1997, dans le tableau 9, pour les pays marqués d'une note à cet effet, ce niveau est inclus dans l'enseignement secondaire. On suppose que les programmes que les pays signalent désormais à l'UNESCO comme programmes d'enseignement post secondaire qui n'est pas du supérieur l'étaient par le passé comme programmes d'enseignement soit secondaire soit supérieur selon le pays. Ils relèvent généralement de l'une ou l'autre des deux catégories suivantes: (a) programmes de deuxième cycle du secondaire, et (b) cours de base ou de transition préparant à l'enseignement supérieur. Les pays où ces programmes relèvent du type (a) les auront normalement inclus dans l'enseignement secondaire avant 1997, les pays où ils

Table 10: Data on the illiterate population by sex refer to the population 15 years of age and over. The ability to both read and write, with understanding, a simple sentence on everyday life is used as the criterion of literacy; hence semi-literates (persons who can read but not write) are included with illiterates. Persons for whom literacy is not known are excluded from calculations; consequently the percentage of illiteracy for a given country is based on the number of reported illiterates, divided by the total number of reported literates and illiterates.

The data shown in the table are the estimates and projections of UNESCO from the July 2002 assessment.

relèvent du type (b) les auront souvent inclus dans l'enseignement supérieur. Dans certains pays, il y a des programmes de niveau 4 relevant de l'un et de l'autre type.

En règle générale, les statistiques du tableau 9 portent sur l'enseignement public et privé. Depuis 1994, l'éducation répondant à des besoins spéciaux est en principe incluse dans les statistiques communiquées par les pays.

Tableau 10: Les données sur la population analphabète selon le sexe se réfèrent à la population âgée de 15 ans et plus. On utilise l'aptitude à lire et à écrire, en le comprenant, une phrase simple sur la vie quotidienne comme critère d'alphabétisme; par conséquent, les semi-alphabètes (c'est-à-dire les personnes qui savent lire, mais non écrire) sont assimilés aux analphabètes. Les personnes dont on ne sait pas si elles savent lire ou écrire sont exclues de ces calculs; par conséquent, le pourcentage d'alphabétisme d'un pays donné est fondé sur le nombre d'alphabètes connus divisé par le total des alphabètes et analphabètes connus.

Les données présentées sont les estimations et projections de l'UNESCO, révisées en juillet 2002.

11 HIV/AIDS epidemic: estimates of the number of people living with HIV/AIDS, people newly infected with HIV, AIDS deaths and reported AIDS cases

Source:

Joint United Nations Programme on HIV/AIDS (UNAIDS) and World Health Organization (WHO), Geneva, "Aids epidemic update: December 2002" and the UNAIDS/WHO HIV/AIDS database.

1 Total includes AIDS cases with unreported year of diagnosis.

2 Cumulative number of cases reported from 1979 to 1992. Excludes cases for which the year of diagnosis is unknown.

Source:

Programme commun des Nations Unies sur le VIH/SIDA (ONUSIDA) et l'Organisation mondiale de la santé (OMS), Genève, "Le point sur l'épidémie de SIDA: décembre 2002" et la base de données sur le VIH et le SIDA de l'ONUSIDA/OMS.

1 Y compris les cas de SIDA pour lesquels l'année de diagnostic n'a pas été précisée.

2 Chiffre cumulé du nombre total de cas de SIDA déclarés entre 1979 et 1992. Non compris les cas de SIDA pour lesquels l'année de diagnostic n'a pas été précisée.

Technical notes, tables 11 and 12

Table 11: Data on acquired immunodeficiency syndrome (AIDS) have been compiled and estimated by the Joint United Nations Programme on HIV/AIDS (UNAIDS) and the World Health Organization (WHO). UNAIDS is composed of the United Nations Children's Fund, the United Nations Development Programme, the United Nations Population Fund, the United Nations International Drug Control Programme, the United Nations Educational, Scientific and Cultural Organization, the World Health Organization and the World Bank. Data are published in the *AIDS epidemic update* [34] and UNAID'S Web site <www.unaids.org>.

Table 12: Estimates on food supply are published by the Food and Agriculture Organization of the United Nations in *Food Balance Sheets* [5] and on its Web site <www.fao.org>, in which the data give estimates of total and per caput food supplies per day available for human consumption during the reference period in terms of quantity and, by applying appropriate food composition factors for all primary and processed products, also in terms of caloric value and protein and fat content. Calorie supplies are reported in kilocalories. The traditional unit of calories is being retained for the time being until the proposed kilojoule gains wider acceptance and understanding (1 calorie = 4.19 kilojoules). Per caput supplies in terms of product weight are derived from the total supplies available for human consumption (i.e. Food) by dividing the quantities of Food by the total population actually partaking of the food supplies during the reference period, i.e. the present in-area (de facto) population within the present geographical boundaries of the country. In other words, nationals living abroad during the reference period are excluded, but foreigners living in the country are included. Adjustments are made wherever possible for part-time presence or absence, such as temporary migrants, tourists and refugees supported by special schemes (if it has not been possible to allow for the amounts provided by such schemes under imports). In almost all cases, the population figures used are the mid-year estimates published by the United Nations Population Division.

Per caput supply figures shown in the commodity balances therefore represent only the average supply available for the population as a whole and do not necessarily indicate what is actually consumed by individuals. Even if they are taken as an approximation of per caput consumption, it is important to bear in mind that there could be considerable variation in consumption between individuals.

Notes techniques, tableaux 11 et 12

Tableau 11: Les données sur le syndrome d'immunodéficience acquise (SIDA) ont été compilées et estimées par le Programme commun des Nations Unies sur le VIH/SIDA (ONUSIDA) et l'Organisation mondiale de la santé (OMS). L'ONUSIDA se compose du Fonds des Nations Unies pour l'enfance, du Programme des Nations Unies pour le développement, du Fonds des Nations Unies pour la population, du Programme des Nations Unies pour le contrôle international des drogues, de l'Organisation des Nations pour l'éducation, la science et la culture, de l'Organisation mondiale de la santé et de la Banque mondiale. Les données sont publiées dans "*AIDS epidemic update*" [34] et sur le site Web de l'ONUSIDA <www.unaids.org>.

Tableau 12: Les estimations sur les disponibilités alimentaires sont publiées par l'Organisation des Nations Unies pour l'alimentation et l'agriculture dans les *Bilans alimentaires* [5] et sur le site Web <www.fao.org> où les données donnent des estimations des disponibilités alimentaires totales et par habitant par jour pour la consommation humaine durant la période de référence, en quantité, en calories, en protéines et en lipides. Les calories sont exprimées en kilocalories. L'unité traditionnelle pour les calories n'est pas utilisée pour l'instant jusqu'à ce que le kilojoule soit plus largement accepté (1 calorie = 4,19 kilojoules). Les disponibilités par habitant exprimées en poids du produit sont calculées à partir des disponibilités totales pour la consommation humaine (c'est-à-dire "Alimentation humaine") en divisant ce chiffre par la population totale qui a effectivement eu accès aux approvisionnements alimentaires durant la période de référence, c'est-à-dire par la population présente (de facto) dans les limites géographiques actuelles du pays. En d'autres termes, les ressortissants du pays vivant à l'étranger durant la période de référence sont exclus, mais les étrangers vivant dans le pays sont inclus. Des ajustements ont été opérés chaque fois que possible pour tenir compte des présences ou des absences de durée limitée, comme dans le cas des immigrants/émigrants temporaires, des touristes et des réfugiés bénéficiant de programmes alimentaires spéciaux (s'il n'a pas été possible de tenir compte des vivres fournis à ce titre à travers les importations). Dans la plupart des cas, les données démographiques utilisés sont les estimations au milieu de l'année publiées par la Division de la population des Nations Unies.

Les disponibilités alimentaires par habitant figurant dans les bilans ne représentent donc que les disponibilités moyennes pour l'ensemble de la population et n'indiquent pas nécessairement la consommation effective des individus. Même si elles sont considérées comme une estimation approximative de la consommation par habitant, il importe de ne pas oublier que la consommation peut varier beaucoup selon les individus.

United Nations Educational, Scientific and Cultural Organization (UNESCO) Institute for Statistics, Montreal, the UNESCO statistics database.

† Data prior to 1997 may not be comparable to data for later years due to UNESCO's use of different sources.

1 Data do not include non-dailies issued 2 or 3 times a week.

2 Data on non-dailies include daily newspapers.

3 Data refer to regional/local non-dailies only.

4 Includes Sunday issues.

5 Data include regional editions.

6 Data do not include non-members of the Finnish Newspaper Association (non members: 13 non-dailies in 1999 and 9 in 2000).

7 Data refer to newspapers published 1 to 3 times a week.

8 Data do not include Sunday issues

9 Data refer to weekly newspapers only.

Source:

L'Institut de statistique de l'Organisation des Nations Unies pour l'éducation, la science et la culture (UNESCO), Montréal, la base de données de l'UNESCO.

† Les données antérieures à 1997 peuvent n'être pas comparables à celles des années suivantes, l'UNESCO ayant utilisé des sources différentes.

1 Les données n'incluent pas les parutions non-quotidiennes publiées 2 à 3 fois par semaine.

2 Les données relatives aux journaux non-quotidiens comprennent les journaux quotidiens.

3 Les données se réfèrent aux journaux non-quotidiens régionaux/ locaux seulement.

4 Inclut les parutions du dimanche.

5 Les données comprennent les éditions régionales.

6 Les données n'incluent pas les non-membres de l'Association finnoise de journaux (non-membres: 13 parutions non-quotidiennes en 1999 et 9 en 2000).

7 Les données concernent les journaux paraissant 1 à 3 fois par semaine.

8 Les données n'incluent pas les parutions du dimanche.

9 Les données ne concernent que les journaux hebdomadaires.

Union internationale des télécommunications (UIT), Genève, "Yearbook of Statistics, Telecommunication Services, Chronological Time Series 1991-2000" et la base de données de l'UIT.

- 1 Data refer to fiscal years beginning 1 April.
- 2 As of 31 December.
- 3 Data refer to fiscal years ending 30 September.
- 4 Data refer to fiscal years ending 30 June.
- 5 ITU estimate.
- 6 Including Celtel subscribers.
- 7 September.
- 8 Year ending November 1997.
- 9 Data refer to fiscal years beginning 22 March.
- 10 Including PHS.
- 11 Not including radiotelephone connections of "Altaj" System.
- 12 Data refer to fiscal years ending 15 July.
- 13 As of 31 March 2000.
- 14 Users use Israel cellular network.
- 15 Data refer to the Puerto Rico Telephone Authority.
- 16 As of 10 February 1998.
- 17 Zantel (Zambian Telecommunications Company Limited) only.

- 1 Les données se réfèrent aux exercices budgétaires commençant le 1er avril.
- 2 Dès le 31 décembre.
- 3 Les données se réfèrent aux exercices budgétaires finissant le 30 septembre.
- 4 Les données se réfèrent aux exercices budgétaires finissant le 30 juin.
- 5 Estimation de l'UIT.
- 6 Y compris les abonnés au Celtel.
- 7 Septembre.
- 8 Année s'achevant en novembre 1997.
- 9 Les données se réfèrent aux exercices budgétaires commençant le 22 mars.
- 10 Y compris "PHS"
- 11 Non compris les connections radio-téléphonique du système d'Altaj.
- 12 Les données se réfèrent aux exercices budgétaires finissant le 15 juillet.
- 13 Dès le 31 mars 2000.
- 14 Les abonnés utilisent le réseau israélien de téléphonie mobile.
- 15 Les données se réfèrent à "Puerto Rico Telephone Authority".
- 16 Dès le 10 février 1998.
- 17 Zantel seulement.

Technical notes, tables 13-19

Tables 13-16: The data on books, newspapers, periodicals and cinemas have been compiled from the UNESCO Institute for Statistics database (see <www.uis.unesco.org>) and from earlier editions of the UNESCO *Statistical Yearbook* [31].

Table 13: Data on books by subject groups cover printed books and pamphlets and, unless otherwise stated, refer to first editions and re-editions as well as to reprints that do not require a new ISBN. The grouping by subject follows the Universal Decimal Classification (UDC).

Table 14: For the purposes of this table, a daily general interest newspaper is defined as a publication devoted primarily to recording general news. It is considered to be "daily" if it appears at least four times a week. It should be noted that data prior to 1997 may not be comparable to data for later years due to UNESCO's use of different sources.

Table 15: For the purposes of this table, a non-daily general interest newspaper is defined as a publication which is devoted primarily to recording general news and which is published three times a week or less. Under the category of periodicals are included publications of periodical issue, other than newspapers, containing information of a general or of a specialized nature. It should be noted that data prior to 1997 may not be comparable to data for later years due to UNESCO's use of different sources.

Table 16: The data refer to fixed cinemas and mobile units regularly used for commercial exhibition of long films of 1,600 metres and over. The term fixed cinema used in this table refers to establishments possessing their own equipment and includes indoor cinemas (those with a permanent fixed roof over most of the seating accommodation), outdoor cinemas and drive-ins (establishments designed to enable the audience to watch a film while seated in their automobile). Mobile units are defined as projection units equipped and used to serve more than one site.

The capacity of fixed cinemas refers to the number of seats in indoor and outdoor cinemas plus the number of places for automobiles, multiplied by a factor of 4 in the case of drive-ins.

Cinema attendance is calculated from the number of tickets sold during a given year.

As a rule, figures refer only to commercial establishments but in the case of mobile units, it is possible that the figures for some countries may also include non-commercial units.

The statistics included in *Tables 17-19* were obtained from the statistics database (see <www.itu.int>)

Notes techniques, tableaux 13 à 19

Tableaux 13 à 16: Les données concernant les livres, les journaux, les périodiques et les cinémas proviennent de la base de données de l'Institut de statistique de l'UNESCO (voir <www.uis.unesco.org>) et des éditions précédentes de l'*Annuaire statistique* de l'UNESCO [31].

Tableau 13: Les données concernant la production de livres par groupes de sujets se rapportent aux livres et brochures imprimés, sauf indication contraire, aux premières éditions et aux rééditions, ainsi qu'aux réimpressions qui ne nécessitent pas un nouveau numéro de ISBN. Les sujets sont groupés selon la Classification décimale universelle (CDU).

Tableau 14: Dans ce tableau, par "journal quotidien d'information générale", on entend une publication qui a essentiellement pour objet de rendre compte des événements courants. Il est considéré comme "quotidien" s'il paraît au moins quatre fois par semaine. Les données antérieures à 1997 peuvent n'être pas comparables à celles des années suivantes, l'UNESCO ayant utilisé des sources différentes.

Tableau 15: Aux fins de ce tableau, par "journal non quotidien d'information générale", on entend une publication qui a essentiellement pour objet de rendre compte des événements courants et qui est publié trois fois par semaine ou moins. La catégorie périodique comprend les publications périodiques autres que les journaux, contenant des informations de caractère général ou spécialisé. Les données antérieures à 1997 peuvent n'être pas comparables à celles des années suivantes, l'UNESCO ayant utilisé des sources différentes.

Tableau 16: Les données concernent les établissements fixes et les cinémas itinérants d'exploitation commerciale de films d'une longueur de 1600 mètres et plus. Le terme établissement fixe désigne tout établissement doté de son propre équipement; il englobe les salles fermées (c'est-à-dire celles où un toit fixe recouvre la plupart des places assises), les cinémas de plein air et les cinémas pour automobilistes ou drive-ins (conçus pour permettre aux spectateurs d'assister à la projection sans quitter leur voiture). Les cinémas itinérants sont définis comme groupes mobiles de projection équipés de manière à pouvoir être utilisés dans des lieux différents.

La capacité des cinémas fixes se réfère au nombre de sièges dans les salles fermées et les cinémas de plein air, plus le nombre de places d'automobiles multiplié par le facteur 4 dans le cas des drive-ins.

La fréquentation des cinémas est calculée sur la base du nombre de billets vendus au cours d'une année donnée.

and the *Yearbook of Statistics, Telecommunication Services* [18] of the International Telecommunication Union.

Table 17: The number of mobile cellular telephone subscribers refers to users of portable telephones subscribing to an automatic public mobile telephone service using cellular technology which provides access to the Public Switched Telephone Network (PSTN).

Table 18: This table shows the number of main lines in operation and the main lines in operation per 100 inhabitants for the years indicated. Main telephone lines refer to the telephone lines connecting a customer's equipment to the Public Switched Telephone Network (PSTN) and which have a dedicated port on a telephone exchange. Note that in most countries, main lines also include public telephones. Main telephone lines per 100 inhabitants is calculated by dividing the number of main lines by the population and multiplying by 100.

Table 19: Internet user data is based on reported estimates, derivations based on reported Internet Access Provider subscriber counts, or calculated by multiplying the number of hosts by an estimated multiplier. However, comparisons of user data are misleading because there is no standard definition of frequency (e.g., daily, weekly, monthly) or services used (e.g., e-mail, World Wide Web).

En général, les statistiques présentées ne concernent que les établissements commerciaux: toutefois, dans le cas des cinémas itinérants, il se peut que les données relatives à certains pays tiennent compte aussi des établissements non-commerciaux.

Les données présentées dans les *Tableaux 17 à 19* proviennent de la base de données (voir <www.itu.int>) et l'*Annuaire statistique, Services de télécommunications* [18] de l'Union internationale des télécommunications.

Tableau 17: Les abonnés mobiles désignent les utilisateurs de téléphones portatifs abonnés à un service automatique public de téléphones mobiles ayant accès au Réseau de téléphone public connecté (RTPC).

Tableau 18: Ce tableau indique le nombre de lignes principales en service et les lignes principales en service pour 100 habitants pour les années indiquées. Les lignes principales sont des lignes téléphoniques qui relient l'équipement terminal de l'abonné au Réseau de téléphone public connecté (RTPC) et qui possèdent un accès individualisé aux équipements d'un central téléphonique. Pour la plupart des pays, le nombre de lignes principales en service indiqué comprend également les lignes publiques. Le nombre de lignes principales pour 100 habitants se calcule en divisant le nombre de lignes principales par la population et en multipliant par 100.

Tableau 19: Les chiffres relatifs aux usagers d'Internet sont basés sur les estimations communiquées, calculés à partir des chiffres issus de dénombrements d'abonnés aux services de fournisseurs d'accès, ou obtenus en multipliant le nombre d'hôtes par un facteur estimatif. Mais les comparaisons de chiffres relatifs aux usagers prêtent à confusion, car il n'existe pas de définition normalisée de la fréquence (quotidienne, hebdomadaire, mensuelle) ni des services utilisés (courrier électronique, Web).

Part Three Economic Activity

- Chapter VI**
National accounts and industrial production
(tables 20-26)
- Chapter VII**
Financial statistics (tables 27 and 28)
- Chapter VIII**
Labour force (tables 29 and 30)
- Chapter IX**
Wages and prices (tables 31-33)
- Chapter X**
Agriculture, forestry and fishing
(tables 34-40)
- Chapter XI**
Manufacturing (tables 41-58)
- Chapter XII**
Transport (tables 59-63)
- Chapter XIII**
Energy (tables 64 and 65)
- Chapter XIV**
Environment (tables 66-68)
- Chapter XV**
Science and technology, intellectual property
(tables 69-71)

Part Three of the *Yearbook* presents statistical series on production and consumption for a wide range of economic activities, and other basic series on major economic topics, for all countries or areas of the world for which data are available. Included are basic tables on national accounts, finance, labour force, wages and prices, a wide range of agricultural, mined and manufactured commodities, transport, energy, environment, research and development personnel and expenditure, and intellectual property.

International economic topics such as external trade are covered in Part Four.

Troisième partie Activité économique

- Chapitre VI**
Comptabilités nationales et production
industrielle (tableaux 20 à 26)
- Chapitre VII**
Statistiques financières (tableaux 27 et 29)
- Chapitre VIII**
Main-d'oeuvre (tableaux 29 et 30)
- Chapitre IX**
Salaires et prix (tableaux 31 à 33)
- Chapitre X**
Agriculture, forêts et pêche
(tableaux 34 à 40)
- Chapitre XI**
Industries manufacturières (tableaux 41 à 58)
- Chapitre XII**
Transports (tableaux 59 à 63)
- Chapitre XIII**
Energie (tableaux 64 et 65)
- Chapitre XIV**
Environnement (tableaux 66 à 68)
- Chapitre XV**
Science et technologie, propriété intellectuelle
(tableaux 69 à 71)

La troisième partie de l'*Annuaire* présente, pour une large gamme d'activités économiques, des séries statistiques sur la production et la consommation, et, pour tous les pays ou zones du monde pour lesquels des données sont disponibles, d'autres séries fondamentales ayant trait à des questions économiques importantes. Y figurent des tableaux de base consacrés à la comptabilité nationale, aux finances, à la main-d'oeuvre, aux salaires et aux prix, à un large éventail de produits agricoles, miniers et manufacturés, aux transports, à l'énergie, à l'environnement, au personnel employé à des travaux de recherche et développement, et dépenses de recherche et développement, et à la propriété intellectuelle.

Les questions économiques internationales comme le commerce extérieur sont traitées dans la quatrième partie.

la base de données sur les comptes nationaux.

1 The conversion rates used to translate national currency data into United States dollars are the period averages of market exchange rates (MERs) for members of the International Monetary Fund (IMF). These rates, which are published in the *International Financial Statistics*, are communicated to the IMF by national central banks and consist of three types of rates:

- Market rates, determined largely by market forces;
- Official rates, determined by government authorities;
- Principal rates, for countries maintaining multiple exchange rate arrangements.

1 Les taux de conversion utilisés pour exprimer les données nationales en dollars des États-Unis sont, pour les membres du Fonds monétaire international (FMI), les moyennes pour la période considérée des taux de change du marché. Ces derniers, qui sont publiés dans "Statistiques financières internationales," sont communiqués au FMI par les banques centrales nationales et reposent sur trois types de taux :

- Taux du marché, déterminés surtout par les facteurs du marché;
- Taux officiels, déterminés par les pouvoirs publics;
- Taux principaux, pour les pays pratiquant différents arrangements en matière de taux de change.

Produit intérieur brut : total et par habitant

En dollars E.-U. (millions)¹ aux prix courants et constants de 1990; par habitant en dollars E.-U.;
 taux de l'accroissement réels [suite]

Market rates always take priority and official rates are used only when a free market rate is not available.

For non-members of the IMF, averages of the United Nations operational rates, used for accounting purposes in UN transactions with member countries, are applied. These are based on official, commercial and/or tourist rates of exchange.

It should be noted that there are practical constraints in the use of MERs for conversion purposes, particularly in the case of countries with multiple exchange rates, those coping with inordinate levels of inflation or experiencing misalignments caused by market fluctuations, the use of which may result in excessive fluctuations or distortions in the dollar income levels of a number of countries. Caution is therefore urged when making inter-country comparisons of incomes as expressed in US dollars.

- 2 For Afghanistan, Iraq, Lebanon, Liberia, Myanmar, Nigeria, Suriname and Syrian Arab Republic, price-adjusted rates of exchange (PARE) were used due to large distortions in the levels of per capita GDP with the use of IMF market exchange rates.
- 3 Data refer to the Vatican City State.
- 4 Weighted rates of exchange were used for the period 1987 - 1992.

On donne toujours la priorité aux taux du marché, n'utilisant les taux officiels que lorsqu'il n'y a pas de taux du marché libre.

Pour les pays qui ne sont pas membres du FMI, on utilise des moyennes des taux de change opérationnels de l'ONU (qui servent à des fins comptables, pour les opérations de l'ONU avec les pays qui en sont membres). Ces taux reposent sur les taux de change officiels, les taux du commerce et/ou les taux touristiques.

Il est à noter qu'on se heurte à des difficultés pratiques en utilisant les taux de change du marché pour convertir les données en monnaie nationale, surtout dans le cas des pays qui pratiquent plusieurs taux de change et de ceux qui connaissent des taux d'inflation exceptionnels ou des décalages provenant des fluctuations du marché; on risque en les utilisant d'aboutir à des fluctuations excessives ou à des distorsions du revenu en dollars de certains pays. Les comparaisons de revenu entre pays sont donc sujettes à caution lorsqu'on se fonde sur le revenu en dollars des États-Unis.

- 2 Pour l'Afghanistan, l'Iraq, le Liban, le Libéria, le Myanmar, le Nigéria, le Suriname et le République arabe syrienne on a utilisé des taux de change corrigés des prix, car les taux de change du marché publiés par le FMI induisent des distorsions importantes dans les montants du produit intérieur brut par habitant.
- 3 Les données se rapportent à l'Etat de la Cité du Vatican.
- 4 Pour la période 1987 à 1992, on a utilisé des taux de change pondérés.

Organisation des Nations Unies, Division de statistique, New York, la base de données sur les comptes nationaux.

- 1 Net exports.
- 2 Data are classified according to 1993 SNA.
- 3 Including statistical discrepancy.
- 4 Including "Non-profit institutions serving households" (NPISHs) final consumption expenditure.
- 5 Gross capital formation.
- 6 Data refer to fiscal years beginning 1 July.
- 7 Including acquisitions less disposals of valuables.
- 8 Data in Belarussian roubles.
- 9 Data refer to fiscal years beginning 1 April.
- 10 Data refer to fiscal years ending 30 June.
- 11 Including government consumption expenditure on collective goods.
- 12 Including household final consumption expenditure.
- 13 Data refer to fiscal years ending 7 July.
- 14 Data refer to fiscal years ending 30 September.
- 15 Data refer to fiscal years beginning 21 March.
- 16 Including changes in inventories.
- 17 Excluding acquisitions less disposals of valuables.
- 18 Data refer to fiscal years ending 15 July.

- 1 Exportations nettes.
- 2 Les données sont classifiées selon le SCN 1993.
- 3 Y compris divergence statistique.
- 4 Y compris la consommation finale des institutions sans but lucratif au service des ménages.
- 5 Formation brute de capital.
- 6 Les données se réfèrent aux exercices budgétaires commençant le 1er juillet.
- 7 Y compris les acquisitions moins cessions d'objets de valeur.
- 8 Les données sont exprimées en roubles Belarussian.
- 9 Les données se réfèrent aux exercices budgétaires commençant le 1er avril.
- 10 Les données se réfèrent aux exercices budgétaires finissant le 30 juin.
- 11 Y compris la consommation des administrations publiques sur des biens collectifs.
- 12 Y compris la consommation finale des ménages.
- 13 Les données se réfèrent aux exercices budgétaires commençant le 7 juillet.
- 14 Les données se réfèrent aux exercices budgétaires finissant le 30 septembre.
- 15 Les données se réfèrent aux exercices budgétaires commençant le 21 mars.
- 16 Y compris les variations des stocks.
- 17 Non compris les acquisitions moins cessions d'objets de valeur.
- 18 Les données se réfèrent aux exercices budgétaires finissant le 15 juillet.

- 1 Les chiffres se rapportent à 12 mois commençant le 1er juillet de l'année indiquée.
- 2 Les chiffres se rapportent à 12 mois finissant le 30 juin de l'année indiquée.
- 3 Calculé par la Division de Statistiques de l'Organisation des Nations Unies à partir d'indices nationaux plus détaillés.
- 4 Non compris l'extraction du charbon et de pétrole brut.
- 5 Non compris les raffineries de pétrole.
- 6 Les chiffres se rapportent à 12 mois finissant le 30 septembre de l'année indiquée.
- 7 Y compris la construction.
- 8 Les chiffres se rapportent à 12 mois commençant le 1er avril de l'année indiquée.
- 9 Non compris l'extraction de gaz et de pétrole brut.
- 10 Non compris les services relatifs aux mines.
- 11 Les chiffres se rapportent à 12 mois finissant le 31 mars de l'année indiquée.
- 12 Y compris l'exploitation forestière et la pêche.

Technical notes, tables 20-26

Detailed internationally comparable data on national accounts are compiled and published annually by the Statistics Division, Department of Economic and Social Affairs of the United Nations Secretariat. Data for national accounts aggregates for countries or areas are based on the concepts and definitions contained in *A System of National Accounts (1968 SNA)* [58] and in *System of National Accounts 1993 (1993 SNA)* [59]. A summary of the conceptual framework, classifications and definitions of transactions is found in the annual United Nations publication, *National Accounts Statistics: Main Aggregates and Detailed Tables* [27].

The national accounts data shown in this publication offer, in the form of analytical tables, a summary of selected principal national accounts aggregates based on official detailed national accounts data of some 180 countries and areas. Every effort has been made to present the estimates of the various countries or areas in a form designed to facilitate international comparability. The data for the majority of countries or areas has been compiled according to the 1968 SNA. Data for those countries or areas which have started to follow the concepts and definitions of the 1993 SNA is indicated with a footnote. To the extent possible, any other differences in concept, scope, coverage and classification are footnoted as well. Detailed footnotes identifying these differences are also available in the annual national accounts publication mentioned above. Such differences should be taken into account in order to avoid misleading comparisons among countries or areas.

Table 20 shows gross domestic product (GDP) and GDP per capita in US dollars in current prices, and GDP in constant 1990 prices and the corresponding rates of growth. The table is designed to facilitate international comparisons of levels of income generated in production. In order to present comparable coverage for as many countries as possible, the official GDP national currency data are supplemented by estimates prepared by the Statistics Division, based on a variety of data derived from national and international sources. The conversion rates used to translate national currency data into US dollars are the period averages of market exchange rates (MERs) for members of the International Monetary Fund (IMF). These rates, which are published in the *International Financial Statistics* [15], are communicated to the IMF by national central banks and consist of three types: (a) market rates, determined largely by market forces; (b) official rates, determined by government authorities; and (c) principal rates for countries maintaining multiple exchange rate arrangements. Market rates always take priority and official rates are used only when a free market rate is not available.

Notes techniques, tableaux 20 à 26

La Division de statistique du Département des affaires économiques et sociales du Secrétariat de l'Organisation des Nations Unies établit et publie chaque année des données détaillées, comparables au plan international, sur les comptes nationaux. Les données relatives aux agrégats des différents pays et territoires sont établies en fonction des concepts et des définitions du *Système de comptabilité nationale (SCN de 1968)* [58] et du *Système de comptabilité nationale (SCN de 1993)* [59]. On trouvera un résumé de l'appareil conceptuel, des classifications et des définitions des opérations dans *National Accounts Statistics: Main Aggregates and Detailed Tables* [27], publication annuelle des Nations Unies.

Les chiffres de comptabilité nationale présentés ici récapitulent sous forme de tableaux analytiques un choix d'agrégats essentiels de comptabilité nationale, issus des comptes nationaux détaillés de quelque 180 pays et territoires. On n'a rien négligé pour présenter les chiffres des différents pays et territoires sous une forme facilitant les comparaisons internationales. Pour la plupart des pays, les chiffres ont été établis selon le SCN de 1968. Les données des pays et territoires qui ont commencé à appliquer les concepts et les définitions du SCN de 1993 sont signalées par une note. Dans toute la mesure possible, on signale également au moyen de notes les cas où les concepts, la portée, la couverture et la classification ne seraient pas les mêmes. Il y a en outre des notes détaillées explicitant ces différences dans la publication annuelle mentionnée plus haut. Il y a lieu de tenir compte de ces différences pour éviter de tenter des comparaisons qui donneraient matière à confusion.

Le *tableau 20* fait apparaître le produit intérieur brut (PIB) total et par habitant, exprimé en dollars des États-Unis aux prix courants et à prix constants (base 1990), ainsi que les taux de croissance correspondants. Le tableau est conçu pour faciliter les comparaisons internationales du revenu issu de la production. Afin que la couverture soit comparable pour le plus grand nombre possible de pays, la Division de statistique s'appuie non seulement sur les chiffres officiels du PIB exprimé dans la monnaie nationale, mais aussi sur diverses données provenant de sources nationales et internationales. Les taux de conversion utilisés pour exprimer les données nationales en dollars des États-Unis sont, pour les membres du Fonds monétaire international (FMI), les moyennes pour la période considérée des taux de change du marché. Ces derniers, publiés dans *Statistiques financières internationales* [15], sont communiqués au FMI par les banques centrales des pays et reposent sur trois types de taux : a) taux du marché, déterminés dans une large mesure par les facteurs du marché; b) taux officiels, déterminés par les pouvoirs publics; c) taux principaux, pour les pays pratiquant diffé-

For non-members of the IMF, averages of the United Nations operational rates, used for accounting purposes in United Nations transactions with member countries, are applied. These are based on official, commercial and/or tourist rates of exchange.

It should be noted that there are practical constraints in the use of MERs for conversion purposes. Their use may result in excessive fluctuations or distortions in the dollar income levels of a number of countries particularly in those with multiple exchange rates, those coping with inordinate levels of inflation or countries experiencing misalignments caused by market fluctuations. Caution is therefore urged when making inter-country comparisons of incomes as expressed in US dollars.

The GDP constant price series, based primarily on data officially provided by countries or areas and partly on estimates made by the Statistics Division, are transformed into index numbers and rebased to 1990=100. The resulting data are then converted into US dollars at the rate prevailing in the base year 1990. The growth rates are based on the estimates of GDP at constant 1990 prices. The growth rate of the year in question is obtained by dividing the GDP of that year by the GDP of the preceding year.

Table 21 features the percentage distribution of GDP in current prices by expenditure breakdown. It shows the portions of GDP spent on consumption by the government and the household (including the non-profit institutions serving households) sector, the portions spent on gross fixed capital formation, on changes in inventories, and on exports of goods and services, deducting imports of goods and services. The percentages are derived from official data reported to the United Nations by the countries and published in the annual national accounts publication.

Table 22 shows the percentage distribution of value added originating from the various industry components of the *International Standard Industrial Classification of All Economic Activities, Revision 3* (ISIC Rev. 3) [50]. This table reflects the economic structure of production in the different countries or areas. The percentages are based on official value added estimates at current prices broken down by the kind of economic activity: agriculture, hunting, forestry and fishing (categories A+B); mining and quarrying (C); manufacturing (D); electricity, gas and water supply (E); construction (F); wholesale and retail trade, repair of motor vehicles, motorcycles and personal and household goods, restaurants and hotels (G+H); transport, storage and communication (I) and other activities comprised of financial intermediation (J), real estate, renting and business activities (K), public administration and defence, compulsory social security (L), education (M), health and social

rents arrangements en matière de taux de change. On donne toujours la priorité aux taux du marché, n'utilisant les taux officiels que lorsqu'on n'a pas de taux du marché libre.

Pour les pays qui ne sont pas membres du FMI, on utilise les moyennes des taux de change opérationnels de l'ONU (qui servent à des fins comptables pour les opérations de l'ONU avec les pays qui en sont membres). Ces taux reposent sur les taux de change officiels, les taux du commerce et/ou les taux touristiques.

Il est à noter que l'utilisation des taux de change du marché pour la conversion des données se heurte à des obstacles pratiques. On risque, ce faisant, d'aboutir à des fluctuations excessives ou à des distorsions du revenu en dollars de certains pays, surtout dans le cas des pays qui pratiquent plusieurs taux de change et de ceux qui connaissent des taux d'inflation exceptionnels ou des décalages provenant des fluctuations du marché. Les comparaisons de revenu entre pays sont donc sujettes à caution lorsqu'on se fonde sur le revenu exprimé en dollars des États-Unis.

La série de statistiques du PIB à prix constants est fondée principalement sur des données officiellement communiquées par les pays, et en partie sur des estimations de la Division de statistique; les données permettent de calculer des indices, la base 100 correspondant à 1990. Les chiffres ainsi obtenus sont alors convertis en dollars des États-Unis au taux de change de l'année de base (1990). Les taux de croissance sont calculés à partir des estimations du PIB aux prix constants de 1990. Le taux de croissance de l'année considérée est obtenu en divisant le PIB de l'année par celui de l'année précédente.

Le *tableau 21* montre la répartition (en pourcentage) du PIB aux prix courants par catégorie de dépense. Il indique la part du PIB consacrée aux dépenses de consommation des administrations publiques et du secteur des ménages (y compris les institutions sans but lucratif au service des ménages), celle qui est consacrée à la formation brute de capital fixe, celle qui correspond aux variations de stocks et celle qui correspond aux exportations de biens et services, déduction faite des importations de biens et services. Ces pourcentages sont calculés à partir des chiffres officiels communiqués à l'ONU par les pays, publiés dans l'ouvrage annuel.

Le *tableau 22* montre la répartition (en pourcentage) de la valeur ajoutée par branche d'activité, selon le classement retenu dans la *Classification internationale type, par industrie, de toutes les branches d'activité économique, Révision 3* (CITI Rev. 3) [50]. Il rend donc compte de la structure économique de la production dans chaque pays. Les pourcentages sont établis à partir des chiffres officiels de valeur ajoutée, aux prix courants, ventilés selon les différentes catégories d'activité économique : agriculture, chasse, sylviculture et pêche (catégories

work (N), other community, social and personal service activities (O) and private households with employed persons (P).

Table 23 presents the relationships among the principal national accounting aggregates, namely: gross domestic product (GDP), gross national income (GNI), gross national disposable income (GNDI) and gross saving. GNI is the term used in the 1993 SNA instead of the term Gross National Product (GNP) which was used in the 1968 SNA. The ratio of each aggregate to GDP is derived cumulatively by adding net primary income (or net factor income) from the rest of the world, (GNI); adding net current transfers from the rest of the world, (GNDI) and deducting final consumption to arrive at gross saving. Net national income, net national disposable income and net saving can be derived by deducting consumption of fixed capital from the corresponding gross values mentioned above.

Table 24 presents the distribution of government final consumption expenditure by function in current prices. The breakdown by function includes: general public services; defence; public order and safety; environment protection; health; education; social protection; and other functions which include housing, community amenities, recreational, cultural and religious affairs. The government expenditure is equal to the service produced by general government for its own use. These services are not sold; they are valued in the GDP at their cost to the government.

Table 25 shows the distribution of total household consumption expenditure by purpose in current prices. Household consumption expenditure measures the expenditure of all resident non-government units which includes all households and private non-profit institutions serving households. The percentage shares include: food, beverages, tobacco and narcotics; clothing and footwear; housing, water, electricity, gas and other fuels; furnishings, household equipment, routine maintenance of the house; health; transport and communication; recreation, culture, education, restaurants, hotels; and other functions which include miscellaneous goods and services, purchases abroad by resident households deducting the expenditure of non-resident in the domestic market and the expenditure of private non-profit institutions serving households.

Table 26: The national indices in this table are shown for the categories "Mining and Quarrying", "Manufacturing" and "Electricity, gas and water". These categories are classified according to Tabulation Categories C, D and E of the ISIC Revision 3 [50]. Major deviations from ISIC in the scope of the indices for the above categories are indicated by footnotes to the table.

The category "Total industry" covers Mining, Manufacturing and Electricity, gas and water. The indices for "Total industry", however, are the combination

A + B); activités extractives (C); activités de fabrication (D); production et distribution d'électricité, de gaz et d'eau (E); construction (F); commerce de gros et de détail, réparation de véhicules automobiles, de motocycles et de biens personnels et domestiques, hôtels et restaurants (G + H); transports, entreposage et communications (I) et intermédiation financière (J); immobilier, locations et activités de services aux entreprises (K); administration publique et défense, sécurité sociale obligatoire (L); éducation (M); santé et action sociale (N); autres activités de services collectifs, sociaux et personnels (O); et ménages privés employant du personnel domestique (P).

Le tableau 23 montre les rapports entre les principaux agrégats de la comptabilité nationale, à savoir le produit intérieur brut (PIB), le revenu national brut (RNB), le revenu national brut disponible et l'épargne brute. Le revenu national brut est l'agrégat qui remplace dans le SCN de 1993 le produit national brut, utilisé dans le SCN de 1968. Chacun d'entre eux est obtenu par rapport au PIB, en ajoutant les revenus primaires nets (ou revenus nets de facteurs) engendrés dans le reste du monde, pour obtenir le revenu national brut; en ajoutant les transferts courants nets reçus de non-résidents, pour obtenir le revenu national disponible; en soustrayant la consommation finale pour obtenir l'épargne brute. Le revenu national net, le revenu national disponible net et l'épargne nette s'obtiennent en déduisant de la valeur brute correspondante la consommation de capital fixe.

Le tableau 24 donne la répartition des dépenses de consommation finale des administrations publiques, par fonction, aux prix courants. La répartition par fonction est la suivante: services généraux des administrations publiques; protection de l'environnement; santé; éducation; protection sociale; défense; ordre et sécurité publics; et autres fonctions incluant le logement, les aménagements collectifs, les équipements de loisir et les activités culturelles et religieuses. Les dépenses des administrations sont considérées comme égales aux services produits par l'administration pour son propre usage. Ces services ne sont pas vendus et ils sont évalués, dans le PIB, à leur coût pour l'administration.

Le tableau 25 donne la répartition des dépenses de consommation finale des ménages par fonction aux prix courants. Les dépenses de consommation des ménages mesurent donc les dépenses de toutes les entités résidentes autres que les administrations, y compris tous les ménages et les entités privées à but non lucratif fournissant des services aux ménages. La répartition en pourcentage distingue les rubriques suivantes: alimentation, boissons, tabac et stupéfiants; articles d'habillement et chaussures; logement, eau, gaz, électricité et autres combustibles; meubles, articles de ménage et entretien courant de l'habitation; santé; transports et communication; loisirs, culture; enseignement, restaurants et hôtels; et autres fonctions, y compris les biens et services divers, achats à

of the components shown and share all deviations from ISIC as footnoted for the component series.

For the purpose of presentation, the national indices have been rebased to 1995=100, where necessary.

l'étranger effectués par les ménages résidents, moins les dépenses des non-résidents sur le marché intérieur, et dépenses des institutions privées à but non lucratif fournissant des services aux ménages.

Tableau 26: Les définitions des catégories "Industries extractives", "Industries manufacturières" et "Electricité, gaz et eau", pour lesquelles des indices nationaux sont donnés dans ce tableau correspondent aux catégories C, D et E des tableaux de la CITI Révision 3 [50]. Toutes différences importantes par rapport à la CITI dans la portée des indices de ces catégories sont indiquées dans les notes du tableau.

La catégorie "Total, industrie" couvre Industries extractives, Industries manufacturières et Electricité, gaz et eau. Toutefois, les indices de cette catégorie "Total, industrie" ne portent que sur la combinaison des indices partiels indiqués, et partagent toutes les différences par rapport à la CITI notées dans le cas des indices partiels.

Pour les besoins de la présentation, les indices nationaux ont été dans certains cas recalculés en prenant 1995=100 comme base de référence.

- 1 Euro area interbank rate (3 month).
- 2 Including Anguilla.
- 3 Federal funds rate.

- 1 Taux interbancaire (3 mois) du zone euro.
- 2 Y compris Anguilla.
- 3 Taux des fonds du système fédérale.

Technical notes, tables 27 and 28

Detailed information and current figures relating to tables 27 and 28 are contained in *International Financial Statistics*, published by the International Monetary Fund [15] (see also <www.imf.org>) and in the United Nations *Monthly Bulletin of Statistics* [26].

Table 27: The discount rates shown represent the rates at which the central bank lends or discounts eligible paper for deposit money banks, typically shown on an end-of-period basis.

Table 28: The rates shown represent short-term treasury bill rates and money market rates. The treasury bill rate is the rate at which short-term securities are issued or traded in the market. The money market rate is the rate on short-term lending between financial institutions.

Notes techniques, tableaux 27 et 28

Les informations détaillées et les chiffres courants concernant les tableaux 27 et 28 figurent dans les *Statistiques financières internationales* publiées par le Fonds monétaire international [15] (voir aussi <www.imf.org>) et dans le *Bulletin mensuel de statistique* des Nations Unies [26].

Tableau 27: Les taux d'escomptes indiqués représentent les taux que la banque centrale applique à ses prêts ou auquel elle réescompte les effets escomptables des banques créatrices de monnaie (généralement, taux de fin de période).

Tableau 28: Les taux indiqués représentent le taux des bons du Trésor et le taux du marché monétaire à court terme. Le taux des bons du Trésor est le taux auquel les effets à court terme sont émis ou négociés sur le marché. Le taux du marché monétaire est le taux prêteur à court terme entre institutions financières.

+ Countries using the latest version of the International Standard Industrial Classification of all Economic Activities, Revision 3 (ISIC Revision 3), are presented in Part B. Countries using the former classification, ISIC Revision 2, are presented in Part A.

+ On trouvera dans la partie B les chiffres relatifs aux pays qui appliquent la version la plus récente de la Classification internationale type, par industrie, de toutes les branches d'activité économique, Révision 3 (CITI Rév. 3). Les pays qui utilisent encore la classification dans sa version précédente (Révision 2) figurent à la partie A.

+ Tabulation categories of ISIC Rev. 3:

- A. Agriculture, hunting and forestry.
- B. Fishing.
- C. Mining and quarrying.
- D. Manufacturing.
- E. Electricity, gas and water supply.
- F. Construction.
- G. Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods.
- H. Hotels and restaurants.
- I. Transport, storage and communications.
- J. Financial intermediation.
- K. Real estate, renting and business activities.
- L. Public administration and defence; compulsory social security.
- M. Education.
- N. Health and social work.
- O. Other community, social and personal service activities.
- P. Private households with employed persons.
- Q. Extra-territorial organizations and bodies.

+ Catégories de classement de la CITI Rév. 3:

- A. Agriculture, chasse et sylviculture.
- B. Pêche.
- C. Activités extractives.
- D. Activités de fabrication.
- E. Production et distribution d'électricité, de gaz et d'eau.
- F. Construction.
- G. Commerce de gros et de détail; réparation de véhicules automobiles, de motocycles et de biens personnels et domestiques.
- H. Hôtels et restaurants.
- I. Transports, entreposage et communications.
- J. Intermédiation financière.
- K. Immobilier, locations et activités de services aux entreprises.
- L. Administration publique et défense; sécurité sociale obligatoire.
- M. Education.
- N. Santé et action sociale.
- O. Autres activités de services collectifs, sociaux et personnels.
- P. Ménages privés employant du personnel domestique.
- Q. Organisations et organismes extraterritoriaux.

1 Persons aged 10 years and over.

2 Year ending in June of the year indicated.

3 Civilian labour force employed.

4 Persons aged 15 years and over.

5 Including quarrying.

6 Wholesale and retail trade.

7 Both sexes.

8 Persons aged 15 to 69 years.

9 One month of each year.

10 Excluding rural population of Rondônia, Acre, Amazonas, Roraima, Pará and Amapá.

11 Including electricity, gas, water and sanitary services.

12 Excluding restaurants and hotels.

13 Excluding storage.

14 Including international and other extra-territorial bodies and activities not adequately defined.

1 Personnes âgées de 10 ans et plus.

2 Année se terminant en juin de l'année indiquée.

3 Main-d'œuvre civile occupée.

4 Personnes âgées de 15 ans et plus.

5 Y compris les carrières.

6 Commerce de gros et de détail.

7 Les deux sexes.

8 Personnes âgées de 15 à 69 ans.

9 Un mois de chaque année.

10 Non compris la population rurale de Rondônia, Acre, Amazonas, Roraima, Pará et Amapá.

11 Y compris l'électricité, le gaz, l'eau et les services sanitaires.

12 Non compris les restaurants et hôtels.

13 Non compris les entrepôts.

14 Y compris les organisations internationales et autres organismes extra-territoriaux et les activités mal désignées.

Technical notes, tables 29 and 30

Detailed data on labour force and related topics are published in the ILO *Yearbook of Labour Statistics* [13] and on the ILO Web site <<http://laborsta.ilo.org>>. The series shown in the *Statistical Yearbook* give an overall picture of the availability and disposition of labour resources and, in conjunction with other macro-economic indicators, can be useful for an overall assessment of economic performance. The ILO *Yearbook of Labour Statistics* provides a comprehensive description of the methodology underlying the labour series. Brief definitions of the major categories of labour statistics are given below.

“Employment” is defined to include persons above a specified age who, during a specified period of time, were in one of the following categories:

(a) “Paid employment”, comprising persons who perform some work for pay or profit during the reference period or persons with a job but not at work due to temporary absence, such as vacation, strike, education leave;

(b) “Self-employment”, comprising employers, own-account workers, members of producers’ cooperatives, persons engaged in production of goods and services for own consumption and unpaid family workers;

(c) Members of the armed forces, students, homemakers and others mainly engaged in non-economic activities during the reference period who, at the same time, were in paid employment or self-employment are considered as employed on the same basis as other categories.

“Unemployment” is defined to include persons above a certain age and who, during a specified period of time were:

(a) “Without work”, i.e. were not in paid employment or self-employment;

(b) “Currently available for work”, i.e. were available for paid employment or self-employment during the reference period; and

(c) “Seeking work”, i.e. had taken specific steps in a specified period to find paid employment or self-employment.

Persons not considered to be unemployed include:

(a) Persons intending to establish their own business or farm, but who had not yet arranged to do so and who were not seeking work for pay or profit;

(b) Former unpaid family workers not at work and not seeking work for pay or profit.

For various reasons, national definitions of employment and unemployment often differ from the recommended international standard definitions and thereby limit international comparability. Intercountry

Notes techniques, tableaux 29 et 30

Des données détaillées sur la main-d'œuvre et des sujets connexes sont publiées dans l'*Annuaire des Statistiques du Travail* du BIT [13] et sur le site Web du BIT <<http://laborsta.ilo.org>>. Les séries indiquées dans l'*Annuaire des Statistiques* donnent un tableau d'ensemble des disponibilités de main-d'œuvre et de l'emploi de ces ressources et, combinées à d'autres indicateurs économiques, elles peuvent être utiles pour une évaluation générale de la performance économique. L'*Annuaire des statistiques du Travail* du BIT donne une description complète de la méthodologie employée pour établir les séries sur la main-d'œuvre. On trouvera ci-dessous quelques brèves définitions des grandes catégories de statistiques du travail.

Le terme “Emploi” désigne les personnes dépassant un âge déterminé qui, au cours d'une période donnée, se trouvaient dans l'une des catégories suivantes:

(a) La catégorie “emploi rémunéré”, composée des personnes faisant un certain travail en échange d'une rémunération ou d'un profit pendant la période de référence, ou les personnes ayant un emploi, mais qui ne travaillaient pas en raison d'une absence temporaire (vacances, grève, congé d'études);

(b) La catégorie “emploi indépendant” regroupe les employeurs, les travailleurs indépendants, les membres de coopératives de producteurs et les personnes s'adonnant à la production de biens et de services pour leur propre consommation et la main-d'œuvre familiale non rémunérée;

(c) Les membres des forces armées, les étudiants, les aides familiales et autres personnes qui s'adonnaient essentiellement à des activités non économiques pendant la période de référence et qui, en même temps, avaient un emploi rémunéré ou indépendant, sont considérés comme employés au même titre que les personnes des autres catégories.

Par “chômeurs”, on entend les personnes dépassant un âge déterminé et qui, pendant une période donnée, étaient:

(a) “sans emploi”, c'est-à-dire sans emploi rémunéré ou indépendant;

(b) “disponibles”, c'est-à-dire qui pouvaient être engagées pour un emploi rémunéré ou pouvaient s'adonner à un emploi indépendant au cours de la période de référence; et

(c) “à la recherche d'un emploi”, c'est-à-dire qui avaient pris des mesures précises à un certain moment pour trouver un emploi rémunéré ou un emploi indépendant.

Ne sont pas considérés comme chômeurs:

(a) Les personnes qui, pendant la période de ré-

comparisons are also complicated by a variety of types of data collection systems used to obtain information on employed and unemployed persons.

Table 29 presents absolute figures on the distribution of employed persons by economic activity. In part A the figures are according to Revision 2 (ISIC 2) of the *International Standard Industrial Classification* [50], and in part B according to ISIC 3. In part A, the column for total employment includes economic activities not adequately defined and that are not accounted for in the other categories. Data are arranged as far as possible according to the major divisions of economic activity of the *International Standard Industrial Classification of All Economic Activities* [50].

Table 30: Figures are presented in absolute numbers and in percentages. Data are normally annual averages of monthly, quarterly or semi-annual data.

The series generally represent the total number of persons wholly unemployed or temporarily laid off. Percentage figures, where given, are calculated by comparing the number of unemployed to the total members of that group of the labour force on which the unemployment data are based.

férence, avaient l'intention de créer leur propre entreprise ou exploitation agricole, mais n'avaient pas encore pris les dispositions nécessaires à cet effet et qui n'étaient pas à la recherche d'un emploi en vue d'une rémunération ou d'un profit;

(b) Les anciens travailleurs familiaux non rémunérés qui n'avaient pas d'emploi et n'étaient pas à la recherche d'un emploi en vue d'une rémunération ou d'un profit.

Pour diverses raisons, les définitions nationales de l'emploi et du chômage diffèrent souvent des définitions internationales types recommandées, limitant ainsi les possibilités de comparaison entre pays. Ces comparaisons se trouvent en outre compliquées par la diversité des systèmes de collecte de données utilisés pour recueillir des informations sur les personnes employées et les chômeurs.

Le *tableau 29* présente les effectifs de personnes employées par activité économique. Dans la partie A, les chiffres sont classés en fonction de la Révision 2 de la *Classification internationale type, par Industrie, de toutes les branches d'activité économique* [50] et dans la partie B en fonction de la Révision 3. Dans la partie A, l'emploi total inclut les personnes employées à des activités économiques mal définies et qui ne sont pas classées ailleurs. Les données sont ventilées autant que possible selon les branches d'activité économique de la *Classification internationale type, par industrie, de toutes les activités économiques* [50].

Tableau 30: Les chiffres sont présentés en valeur absolue et en pourcentage. Les données sont normalement des moyennes annuelles des données mensuelles, trimestrielles ou semestrielles.

Les séries représentent généralement le nombre total des chômeurs complets ou des personnes temporairement mises à pied. Les données en pourcentage, lorsqu'elles figurent au tableau, sont calculées par comparaison du nombre de chômeurs au nombre total des personnes du groupe de main-d'œuvre sur lequel sont basées les données relatives au chômage.

Source:

Organisation des Nations Unies, Division de statistique, New York, la base de données pour les statistiques des prix.

- 1 Domestic agricultural products only.
- 2 Including exported products.
- 3 Manufacturing industry only.
- 4 Including service industries.
- 5 Annual average refers to average of 12 months ending June.
- 6 Prices relate only to products for sale or transfer to other sectors or for use as capital equipment.
- 7 Excluding mining and quarrying.
- 8 Including imported products.
- 9 Base: 2000=100.
- 10 Base: 1994=100.
- 11 Agricultural products and products of the manufacturing industry.
- 12 Base: 1995=100.
- 13 Valued at purchasers' values.
- 14 Base: 1999=100.
- 15 Beginning 1999, annual average refers to average of 12 months ending May.
- 16 Base: 2001=100.
- 17 San Salvador.
- 18 Durable goods only (Finland: beginning 1994; Luxembourg: beginning 1995).
- 19 Base: 1991=100.
- 20 Finished products only.
- 21 Excluding electricity, gas and water.
- 22 Including mining and quarrying.
- 23 Annual average refers to average of 12 months ending March.

- 1 Produits agricoles intérieurs seulement.
- 2 Y compris les produits exportés.
- 3 Industries manufacturières seulement.
- 4 Y compris industries de service.
- 5 La moyenne annuelle est la moyenne de douze mois finissant juin.
- 6 Uniquement les prix des produits destinés à être vendus ou transférés à d'autres secteurs ou à être utilisés comme biens d'équipement.
- 7 Non compris les industries extractives.
- 8 Y compris les produits importés.
- 9 Base: 2000=100.
- 10 Base: 1994=100.
- 11 Produits agricoles et produits des industries manufacturières.
- 12 Base: 1995=100.
- 13 A la valeur d'acquisition.
- 14 Base: 1999=100.
- 15 A partir de 1999, la moyenne annuelle est la moyenne de 12 mois finissant mai.
- 16 Base: 2001=100.
- 17 San Salvador.
- 18 Biens durables seulement (Finlande: à partir de 1995; Luxembourg: à partir de 1994).
- 19 Base: 1991=100.
- 20 Produits finis uniquement.
- 21 Non compris l'électricité, le gaz et l'eau.
- 22 Y compris les industries extractives.
- 23 La moyenne annuelle est la moyenne de 12 mois finissant mars.

Technical notes, tables 31-33

Table 31: The series generally relate to the average earnings per worker in manufacturing industries, according to the *International Standard Industrial Classification of All Economic Activities* (ISIC) Revision 2 or Revision 3 [50]. The data are published in the *ILO Yearbook of Labour Statistics* [13] and on the ILO Web site <<http://laborsta.ilo.org>> and cover all employees (i.e. wage earners and salaried employees) of both sexes, irrespective of age. Data which refer exclusively to wage earners (i.e. manual or production workers), or to salaried employees (i.e. non-manual workers) are footnoted. Earnings generally include bonuses, cost of living allowances, taxes, social insurance contributions payable by the employed person and, in some cases, payments in kind, and normally exclude social insurance contributions payable by the employers, family allowances and other social security benefits. The time of year to which the figures refer is not the same for all countries. In some cases, the series may show wage rates instead of earnings; this is indicated in footnotes.

Table 32: Producer prices are prices at which producers sell their output on the domestic market or for export. Wholesale prices, in the strict sense, are prices at which wholesalers sell their goods on the domestic market or for export. In practice, many national wholesale price indexes are a mixture of producer and wholesale prices for domestic goods representing prices for purchases in large quantities from either source. In addition, these indexes may cover the prices of goods imported in quantity for the domestic market either by producers or by retail or wholesale distributors.

Producer or wholesale price indexes normally cover the prices of the characteristic products of agriculture, forestry and fishing, mining and quarrying, manufacturing, and electricity, gas and water supply. Prices are normally measured in terms of transaction prices, including non-deductible indirect taxes less subsidies, in the case of domestically-produced goods and import duties and other non-deductible indirect taxes less subsidies in the case of imported goods.

The Laspeyres index number formula is generally used and, for the purpose of the presentation, the national index numbers have been recalculated, where necessary, on the reference base 1990=100.

The price index numbers for each country are arranged according to the following scheme:

- (a) Components of supply
 - Domestic supply
 - Domestic production for domestic market
 - Agricultural products

Notes techniques, tableaux 31 à 33

Tableau 31: Les séries se rapportent généralement aux gains moyens des salariés des industries manufacturières (activités de fabrication), suivant la *Classification internationale type, par industrie, de toutes les branches d'activité économique* (CITI, Rev. 2 ou Rev.3) [50]. Les données sont publiées dans l'*Annuaire des statistiques du travail* du BIT [13] et sur le site Web du BIT <<http://laborsta.ilo.org>> et portent sur l'ensemble des salariés (qu'ils perçoivent un salaire ou un traitement au mois) des deux sexes, indépendamment de leur âge. Lorsque les données portent exclusivement sur les salariés horaires (ouvriers, travailleurs manuels) ou sur les employés percevant un traitement (travailleurs autres que manuels, cadres), le fait est signalé par une note. Les gains comprennent en général les primes, les indemnités pour coût de la vie, les impôts, les cotisations de sécurité sociale à la charge de l'employé, et dans certains cas des paiements en nature, mais ne comprennent pas en règle générale la part patronale des cotisations d'assurance sociale, les allocations familiales et les autres prestations de sécurité sociale. La période de l'année visée par les données n'est pas la même pour tous les pays. Dans certains cas, les séries visent les taux horaires et non pas les gains, ce qui est alors signalé en note.

Tableau 32: Les prix à la production sont les prix auxquels les producteurs vendent leur production sur le marché intérieur ou à l'exportation. Les prix de gros, au sens strict du terme, sont les prix auxquels les grossistes vendent sur le marché intérieur ou à l'exportation. En pratique, les indices nationaux des prix de gros combinent souvent les prix à la production et les prix de gros de biens nationaux représentant les prix d'achat par grandes quantités au producteur ou au grossiste. En outre, ces indices peuvent s'appliquer aux prix de biens importés en quantités pour être vendus sur le marché intérieur par les producteurs, les détaillants ou les grossistes.

Les indices de prix de gros ou de prix à la production comprennent aussi en général les prix des produits provenant de l'agriculture, de la sylviculture et de la pêche, des industries extractives (mines et carrières), de l'industrie manufacturière ainsi que les prix de l'électricité, de gaz et de l'eau. Les prix sont normalement ceux auxquels s'effectue la transaction, y compris les impôts indirects non déductibles, mais non compris les subventions dans le cas des biens produits dans le pays et y compris les taxes à l'importation et autres impôts indirects non déductibles, mais non compris les subventions dans le cas des biens importés.

On utilise généralement la formule de Laspeyres

- Industrial products
- Imported goods
- (b) Stage of processing
 - Raw materials
 - Intermediate products
- (c) End-use
 - Consumers' goods
 - Capital goods

A description of the general methods used in compiling the related national indexes is given in the United Nations *1977 Supplement to the Statistical Yearbook and the Monthly Bulletin of Statistics* [57].

Table 33: Unless otherwise stated, the consumer price index covers all the main classes of expenditure on all items and on food. Monthly data for many of these series and descriptions of them may be found in the United Nations *Monthly Bulletin of Statistics* [26] and the United Nations *1977 Supplement to the Statistical Yearbook and the Monthly Bulletin of Statistics* [57].

et, pour la présentation, on a recalculé les indices nationaux, le cas échéant, en prenant comme base de référence 1990=100.

Les indices des prix pour chaque pays sont présentés suivant la classification ci-après:

- (a) Eléments de l'offre
 - Offre intérieure
 - Production nationale pour le marché intérieur
 - Produits agricoles
 - Produits industriels
 - Produits importés
- (b) Stade de la transformation
 - Matières premières
 - Produits intermédiaires
- (c) Utilisation finale
 - Biens de consommation
 - Biens d'équipement

Les méthodes générales utilisées pour calculer les indices nationaux correspondants sont exposées dans: *1977 Supplément à l'Annuaire statistique et au Bulletin mensuel de statistique* des Nations Unies [57].

Tableau 33: Sauf indication contraire, les indices des prix à la consommation donnés englobent tous les groupes principaux de dépenses pour l'ensemble des prix et alimentation. Les données mensuelles pour plusieurs de ces séries et définitions figurent dans le *Bulletin mensuel de statistique* [26] et dans le *1977 Supplément à l'Annuaire statistique et au Bulletin mensuel de statistique* des Nations Unies [57].

1 FAO estimate.

1 Estimation de FAO.

Technical notes, tables 34-40

The series shown on agriculture and fishing have been furnished by the Food and Agriculture Organization of the United Nations (FAO). They refer mainly to:

- (a) Long-term trends in the growth of agricultural output and the food supply;
- (b) Output of principal agricultural commodities.

Agricultural production is defined to include all crops and livestock products except those used for seed and fodder and other intermediate uses in agriculture; for example deductions are made for eggs used for hatching. Intermediate input of seeds and fodder and similar items refer to both domestically produced and imported commodities. For further details, reference may be made to FAO Yearbooks [4, 6, 7, 8, 9, 10]. FAO data are also available through the Internet (<http://www.fao.org>).

Table 34: "Agriculture" relates to the production of all crops and livestock products. The "Food Index" includes those commodities which are considered edible and contain nutrients.

The index numbers of agricultural output and food production are calculated by the Laspeyres formula with the base year period 1989-1991. The latter is provided in order to diminish the impact of annual fluctuations in agricultural output during base years on the indices for the period. Production quantities of each commodity are weighted by 1989-1991 average national producer prices and summed for each year. The index numbers are based on production data for a calendar year. These may differ in some instances from those actually produced and published by the individual countries themselves due to variations in concepts, coverage, weights and methods of calculation. Efforts have been made to estimate these methodological differences to achieve a better international comparability of data. The series include a large amount of estimates made by FAO in cases where no official or semi-official figures are available from the countries.

Detailed data on agricultural production are published by FAO in its *Production Yearbook* [6].

Table 35: The data on the production of cereals relate to crops harvested for dry grain only. Cereals harvested for hay, green feed or used for grazing are excluded.

Table 36: Oil crops, or oil-bearing crops, are those crops yielding seeds, nuts or fruits which are used mainly for the extraction of culinary or industrial oils, excluding essential oils. In this table, data for oil crops represent the total production of oil seeds, oil nuts and oil fruits harvested in the year indicated and expressed in terms of oil equivalent and cake/meal equivalent. That is

Notes techniques, tableaux 34 à 40

Les séries présentées sur l'agriculture et la pêche ont été fournies par l'Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO) et portent principalement sur:

- (a) Les tendances à long terme de la croissance de la production agricole et des approvisionnements alimentaires;
- (b) La production des principales denrées agricoles.

La production agricole se définit comme comprenant l'ensemble des produits agricoles et des produits de l'élevage à l'exception de ceux utilisés comme semences et comme aliments pour les animaux, et pour les autres utilisations intermédiaires en agriculture; par exemple, on déduit les œufs utilisés pour la reproduction.

L'apport intermédiaire de semences et d'aliments pour les animaux et d'autres éléments similaires se rapportent à la fois à des produits locaux et importés. Pour tous détails complémentaires, on se reportera aux annuaires de la FAO [4, 6, 7, 8, 9, 10]. Des statistiques peuvent également être consultées sur le site Web de la FAO (<http://www.fao.org>).

Tableau 34: L'"Agriculture" se rapporte à la production de tous les produits de l'agriculture et de l'élevage. L'"Indice des produits alimentaires" comprend les produits considérés comme comestibles et qui contiennent des éléments nutritifs.

Les indices de la production agricole et de la production alimentaire sont calculés selon la formule de Laspeyres avec les années 1989-1991 pour période de base. Le choix d'une période de plusieurs années permet de diminuer l'incidence des fluctuations annuelles de la production agricole pendant les années de base sur les indices pour cette période. Les quantités produites de chaque denrée sont pondérées par les prix nationaux moyens à la production de 1989-1991, et additionnées pour chaque année. Les indices sont fondés sur les données de production d'une année civile. Ils peuvent différer dans certains cas des indices effectivement établis et publiés par les pays eux-mêmes par suite de différences dans les concepts, la couverture, les pondérations et les méthodes de calcul. On s'est efforcé d'estimer ces différences méthodologiques afin de rendre les données plus facilement comparables à l'échelle internationale. Les séries comprennent une grande quantité d'estimations faites par la FAO dans les cas où les pays n'avaient pas fourni de chiffres officiels ou semi-officiels.

Des chiffres détaillés de production sont publiés dans l'*Annuaire FAO de la production* [6].

Tableau 35: Les données sur la production de céréales se rapportent uniquement aux céréales récoltées

to say, these figures do not relate to the actual production of vegetable oils and cake/meal, but to the potential production if the total amounts produced from all oil crops were processed into oil and cake/meal in producing countries in the same year in which they were harvested. Naturally, the total production of oil crops is never processed into oil in its entirety, since depending on the crop, important quantities are also used for seed, feed and food. However, although oil and cake/meal extraction rates vary from country to country, in this table the same extraction rate for each crop has been applied for all countries. Moreover, it should be borne in mind that the crops harvested during the latter months of the year are generally processed into oil during the following year.

In spite of these deficiencies in coverage, extraction rates and time reference, the data reported here are useful as they provide a valid indication of year-to-year changes in the size of total oil-crop production. The actual production of vegetable oils in the world is about 80 percent of the production reported here. In addition, about two million tonnes of vegetable oils are produced every year from crops which are not included among those defined above. The most important of these oils are maize-germ oil and rice-bran oil. The actual world production of cake/meal derived from oil crops is also about 80 percent of the production reported in the table.

Table 37: The data refer to livestock numbers grouped into twelve-month periods ending 30 September of the year stated and cover all domestic animals irrespective of their age and place or purpose of their breeding.

Table 38: The data on roundwood refer to wood in the rough, wood in its natural state as felled or otherwise harvested, with or without bark, round, split, roughly squared or in other form (i.e. roots, stumps, burls, etc.). It may also be impregnated (e.g. telegraph poles) or roughly shaped or pointed. It comprises all wood obtained from removals, i.e. the quantities removed from forests and from trees outside the forest, including wood recovered from natural, felling and logging losses during the period — calendar year or forest year.

Table 39: The data cover (i) capture production from marine and inland fisheries and (ii) aquaculture, and are expressed in terms of live weight. They include fish, crustaceans and molluscs but exclude sponges and corals, seaweed, crocodiles, and aquatic mammals (such as whales and dolphins).

The flag of the vessel is considered as the paramount indication of the nationality of the catch. Marine fisheries data include landings by domestic craft in foreign ports and exclude landings by foreign craft in domestic ports.

pour le grain sec; celles cultivées pour le foin, le fourrage vert ou le pâturage en sont exclues.

Tableau 36: On désigne sous le nom de cultures oléagineuses l'ensemble des cultures produisant des graines, des noix ou des fruits, essentiellement destinées à l'extraction d'huiles alimentaires ou industrielles, à l'exclusion des huiles essentielles. Dans ce tableau, les chiffres se rapportent à la production totale de graines, noix et fruits oléagineux récoltés au cours de l'année de référence et sont exprimés en équivalent d'huile et en équivalent de tourteau/farine. En d'autres termes, ces chiffres ne se rapportent pas à la production effective mais à la production potentielle d'huiles végétales et de tourteau/farine dans l'hypothèse où les volumes totaux de produits provenant de toutes les cultures d'oléagineux seraient transformés en huile et en tourteau/farine dans les pays producteurs l'année même où ils ont été récoltés. Bien entendu, la production totale d'oléagineux n'est jamais transformée intégralement en huile, car des quantités importantes qui varient suivant les cultures sont également utilisées pour les semailles, l'alimentation animale et l'alimentation humaine. Toutefois, bien que les taux d'extraction d'huile et de tourteau/farine varient selon les pays, on a appliqué dans ce tableau le même taux à tous les pays pour chaque oléagineux. En outre, il ne faut pas oublier que les produits récoltés au cours des derniers mois de l'année sont généralement transformés en huile dans le courant de l'année suivante.

En dépit de ces imperfections qui concernent le champ d'application, les taux d'extraction et les périodes de référence, les chiffres présentés ici sont utiles, car ils donnent une indication valable des variations de volume que la production totale d'oléagineux enregistre d'une année à l'autre. La production mondiale effective d'huiles végétales atteint 80 pour cent environ de la production indiquée ici. En outre, environ 2 millions de tonnes d'huiles végétales sont produites chaque année à partir de cultures non comprises dans les catégories définies ci-dessus. Les principales sont l'huile de germes de maïs et l'huile de son de riz. La production mondiale effective tourteau/farine d'oléagineux représente environ 80 pour cent de production indiquée dans le tableau.

Tableau 37: Les statistiques sur les effectifs du cheptel sont groupées en périodes de 12 mois se terminant le 30 septembre de l'année indiquée et s'entendent de tous les animaux domestiques, quel que soit leur âge, leur emplacement ou le but de leur élevage.

Tableau 38: Les données sur le bois rond se réfèrent au bois brut, bois à l'état naturel, tel qu'il a été abattu ou récolté autrement, avec ou sans écorce, fendu, grossièrement équarri ou sous une autre forme (par exemple, racines, souches, loupes, etc.). Il peut être éga-

To separate capture fisheries from aquaculture production, at least two criteria must apply i.e., the human intervention in one or more of the phases of the growth cycle, and individual, corporate or state ownership of the organism reared and harvested.

Data on aquaculture production are published in the *FAO Yearbook of Fishery Statistics, Aquaculture Production* [7]; capture production statistics are published in the *Yearbook of Fishery Statistics, Capture Production* [8].

Table 40: The data generally refer to the fertilizer year 1 July-30 June.

Nitrogenous fertilizers: data refer to the nitrogen content of commercial inorganic fertilizers.

Phosphate fertilizers: data refer to commercial phosphoric acid (P_2O_5) and cover the P_2O_5 of superphosphates, ammonium phosphate and basic slag.

Potash fertilizers: data refer to K_2O content of commercial potash, muriate, nitrate and sulphate of potash, manure salts, kainit and nitrate of soda potash.

Data on fertilizer production, consumption and trade are available in FAO's *Fertilizer Yearbook* [4].

lement imprégné (par exemple, dans le cas des poteaux télégraphiques) et dégrossi ou taillé en pointe. Cette catégorie comprend tous les bois provenant des quantités enlevées en forêt ou provenant des arbres poussant hors forêt, y compris le volume récupéré sur les déchets naturels et les déchets d'abattage et de transport pendant la période envisagée (année civile ou forestière).

Tableau 39: Les données ont trait (i) à la pêche maritime et intérieure et (ii) à l'aquaculture, et sont exprimées en poids vif. Elles comprennent poissons, crustacés et mollusques, mais excluent éponges, coraux, algues, crocodiles et les mammifères aquatiques (baleines, dauphins, etc.).

Le pavillon du navire est considéré comme la principale indication de la nationalité de la prise.

Les données de pêche maritime comprennent les quantités débarquées par des bateaux nationaux dans des ports étrangers et excluent les quantités débarquées par des bateaux étrangers dans des ports nationaux.

Pour séparer la production d'aquaculture de la pêche de capture, au moins deux critères doivent se vérifier, c'est-à-dire l'intervention humaine dans une ou plusieurs des phases du cycle de croissance, et l'appartenance de l'organisme élevé et récolté à une personne physique, à une personne morale ou à l'état.

Les données sur la production de l'aquaculture sont publiées dans l'*Annuaire statistique des pêches, production de l'aquaculture* [7]; celles sur les captures sont publiées dans l'*Annuaire statistique des pêches, captures* [8].

Tableau 40: Les données sur les engrais se rapportent en général à une période d'un an comptée du 1er juillet au 30 juin.

Engrais azotés: les données se rapportent à la teneur en azote des engrais commerciaux inorganiques.

Engrais phosphatés: les données se rapportent à l'acide phosphorique (P_2O_5) et englobent la teneur en (P_2O_5) des superphosphates, du phosphate d'ammonium et des scories de déphosphoration.

Engrais potassiques: les données se rapportent à la teneur en K_2O des produits potassiques commerciaux, muriate, nitrate et sulfate de potasse, sels d'engrais, kainite et nitrate de soude potassique.

On trouvera des chiffres relatifs à la production, à la consommation et aux échanges d'engrais dans l'*Annuaire FAO des engrais* [4].

données pour les statistiques industrielles.

- 1 Original data in units of weight. Computed on the basis of one million cigarettes per ton.
- 2 Source: U.S. Department of Agriculture, (Washington, D.C.).
- 3 Including cigars.
- 4 Twelve months ending 30 June of the year stated.
- 5 Including cigarillos.
- 6 Beginning 1999, data are confidential.
- 7 Beginning 1997, data are confidential.
- 8 Source: Food and Agriculture Organization of the United Nations (FAO), (Rome).
- 9 Sales.
- 10 Twelve months ending 7 July of the year stated.
- 11 Production by large and medium scale establishments only.
- 12 Production by establishments employing 50 or more persons.
- 13 Production by establishments employing 10 or more persons.
- 14 Twelve months beginning 1 April of the year stated.
- 15 Break in series; data prior to the sign not comparable to following years.
- 16 Government production only.
- 17 Twelve months beginning 16 July of the year stated.
- 18 Production by establishments employing 20 or more persons.
- 19 Beginning August 1999, national production discontinued.
- 20 Excluding the Transnistria region.

- 1 Données d'origine exprimées en poids. Calcul sur la base d'un million cigarettes par tonne.
- 2 Source: "U.S. Department of Agriculture" (Washington, D.C.).
- 3 Y compris les cigares.
- 4 Période de douze mois finissant le 30 juin de l'année indiquée.
- 5 Y compris les cigarillos.
- 6 A partir de 1999, les données sont confidentielles.
- 7 A partir 1997, les données sont confidentielles.
- 8 Source: Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO), (Rome).
- 9 Ventes.
- 10 Période de douze mois finissant le 7 juillet de l'année indiquée.
- 11 Production des grandes et moyennes entreprises seulement.
- 12 Production des établissements occupant 50 personnes ou plus.
- 13 Production des établissements occupant 10 personnes ou plus.
- 14 Période de douze mois commençant le 1er avril de l'année indiquée.
- 15 Marque une interruption dans la série et la non-comparabilité des données précédant le symbole.
- 16 Production de l'Etat seulement.
- 17 Période de douze mois commençant le 16 juillet de l'année indiquée.
- 18 Production des établissements occupant 20 personnes ou plus.
- 19 A partir d'août 1999, la production nationale a été discontinuée.
- 20 Non compris la région de Transnistria.

- 1 Including assembly.
- 2 Finished and partly finished.
- 3 Twelve months ending 30 June of the year stated.
- 4 Beginning 1995, data are confidential.
- 5 Production by establishments employing 5 or more persons.
- 6 Shipments.
- 7 Trucks only.
- 8 Excluding production for armed forces.
- 9 Including motor coaches and buses.
- 10 Break in series; data prior to the sign not comparable to following years.
- 11 Production by establishments employing 50 or more persons.
- 12 Production by establishments employing 10 or more persons.
- 13 Including vans and buses.
- 14 Government production only.
- 15 Sales.
- 16 Production by establishments employing 20 or more persons.
- 17 Including special-purpose vehicles.
- 18 Including buses.

- 1 Y compris le montage.
- 2 Finis et semi-finis.
- 3 Période de douze mois finissant le 30 juin de l'année indiquée.
- 4 A partir de 1995, les données sont confidentielles.
- 5 Production des établissements occupant 5 personnes ou plus.
- 6 Expéditions.
- 7 Camions seulement.
- 8 Non compris la production destinée aux forces armées.
- 9 Y compris les autocars et autobus.
- 10 Marque une interruption dans la série et la non-comparabilité des données précédant le symbole.
- 11 Production des établissements occupant 50 personnes ou plus.
- 12 Production des établissements occupant 10 personnes ou plus.
- 13 Y compris les autobus et les camionnettes.
- 14 Production de l'Etat seulement.
- 15 Ventes.
- 16 Production des établissements occupant 20 personnes ou plus.
- 17 Y compris véhicules à usages spéciaux.
- 18 Y compris les autobus.

Technical notes, tables 41-58

Industrial activity includes mining and quarrying, manufacturing and the production of electricity, gas and water. These activities correspond to the major divisions 2, 3 and 4 respectively of the *International Standard Industrial Classification of All Economic Activities* [50].

Many of the tables are based primarily on data compiled for the United Nations *Industrial Commodity Statistics Yearbook* [24]. Data taken from alternate sources are footnoted.

The methods used by countries for the computation of industrial output are, as a rule, consistent with those described in the United Nations *International Recommendations for Industrial Statistics* [49] and provide a satisfactory basis for comparative analysis. In some cases, however, the definitions and procedures underlying computations of output differ from approved guidelines. The differences, where known, are indicated in the footnotes to each table.

A. Food, beverages and tobacco

Table 41: The statistics on sugar were obtained from the database and the *Sugar Yearbook* [16] of the International Sugar Organization. The data shown cover the production and consumption of centrifugal sugar from both beet and cane, and refer to calendar years.

The consumption data relate to the apparent consumption of centrifugal sugar in the country concerned, including sugar used for the manufacture of sugar-containing products whether exported or not and sugar used for purposes other than human consumption as food. Unless otherwise specified, the statistics are expressed in terms of raw value (i.e. sugar polarizing at 96 degrees). The world and regional totals also include data for countries not shown separately whose sugar consumption was less than 10,000 metric tons.

Table 42: The data refer to meat from animals slaughtered within the national boundaries irrespective of the origin of the animals. Production figures of beef, veal, buffalo meat, pork (including bacon and ham), mutton, lamb and goat meat are in terms of carcass weight, excluding edible offals, tallow and lard. All data refer to total meat production, i.e. from both commercial and farm slaughter.

Table 43: The data refer to beer made from malt, including ale, stout, porter.

Table 44 presents data on cigarettes only.

B. Textiles and leather products

Table 45: The data on cotton fabrics refer to woven fabrics of cotton at the loom stage before undergoing finishing processes such as bleaching, dyeing,

Notes techniques, tableaux 41 à 58

L'activité industrielle comprend les industries extractives (mines et carrières), les industries manufacturières et la production d'électricité, de gaz et d'eau. Ces activités correspondent aux grandes divisions 2, 3 et 4, respectivement, de la *Classification internationale type par industrie de toutes les branches d'activité économique* [50].

Un grand nombre de ces tableaux sont établis principalement sur la base de données compilées pour l'*Annuaire de statistiques industrielles par produit des Nations Unies* [24]. Les données tirées des autres sources sont signalées par une note.

En règle générale, les méthodes employées par les pays pour le calcul de leur production industrielle sont conformes à celles dans *Recommandations internationales concernant les statistiques industrielles* des Nations Unies [49] et offrent une base satisfaisante pour une analyse comparative. Toutefois, dans certains cas, les définitions des méthodes sur lesquelles reposent les calculs de la production diffèrent des directives approuvées. Lorsqu'elles sont connues, les différences sont indiquées par une note.

A. Alimentation, boissons et tabac

Tableau 41: Les données sur le sucre proviennent de la base de données et de l'*Annuaire du sucre* [16] de l'Organisation internationale du sucre. Les données présentées portent sur la production et la consommation de sucre centrifugé à partir de la betterave et de la canne à sucre, et se rapportent à des années civiles.

Les données de la consommation se rapportent à la consommation apparente de sucre centrifugé dans le pays en question, y compris le sucre utilisé pour la fabrication de produits à base de sucre, exportés ou non, et le sucre utilisé à d'autres fins que pour la consommation alimentaire humaine. Sauf indication contraire, les statistiques sont exprimés en valeur brute (sucre polarisant à 96°). Les totaux mondiaux et régionaux comprennent également les données relatives aux pays où la consommation de sucre est inférieure à 10.000 tonnes.

Le *tableau 42* indique la production de viande provenant des animaux abattus à l'intérieur des frontières nationales, quelle que soit leur origine. Les chiffres de production de viande de bœuf, de veau, de la viande de buffle, de porc (y compris le bacon et le jambon), de mouton et d'agneau (y compris la viande de chèvre) se rapportent à la production en poids de carcasses et ne comprennent pas le saindoux, le suif et les abats comestibles. Toutes les données se rapportent à la production totale de viande, c'est-à-dire à la fois aux animaux abattus à des fins commerciales et des animaux sacrifiés à la ferme.

printing, mercerizing, lizing, etc.; those on wool refer to woollen and worsted fabrics before undergoing finishing processes. Fabrics of fine hair are excluded.

The data on woven fabrics of cellulosic and non-cellulosic fibres include fabrics of continuous and discontinuous rayon and acetate fibres, and non-cellulosic fibres other than textile glass fibres. Pile and chenille fabrics at the loom stage are also included.

Table 46: The data refer to the total production of leather footwear for children, men and women and all other footwear such as footwear with outer soles of wood or cork, sports footwear and orthopedic leather footwear. House slippers and sandals of various types are included, but rubber footwear is excluded.

C. Wood and wood products; paper and paper products

Table 47: The data refer to the aggregate of sawn-wood and sleepers, coniferous or non-coniferous. The data cover wood planed, unplaned, grooved, tongued and the like, sawn lengthwise or produced by a profile-chipping process, and planed wood which may also be finger-jointed, tongued or grooved, chamfered, rabbeted, V-jointed, beaded and so on. Wood flooring is excluded. Sleepers may be sawn or hewn.

Table 48 presents statistics on the production of all paper and paper board. The data cover newsprint, printing and writing paper, construction paper and paperboard, household and sanitary paper, special thin paper, wrapping and packaging paper and paperboard.

D. Chemicals and related products

Table 49: Statistics on all hydraulic cements used for construction (portland, metallurgic, aluminous, natural, and so on) are shown.

Table 50: The data refer to H_2SO_4 in terms of pure monohydrate sulphuric acid, including the sulphuric acid equivalent of oleum or fuming sulphuric acid.

E. Basic metal industries

Table 51 includes foundry and steel making pig-iron. Figures on crude steel include both ingots and steel for castings. In selected cases, data are obtained from the United States Bureau of Mines (Washington, D.C.), the Latin American Iron and Steel Institute (Santiago) and the United Nations Economic Commission for Europe. Detailed references to sources of data are given in the United Nations *Industrial Commodity Statistics Yearbook* [24].

Table 52: The data refer to aluminium obtained by electrolytic reduction of alumina (primary) and remelting metal waste or scrap (secondary).

Tableau 43: Les données se rapportent à la bière produite à partir du malte, y compris ale, stout et porter (bière anglaise, blonde et brune).

Le *Tableau 44* se rapporte seulement aux cigarettes.

B. Textiles et articles en cuir

Tableau 45: Les données sur les tissus de coton et de laine se rapportent aux tissus de coton, avant les opérations de finition, c'est-à-dire avant d'être blanchis teints, imprimés, mercerisés, glacés, etc., et aux tissus de laine cardée ou peignée, avant les opérations de finition. A l'exclusion des tissus de poils fins.

Les données sur les tissus de fibres cellulosiques et non-cellulosiques comprennent les tissus sortant du métier à tisser de fibres de rayonne et d'acétate et tissus composés de fibres non cellulosiques, autres que les fibres de verre, continues ou discontinues. Cette rubrique comprend les velours, peluches, tissus boucles et tissus chenille.

Tableau 46: Les données se rapportent à la production totale de chaussures de cuir pour enfants, hommes et dames et toutes les autres chaussures telles que chaussures à semelles en bois ou en liège, chaussures pour sports et orthopédiques en cuir. Chaussures en caoutchouc ne sont pas compris.

C. Bois et produits dérivés; papier et produits dérivés

Tableau 47: Les données sont un agrégat des sciages de bois de conifères et de non-conifères et des traverses de chemins de fer. Elles comprennent les bois rabotés, non rabotés, rainés, languetés, etc. sciés en long ou obtenus à l'aide d'un procédé de profilage par enlèvement de copeaux et les bois rabotés qui peuvent être également à joints digitiformes languetés ou rainés, chanfreinés, à feuillures, à joints en V, à rebords, etc. Cette rubrique ne comprend pas les éléments de parquet en bois. Les traverses de chemin de fer comprennent les traverses sciées ou équarées à la hache.

Le *tableau 48* présente les statistiques sur la production de tout papier et carton. Les données comprennent le papier journal, les papiers d'impression et d'écriture, les papiers et cartons de construction, les papiers de ménage et les papiers hygiéniques, les papiers minces spéciaux, les papiers d'emballage et d'emballage et carton.

D. Produits chimiques et apparentés

Tableau 49: Les données sur tous les ciments hydrauliques utilisés dans la construction (portland métallurgique, alumineux, naturel, etc.) sont présentées.

Tableau 50: Les données se rapportent au H_2SO_4 sur la base de l'acide sulfurique monohydraté, y compris l'équivalent en acide sulfurique de l'oléum ou acide sulfurique fumant.

F. *Fabricated metal products, machinery and equipment*

Table 53 presents data on the total production of all kinds of radio and television receivers.

Table 54: Passenger cars include three- and four-wheeled road motor vehicles other than motorcycle combinations, intended for the transport of passengers and seating not more than nine persons (including the driver), which are manufactured wholly or mainly from domestically-produced parts and passenger cars shipped in "knocked-down" form for assembly abroad.

Table 55: The data refer to refrigerators of the compression type or of the absorption type, of the sizes commonly used in private households. Insulated cabinets to contain an active refrigerating element (block ice) but no machine are excluded.

Table 56: These washing machines usually include electrically-driven paddles or rotating cylinders (for keeping the cleaning solution circulating through the fabrics) or alternative devices. Washing machines with attached wringers or centrifugal spin driers, and centrifugal spin driers designed as independent units, are included.

Table 57: The data on machine tools presented in this table include drilling and boring machines, lathes, milling machines, and metal-working presses. Drilling and boring machines refer to metal-working machines fitted with a baseplate, stand or other device for mounting on the floor, or on a bench, wall or another machine. Lathes refer to metal-working lathes of all kinds, whether or not automatic, including slide lathes, vertical lathes, capstan and turret lathes, production (or copying) lathes. Milling machines refer to metal-working machines designed to work a plane or profile surface by means of rotating tools, known as milling cutters. Metal-working presses are mechanical, hydraulic and pneumatic presses used for forging, stamping, cutting out, etc. Forge hammers are excluded. Detailed product definitions are given in the United Nations *Industrial Commodity Statistics Yearbook* [24].

Table 58 presents data on lorries, distinguishing between lorries assembled from imported parts and those manufactured wholly or mainly from domestically-produced parts. Both include road motor vehicles designed for the conveyance of goods, including vehicles specially equipped for the transport of certain goods, and articulated vehicles (that is, units made up of a road motor vehicle and a semi-trailer). Ambulances, prison vans and special purpose lorries and vans, such as fire-engines are excluded.

E. *Industries métallurgiques de base*

Tableau 51: Les données se rapportent à la production de fonte et d'acier. Les données sur l'acier brut comprennent les lingots et l'acier pour moulage. Dans certains cas, les données proviennent du United States Bureau of Mines (Washington, D.C.), de l'Institut latino-américain du fer et de l'acier (Santiago) et de la Commission économique pour l'Europe. Pour plus de détails sur les sources de données, se reporter à l'*Annuaire des statistiques industrielles par produit* des Nations Unies [24].

Tableau 52: Les données se rapportent à la production d'aluminium obtenue par réduction électrolytique de l'alumine (production primaire) et par refusion de déchets métalliques (production secondaire).

F. *Fabrications métallurgiques, machines et équipements*

Tableau 53: Les données sur la production totale de postes récepteurs de radiodiffusion et de télévision de toutes sortes sont présentées.

Tableau 54: Les voitures de tourisme comprennent les véhicules automobiles routiers à trois ou quatre roues, autres que les motocycles, destinés au transport de passagers, dont le nombre de places assises (y compris celle du conducteur) n'est pas supérieur à neuf et qui sont construits entièrement ou principalement avec des pièces fabriquées dans le pays, et les voitures destinées au transport de passagers exportées en pièces détachées pour être montées à l'étranger.

Tableau 55: Les données se rapportent aux appareils frigorifiques du type à compression ou à absorption de la taille des appareils communément utilisés dans les ménages. Cette rubrique ne comprend pas les glacières conçues pour contenir un élément frigorifique actif (glace en bloc) mais non un équipement frigorifique.

Tableau 56: Ces machines à laver comprennent généralement des pales ou des cylindres rotatifs (destinés à assurer le brassage continu du liquide et du linge) ou des dispositifs à mouvements alternés, mus électriquement. Cette rubrique comprend les machines à laver avec essoreuses à rouleau ou essoreuses centrifuges et les essoreuses centrifuges conçues comme des appareils indépendants.

Tableau 57: Les données sur les machines-outils présentés dans ce tableau comprennent les perceuses, tours, fraiseuses, et presses pour le travail des métaux. Perceuses se rapportent aux machines-outils pour le travail des métaux, munies d'un socle, d'un pied ou d'un autre dispositif permettant de les fixer au sol, à un établi, à une paroi ou à une autre machine. Tours se rapportent aux tours à métaux, de tous types, automatiques ou non, y compris les tours parallèles, les tours verticaux, les tours à revolver, les tours à reproduire. Fraiseuses se rapportent

aux machines-outils pour le travail des métaux conçues pour usiner une surface plane ou un profil au moyen d'outils tournants appelés fraises. Presses pour le travail des métaux se rapportent aux presses à commande mécanique, hydraulique et pneumatique servant à forger, à estamper, à matricer etc. Cette rubrique ne comprend pas les outils agissant par chocs. Pour plus de détails sur les description des produits se reporter à l'*Annuaire des statistiques industrielles par produit* [24] des Nations Unies.

Tableau 58 présente les données sur les camions et fait la distinction entre les camions assemblés à partir de pièces importées et les camions qui sont montés entièrement ou principalement avec des pièces importées. Les deux comprennent les véhicules automobiles routiers conçus pour le transport des marchandises, y compris les véhicules spécialement équipés pour le transport de certaines marchandises, et les véhicules articulés (c'est-à-dire les ensembles composés d'un véhicule automobile routier et d'une semi-remorque). Cette rubrique ne comprend pas les ambulances, les voitures cellulaires et les camions à usages spéciaux, tels que les voitures-pompes à incendie.

Source:

Organisation des Nations Unies, Division de statistique, New York, la base de données pour les statistiques des transports.

- 1 Including urban transport only.
- 2 Data refer to fiscal years ending 30 June.
- 3 Data refer to fiscal years beginning 1 July.
- 4 Including passengers carried without revenues.
- 5 Including urban railways traffic.
- 6 Including service traffic, animals, baggage and parcels.
- 7 Including service traffic.
- 8 May include service traffic.
- 9 Kowloon - Canton Railway only.
- 10 Beginning 1993, railway transport of passengers includes urban transport of passengers organized by ZET City Rail and HZ State Rail.
- 11 Including only state-owned railways.
- 12 Including passengers' baggage and parcel post (Latvia: also mail).
- 13 Including traffic of the Djibouti portion of the Djibouti-Addis

- 1 Les chemins de fer urbains seulement.
- 2 Les données se réfèrent aux exercices budgétaires finissant le 30 juin.
- 3 Les données se réfèrent aux exercices budgétaires commençant le 1er juillet.
- 4 Y compris passagers transportés gratuitement.
- 5 Y compris le trafic de chemins-de-fer urbains.
- 6 Y compris le trafic de service, les animaux, les baggages et les colis.
- 7 Y compris le trafic de service.
- 8 Le trafic de service peut être compris.
- 9 Chemin de fer de Kowloon-Canton seulement.
- 10 A compter de l'année 1993 y compris le transport urbain de passagers organisés par ZET City Rail et HZ State Rail.
- 11 Y compris chemins-de-fer de l'état seulement.
- 12 Y compris les bagages des voyageurs et les colis postaux (Lettonie : courrier aussi).
- 13 Y compris le trafic de la ligne Djibouti-Addis Abeba en Djibouti.

Source:

Organisation des Nations Unies, Division de statistique, New York, la base de données pour les statistiques des transports.

- 1 Data refer to fiscal years ending 30 June.
- 2 Including vessels in ballast.
- 3 Buenos Aires only.
- 4 Comprising Buenos Aires, Rosario, Lib. Gral. San Martin, Quequén and La Plata.
- 5 Gross registered tons.
- 6 Data refer to fiscal years beginning 1 July.
- 7 Sihanoukville Port and Phnom Penh Port.
- 8 All entrances counted.
- 9 Including Great Lakes international traffic (Canada: also St. Lawrence).
- 10 Taxable volume in thousands of cubic metres.
- 11 Including national maritime transport.
- 12 Beginning 2000, gross registered tons.
- 13 Port-au-Prince.
- 14 Data refer to fiscal years beginning 1 April.
- 15 Excluding minor and intermediate ports.
- 16 Data for Sarawak include vessels in ballast and all entrances counted.
- 17 Including vessels cleared.
- 18 Data cover only the first three quarters of the year.
- 19 Gross tonnage for a sample of Norwegian ports.
- 20 Vessels exceeding 75 gross registered tons.
- 21 Inland waterway system.
- 22 Break in series. Beginning 1999, data are based on a survey of all ports in Sweden.
- 23 Beginning 2000, including all passenger vessels and ferries.
- 24 Excluding traffic with United States Virgin Islands.

- 1 Les données se réfèrent aux exercices budgétaires finissant le 30 juin.
- 2 Y compris navires sur lest.
- 3 Buenos Aires seulement.
- 4 Buenos Aires, Rosario, Lib. Gral. San Martin, Quequén et La Plata.
- 5 Tonneaux de jauge brute.
- 6 Les données se réfèrent aux exercices budgétaires commençant le 1er juillet.
- 7 Port de Sihanoukville et Port de Phnom Penh.
- 8 Toutes entrées comprises.
- 9 Y compris trafic international des Grands Lacs (Canada: et du St. Laurent).
- 10 Volume taxable en milliers de mètres cubes.
- 11 Y compris transports maritimes nationaux.
- 12 De compter à l'année 2000, tonneaux de jauge brute.
- 13 Port-au-Prince.
- 14 Les données se réfèrent aux exercices budgétaires commençant le 1er avril.
- 15 Non compris les ports petits et moyens.
- 16 Les données pour Sarawak comprennent navires sur lest et toutes entrées comprises.
- 17 Y compris navires sortis.
- 18 Les données se réfèrent aux premières trois trimestres de l'année.
- 19 Tonnage brute pour un échantillon de ports norvégiens.
- 20 Navires dépassant 75 tonneaux de jauge brute.
- 21 Transport fluvial.
- 22 Discontinuité dans la série. A compter de 1999, les données sont basées sur une enquête menée auprès de tous les ports de Suède.
- 23 De compter à l'année 2000, y compris tous les navires à passagers et les transbordeurs.
- 24 Non compris le trafic avec les Iles Vierges américaines.

Source:

Organisation de l'aviation civile internationale (OACI), Montréal, "Recueil de statistiques – trafic, 1996 – 2000" et la base de données de l'OACI.

- 1 The statistics of France, the Netherlands, Portugal, United Kingdom and United States have been distributed between two or more regions - France (Europe, Africa, North America and Oceania), Netherlands (Europe and North America), Portugal (1997 only; Europe and Asia), United Kingdom (Europe, Asia and North America) and United States (North America and Oceania).
- 2 Includes apportionment (1/10) of the traffic of Air Afrique, a multinational airline with headquarters in Cote d'Ivoire and operated by 10 African states until 1991. From 1992 includes apportionment (1/11) of the traffic of Air Afrique and operated by 11 African states.
- 3 Includes apportionment (1/4) of the traffic of Gulf Air, a multinational airline with headquarters in Bahrain and operated by four Gulf States.
- 4 Data refer to the last six months of 1997.
- 5 Includes the apportionment of international operations performed by Scandinavian Airlines System (SAS) Denmark (2/7), Norway (2/7), Sweden (3/7).
- 6 Includes data for airlines based in the territories and dependencies of France.

- 1 Les statistiques de la France, des Pays-Bas, du Portugal, du Royaume-Uni et des Etats-Unis concernent deux régions ou plus; France (Europe, Afrique, Amérique du Nord et Océanie), Pays-Bas (Europe et Amérique du Nord), Portugal (1997 seulement; Europe et Asie), Royaume-Uni (Europe, Asie et Amérique du Nord) et Etats-Unis (Amérique du Nord et Océanie).
- 2 Ces chiffres comprennent une partie du trafic (1/10) assurée par Air Afrique, compagnie aérienne multinationale dont le siège est situé en Côte d'Ivoire et est exploitée conjointement par 10 Etats Africains jusqu'à 1991. A partir de 1992 ces chiffres comprennent une partie du trafic (1/11) assurée par Air Afrique et exploitée conjointement par 11 Etats Africains.
- 3 Ces chiffres comprennent une partie du trafic (1/4) assurée par Gulf Air, compagnie aérienne multinationale dont le siège est situé en Bahreïn et est exploitée conjointement par 4 Etats Gulf.
- 4 Pour 1997, les données se rapportent au second semestre de 1997.
- 5 Y compris une partie des vols internationaux effectués par le SAS, Danemark (2/7), Norvège (2/7) et Suède (3/7).
- 6 Y compris les données relatives aux compagnies aériennes ayant des bases d'opérations dans les territoires et dépendances de France.

- 7 Includes data for airlines based in the territories and dependancies of Netherlands.
- 8 Prior to 2000, data include those for Macao (SAR) of China.
- 9 Beginning the second half of 1997, data exclude those for Hong Kong Special Administrative Region (SAR) of China.
- 10 Includes data for airlines based in the territories and dependancies of United Kingdom.

- 7 Y compris les données relatives aux compagnies aériennes ayant des bases d'opérations dans les territoires et dépendances des Pays-Bas.
- 8 Avant 2000, y compris Macao.
- 9 A partir du second semestre de 1997, les données ne comprennent pas celles relatives à la RAS de Hong Kong de la Chine.
- 10 Y compris les données relatives aux compagnies aériennes ayant des bases d'opération dans les territoires et dépendances du Royaume-Uni.

Technical notes, tables 59-63

Table 59: Data refer to domestic and international traffic on all railway lines within each country shown, except railways entirely within an urban unit, and plantation, industrial mining, funicular and cable railways. The figures relating to passenger-kilometres include all passengers except military, government and railway personnel when carried without revenue. Those relating to ton-kilometres are freight net ton-kilometres and include both fast and ordinary goods services but exclude service traffic, mail, baggage and non-revenue governmental stores.

Table 60: For years in which a census or registration took place, the census or registration figure is shown; for other years, unless otherwise indicated, the officially estimated number of vehicles in use is shown. The time of year to which the figures refer is variable. Special purpose vehicles such as two- or three-wheeled cycles and motorcycles, trams, trolley-buses, ambulances, hearses, military vehicles operated by police or other governmental security organizations are excluded. Passenger cars includes vehicles seating not more than nine persons (including the driver), such as taxis, jeeps and station wagons. Commercial vehicles include: vans, lorries (trucks), buses, tractor and semi-trailer combinations but excludes trailers and farm tractors.

Table 61: Data refer to merchant fleets registered in each country as at 31 December, except for data prior to 1992 which refer to 30 June of the year stated. They are given in gross registered tons (100 cubic feet or 2.83 cubic metres) and represent the total volume of all the permanently enclosed spaces of the vessels to which the figures refer. Vessels without mechanical means of propulsion are excluded, but sailing vessels with auxiliary power are included.

Part A of the table refers to the total of merchant fleets registered. Part B shows data for oil tanker fleets and part C data for ore/oil and bulk carrier fleets. The data are published by Lloyd's Register of Shipping in *World Fleet Statistics* [19]. (See also <www.lrfairplay.com>).

Table 62: The figures for vessels entered and cleared, unless otherwise stated, represent the sum of the net registered tonnage of sea-going foreign and domestic merchant vessels (power and sailing) entered with cargo from or cleared with cargo to a foreign port and refer to only one entrance or clearance for each foreign voyage. Where possible, the data exclude vessels "in ballast", i.e. entering without unloading or clearing without loading goods.

Table 63: Data for total services cover both domestic and international scheduled services operated

Notes techniques, tableaux 59 à 63

Tableau 59: Les données se rapportent au trafic intérieur et international de toutes les lignes de chemins de fer du pays indiqué, à l'exception des lignes situées entièrement à l'intérieur d'une agglomération urbaine ou desservant une plantation ou un complexe industriel minier, des funiculaires et des téléphériques. Les chiffres relatifs aux voyageurs-kilomètres se rapportent à tous les voyageurs sauf les militaires, les fonctionnaires et le personnel des chemins de fer, qui sont transportés gratuitement. Les chiffres relatifs aux tonnes-kilomètres se rapportent aux tonnes-kilomètres nettes de fret et comprennent les services rapides et ordinaires de transport de marchandises, à l'exception des transports pour les besoins du service, du courrier, des bagages et des marchandises transportées gratuitement pour les besoins de l'Etat.

Tableau 60: Pour les années où a eu lieu un recensement ou un enregistrement des véhicules, le chiffre indiqué est le résultat de cette opération; pour les autres années, sauf indication contraire, le chiffre indiqué correspond à l'estimation officielle du nombre de véhicules en circulation. L'époque de l'année à laquelle se rapportent les chiffres varie. Les véhicules à usage spécial, tels que les cycles à deux ou trois roues et motocyclettes, les tramways, les trolley-bus, les ambulances, les corbillards, les véhicules militaires utilisés par la police ou par d'autres services publics de sécurité ne sont pas compris dans ces chiffres. Les voitures de tourisme comprennent les véhicules automobiles dont le nombre de places assises (y compris celle du conducteur) n'est pas supérieur à neuf, tels que les taxis, jeeps et breaks. Les véhicules utilitaires comprennent les fourgons, camions, autobus et autocars, les ensembles tracteurs-remorques et semi-remorques, mais ne comprennent pas les remorques et les tracteurs agricoles.

Tableau 61: Les données se rapportent à la flotte marchande enregistrée dans chaque pays au 31 décembre de l'année indiquée à l'exception des données qui se rapportent aux années avant 1992, qui se réfèrent à la flotte marchande au 30 juin. Elles sont exprimées en tonneaux de jauge brute (100 pieds cubes ou 2,83 mètres cubes) et représentent le volume total de tous les espaces clos en permanence dans les navires auxquels elle s'appliquent. Elles excluent les navires sans moteur, mais pas les voiliers avec moteurs auxiliaires.

Les données de la Partie A du tableau se rapportent au total de la flotte marchande enregistrée. Celles de la Partie B se rapportent à la flotte des pétroliers, et celles de la Partie C à la flotte des minéraliers et des transporteurs de vrac et d'huile. Les données sont publiées par Lloyd's Register of Shipping dans *World Fleet*

airlines registered in each country. Scheduled services include supplementary services occasioned by overflow traffic on regularly scheduled trips and preparatory flights for newly scheduled services. Freight means all goods, except mail and excess baggage, carried for remuneration. The data are published by the International Civil Aviation Organization in *Civil Aviation Statistics of the World* [11] and in the *Digest of Statistics—Traffic* [12]. (See also <www.icao.org>).

Statistics [19]. (Voir aussi <www.lrfairplay.com>).

Tableau 62: Sauf indication contraire, les données relatives aux navires entrés et sortis représentent la jauge nette totale des navires marchands de haute mer (à moteur ou à voile) nationaux ou étrangers, qui entrent ou sortent chargés, en provenance ou à destination d'un port étranger. On ne compte qu'une seule entrée et une seule sortie pour chaque voyage international. Dans la mesure du possible, le tableau exclut les navires sur lest (c'est-à-dire les navires entrant sans décharger ou sortant sans avoir chargé).

Tableau 63: Les données relatives au total des services se rapportent aux services réguliers, intérieurs ou internationaux des compagnies de transport aérien enregistrées dans chaque pays. Les services réguliers comprennent aussi les vols supplémentaires nécessités par un surcroît d'activité des services réguliers et les vols préparatoires en vue de nouveaux services réguliers. Par fret, on entend toutes les marchandises transportées contre paiement, mais non le courrier et les excédents de bagage. Les données sont publiées par l'Organisation de l'aviation civile internationale dans les *Statistiques de l'Aviation civile dans le monde* [11] et dans le *Recueil de statistiques—trafic* [12]. (Voir aussi <www.icao.org>).

- 1 Refers to the Southern African Customs Union.
- 2 Including part of the Neutral Zone.
- 3 Including Monaco.
- 4 Including San Marino.
- 5 Including Svalbard and Jan Mayen Islands.
- 6 Including Liechtenstein.

- 1 Se réfèrent à l'Union douanière d'Afrique australe.
- 2 Y compris une partie de la Zone Neutrale.
- 3 Y compris Monaco.
- 4 Y compris Saint-Marin.
- 5 Y compris îles Svalbard et Jan Mayen.
- 6 Y compris Liechtenstein.

Technical notes, tables 64 and 65

Tables 64 and 65: Data are presented in metric tons of oil equivalent (TOE), to which the individual energy commodities are converted in the interests of international uniformity and comparability.

To convert from original units to TOE, the data in original units (metric tons, terajoules, kilowatt hours, cubic metres) are multiplied by conversion factors. For a list of the relevant conversion factors and a detailed description of methods, see the United Nations *Energy Statistics Yearbook* and related methodological publications [23, 45, 46].

Table 64: Included in the production of commercial primary energy for *solids* are hard coal, lignite, peat and oil shale; *liquids* are comprised of crude petroleum and natural gas liquids; *gas* comprises natural gas; and *electricity* is comprised of primary electricity generation from hydro, nuclear, geothermal, wind, tide, wave and solar sources.

In general, data on stocks refer to changes in stocks of producers, importers and/or industrial consumers at the beginning and end of each year.

International trade of energy commodities is based on the "general trade" system, that is, all goods entering and leaving the national boundary of a country are recorded as imports and exports.

Sea/air bunkers refer to the amounts of fuels delivered to ocean-going ships or aircraft of all flags engaged in international traffic. Consumption by ships engaged in transport in inland and coastal waters, or by aircraft engaged in domestic flights, is not included.

Data on consumption refer to "apparent consumption" and are derived from the formula "production + imports - exports - bunkers +/- stock changes". Accordingly, the series on apparent consumption may in some cases represent only an indication of the magnitude of actual gross inland availability.

Included in the consumption of commercial energy for *solids* are consumption of primary forms of solid fuels, net imports and changes in stocks of secondary fuels; *liquids* are comprised of consumption of energy petroleum products including feedstocks, natural gasolene, condensate, refinery gas and input of crude petroleum to thermal power plants; *gases* include the consumption of natural gas, net imports and changes in stocks of gasworks and coke-oven gas; and *electricity* is comprised of production of primary electricity and net imports of electricity.

Table 65: The definitions of the energy commodities are as follows:

— Hard coal: Coal that has a high degree of coalification with a gross calorific value above 23,865 KJ/kg (5,700 kcal/kg) on an ash-free but moist basis, and a mean random reflectance of vitrinite of at least 0.6. Slurries, middlings and

Notes techniques, tableaux 64 et 65

Tableaux 64 et 65: Les données relatives aux divers produits énergétiques ont été converties en tonnes d'équivalent pétrole (TEP), dans un souci d'uniformité et pour permettre les comparaisons entre la production de différents pays.

Pour passer des unités de mesure d'origine à l'unité commune, les données en unités d'origine (tonnes, terajoules, kilowatt-heures, mètres cubes) sont multipliées pour les facteurs de conversion. Pour une liste des facteurs de conversion appropriée et pour des descriptions détaillées des méthodes appliquées, se reporter à l'*Annuaire des statistiques de l'énergie* des Nations Unies et aux publications méthodologiques connexes [23, 45, 46].

Tableau 64: Sont compris dans la production d'énergie primaire commerciale: pour *les solides*, la houille, le lignite, la tourbe et le schiste bitumineux; pour *les liquides*, le pétrole brut et les liquides de gaz naturel; pour *les gaz*, le gaz naturel; pour *l'électricité*, l'électricité primaire de source hydraulique, nucléaire, géothermique, éolienne, marémotrice, des vagues et solaire.

En général, les variations des stocks se rapportent aux différences entre les stocks des producteurs, des importateurs ou des consommateurs industriels au début et à la fin de chaque année.

Le commerce international des produits énergétiques est fondé sur le système du "commerce général", c'est-à-dire que tous les biens entrant sur le territoire national d'un pays ou en sortant sont respectivement enregistrés comme importations et exportations.

Les soutages maritimes/aériens se rapportent aux quantités de combustibles livrées aux navires de mer et aéronefs assurant des liaisons commerciales internationales, quel que soit leur pavillon. La consommation des navires effectuant des opérations de transport sur les voies navigables intérieures ou dans les eaux côtières n'est pas incluse, non plus que celle des aéronefs effectuant des vols intérieurs.

Les données sur la consommation se rapportent à la "consommation apparente" et sont obtenues par la formule "production + importations - exportations - soutage +/- variations des stocks". En conséquence, les séries relatives à la consommation apparente peuvent occasionnellement ne donner qu'une indication de l'ordre de grandeur des disponibilités intérieures brutes réelles.

Sont compris dans la consommation d'énergie commerciale: pour *les solides*, la consommation de combustibles solides primaires, les importations nettes et les variations de stocks de combustibles solides secondaires; pour *les liquides*, la consommation de produits pétroliers énergétiques y compris les charges d'alimentation des usines de traitement, l'essence naturelle, le condensat et le gaz de raffinerie ainsi que le pétrole brut consommé dans les centrales thermiques pour la production d'électricité; pour *les gaz*, la consommation de gaz naturel, les importations nettes et

other low-grade coal products, which cannot be classified according to the type of coal from which they are obtained, are included under hard coal.

— Lignite: Non-agglomerating coal with a low degree of coalification which retained the anatomical structure of the vegetable matter from which it was formed. Its gross calorific value is less than 17,435 KJ/kg (4,165 kcal/kg), and it contains greater than 31 per cent volatile matter on a dry mineral matter free basis.

— Peat: A solid fuel formed from the partial decomposition of dead vegetation under conditions of high humidity and limited air access (initial stage of coalification). Only peat used as fuel is included.

— Patent fuel (hard coal briquettes): A composition fuel manufactured from coal fines by shaping with the addition of a binding agent (pitch).

— Lignite briquettes: A composition fuel manufactured from lignite. The lignite is crushed, dried and molded under high pressure into an even-shaped briquette without the addition of binders.

— Peat briquettes: A composition fuel manufactured from peat. Raw peat, after crushing and drying, is molded under high pressure into an even-shaped briquette without the addition of binders.

— Coke: The solid residue obtained from coal or lignite by heating it to a high temperature in the absence or near absence of air. It is high in carbon and low in moisture and volatile matter. Several categories are distinguished: coke-oven coke; gas coke; and brown coal coke.

— Crude oil: A mineral oil consisting of a mixture of hydrocarbons of natural origin, yellow to black in color, of variable density and viscosity. Data in this category also includes lease or field condensate (separator liquids) which is recovered from gaseous hydrocarbons in lease separation facilities, as well as synthetic crude oil, mineral oils extracted from bituminous minerals such as shales and bituminous sand, and oils from coal liquefaction.

— Natural gas liquids (NGL): Liquid or liquefied hydrocarbons produced in the manufacture, purification and stabilization of natural gas. NGLs include, but are not limited to, ethane, propane, butane, pentane, natural gasolene, and plant condensate.

— Light petroleum products: Light products are defined in the table as liquid products obtained by distillation of crude petroleum at temperatures between 30°C and 350°C, and/or which have a specific gravity between 0.625 and 0.830. They comprise: aviation gasolene; motor gasolene; natural gasolene; jet fuel; kerosene; naphtha; and white spirit/industrial spirit.

— Heavy petroleum products: are defined in the table as products obtained by the distillation of crude petroleum at temperatures above 350°C, and which have a specific gravity higher than 0.83. Products which are

les variations de stocks de gaz d'usines à gaz et de gaz de cokerie; pour l'électricité, la production d'électricité primaire et les importations nettes d'électricité.

Tableau 65: Les définitions des produits énergétiques sont données ci-après :

— Houille: Charbon à haut degré de houillification et de pouvoir calorifique brut supérieur à 23 865 kJ/kg (5 700 kcal/kg), valeur mesurée pour un combustible exempt de cendres, mais humide et ayant un indice moyen de réflectance de la vitrinite au moins égal à 0,6. Les schlamms, les mixtes et autres produits du charbon de faible qualité qui ne peuvent être classés en fonction du type de charbon dont ils sont dérivés, sont inclus dans cette rubrique.

— Lignite: Le charbon non agglutinant d'un faible degré de houillification qui a gardé la structure anatomique des végétaux dont il est issu. Son pouvoir calorifique supérieur est inférieur à 17 435 kJ/kg (4 165 kcal/kg) et il contient plus de 31% de matières volatiles sur produit sec exempt de matières minérales.

— Tourbe: Combustible solide issu de la décomposition partielle de végétaux morts dans des conditions de forte humidité et de faible circulation d'air (phase initiale de la houillification). N'est prise en considération ici que la tourbe utilisée comme combustible.

— Agglomérés (briquettes de houille): Combustibles composites fabriqués par moulage au moyen de fines de charbon avec l'addition d'un liant (brai).

— Briquettes de lignite: Combustibles composites fabriqués au moyen de lignite. Le lignite est broyé, séché et moulé sous pression élevée pour donner une briquette de forme régulière sans l'addition d'un élément liant.

— Briquettes de tourbe: Combustibles composites fabriqués au moyen de tourbe. La tourbe brute, après broyage et séchage, est moulée sous pression élevée pour donner une briquette de forme régulière sans l'addition d'un élément liant.

— Coke: Résidu solide obtenu lors de la distillation de houille ou de lignite en l'absence totale ou presque total d'air. Il a un haut contenu de carbon, et a peu d'humidité et matières volatiles. On distingue plusieurs catégories de coke: coke de four; coke de gaz; et coke de lignite.

— Pétrole brut: Huile minérale constituée d'un mélange d'hydrocarbures d'origine naturelle, de couleur variant du jaune au noir, d'une densité et d'une viscosité variable. Figurent également dans cette rubrique les condensats directement récupérés sur les sites d'exploitation des hydrocarbures gazeux (dans les installations prévues pour la séparation des phases liquide et gazeuse), le pétrole brut synthétique, les huiles minérales brutes extraites des roches bitumineuses telles que schistes, sables asphaltiques et les huiles issues de la liquéfaction du charbon.

— Liquides de gaz naturel (LGN): Hydrocarbures liquides ou liquéfiés produits lors de la fabrication, de la purification et de la stabilisation du gaz naturel. Les liquides de gaz naturel comprennent l'éthane, le propane, le butane, le pentane, l'essence naturelle et les conden-

not used for energy purposes, such as insulating oils, lubricants, paraffin wax, bitumen and petroleum coke, are excluded. Heavy products comprise residual fuel oil and gas-diesel oil (distillate fuel oil).

— Liquefied petroleum gas (LPG): Hydrocarbons which are gaseous under conditions of normal temperature and pressure but are liquefied by compression or cooling to facilitate storage, handling and transportation. It comprises propane, butane, or a combination of the two. Also included is ethane from petroleum refineries or natural gas producers' separation and stabilization plants.

— Refinery gas: Non-condensable gas obtained during distillation of crude oil or treatment of oil products (e.g. cracking) in refineries. It consists mainly of hydrogen, methane, ethane and olefins.

— Natural gas: Gases consisting mainly of methane occurring naturally in underground deposits. It includes both non-associated gas (originating from fields producing only hydrocarbons in gaseous form) and associated gas (originating from fields producing both liquid and gaseous hydrocarbons), as well as methane recovered from coal mines and sewage gas. Production of natural gas refers to dry marketable production, measured after purification and extraction of natural gas liquids and sulphur. Extraction losses and the amounts that have been reinjected, flared, and vented are excluded from the data on production.

— Electricity production refers to gross production, which includes the consumption by station auxiliaries and any losses in the transformers that are considered integral parts of the station. Included also is total electric energy produced by pumping installations without deduction of electric energy absorbed by pumping.

le butane, le pentane, l'essence naturelle et les condensats d'usine, sans que la liste soit limitative.

— Produits pétroliers légers: Les produits légers sont définis ici comme des produits liquides obtenus par distillation du pétrole brut à des températures comprises entre 30°C et 350°C et/ou ayant une densité comprise entre 0,625 et 0,830. Ces produits sont les suivants: l'essence aviation; l'essence auto; l'essence naturelle; les carburateurs du type essence et du type kérosène; le pétrole lampant; les naphthas; et le white spirit/essences spéciales.

— Produits pétroliers lourds sont définis ici comme des produits obtenus par distillation du pétrole brut à des températures supérieures à 350°C et ayant une densité supérieure à 0,83. En sont exclus les produits qui ne sont pas utilisés à des fins énergétiques, tels que les huiles isolantes, les lubrifiants, les paraffines, le bitume et le coke de pétrole. Les produits lourds comprennent le mazout résiduel et le gazole/carburant diesel (mazout distillé).

— Gaz de pétrole liquéfiés (GPL): Hydrocarbures qui sont à l'état gazeux dans des conditions de température et de pression normales mais sont liquéfiés par compression ou refroidissement pour en faciliter l'entreposage, la manipulation et le transport. Dans cette rubrique figurent le propane et le butane ou un mélange de ces deux hydrocarbures. Est également inclus l'éthane produit dans les raffineries ou dans les installations de séparation et de stabilisation des producteurs de gaz naturel.

— Gaz de raffinerie: Comprend les gaz non condensables obtenus dans les raffineries lors de la distillation du pétrole brut ou du traitement des produits pétroliers (par craquage par exemple). Il s'agit principalement d'hydrogène, de méthane, d'éthane et d'oléfines.

— Gaz naturel: Est constitué de gaz, méthane essentiellement, extraits de gisements naturels souterrains. Il peut s'agir aussi bien de gaz non associé (provenant de gisements qui produisent uniquement des hydrocarbures gazeux) que de gaz associé (provenant de gisements qui produisent à la fois des hydrocarbures liquides et gazeux) ou de méthane récupéré dans les mines de charbon et le gaz de gadoues. La production de gaz naturel se rapporte à la production de gaz commercialisable sec, mesurée après purification et extraction des condensats de gaz naturel et du soufre. Les quantités réinjectées, brûlées à la torchère ou éventées et les pertes d'extraction sont exclus des données sur la production.

— Production d'électricité se rapporte à la production brute, qui comprend la consommation des équipements auxiliaires des centrales et les pertes au niveau des transformateurs considérés comme faisant partie intégrante de ces centrales, ainsi que la quantité totale d'énergie électrique produits par les installations de pompage sans déductions de l'énergie électrique absorbée par ces dernières.

Sources:

Food and Agriculture Organization of the United Nations (FAO), Rome, "FAO Production Yearbook 2001", the FAOSTAT database and the "Global Forest Resources Assessment 2000;" and the United Nations Environment Programme (UNEP), World Conservation Monitoring Centre, "United Nations List of Protected Areas".

- 1 Calculated by the World Conservation Monitoring Centre based on total area which includes land area and inland waters. Percentages are inflated due to the inclusion of marine protected areas.
- 2 FAO estimate.
- 3 Data generally include those for Taiwan Province of China, except for data on protected areas.
- 4 Data refer to the Gaza Strip.
- 5 Area free from ice.
- 6 Includes about 27 million hectares of cultivated grassland.

Sources:

Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO), Rome "Annuaire FAO de la production 2001" et la base de données de FAOSTAT et "Global Forest Resources Assessment 2000;" et le Programme des Nations Unies pour l'environnement (PNUE), Centre mondial de surveillance pour la conservation, "United Nations List of Protected Areas".

- 1 Les pourcentages sont calculés par le Centre mondial de surveillance pour la conservation par rapport à la superficie totale des pays, qui comprend la superficie des terres et celle des eaux intérieures. Les pourcentages sont majorés, du fait qu'on tient compte des zones marines protégées.
- 2 Estimation de la FAO.
- 3 Les données comprennent en général les chiffres pour la province de Taiwan, les données sur les aires protégées exceptées.
- 4 Les données se rapportent à la Zone de Gaza.
- 5 Superficie non couverte de glace.
- 6 Y compris 27 millions d'hectares d'herbages cultivés.

The majority of the data have been taken from the CDIAC database; all other data have been taken from the UNFCCC database and are footnoted accordingly.

La majorité des données proviennent de la base de données du CDIAC ; les autres, qui proviennent de la base de données du Secrétariat de la CCCC, sont signalées par une note.

Technical notes, tables 66-68

Table 66: The data on land and forest cover are compiled by the Food and Agriculture Organization of the United Nations (FAO). The protected areas data are taken from the United Nations Environment Programme (UNEP) World Conservation Monitoring Centre.

FAO's definitions of the land categories and forest cover are as follows:

Land area: Total area excluding area under inland water bodies. The definition of inland water bodies generally includes major rivers and lakes.

Arable land: Land under temporary crops (double-cropped areas are counted only once); temporary meadows for mowing or pasture; land under market and kitchen gardens; and land temporarily fallow (less than five years). Abandoned land resulting from shifting cultivation is not included in this category. Data for "arable land" are not meant to indicate the amount of land that is potentially cultivable.

Permanent crops: Land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest, such as cocoa, coffee and rubber. This category includes land under flowering shrubs, fruit trees, nut trees and vines, but excludes land under trees grown for wood or timber.

Forest: In the *Global Forest Resources Assessment 2000* [10] the following definition is used for forest. Forest includes natural forests and forest plantations and is used to refer to land with a tree crown cover (or equivalent stocking level) of more than 10 per cent and area of more than 0.5 ha. The trees should be able to reach a minimum height of 5 m at maturity *in situ*. Forest may consist either of closed forest formations where trees of various storeys and undergrowth cover a high proportion of the ground; or open forest formations with a continuous vegetation cover in which the tree crown cover exceeds 10 per cent. Young natural stands and all plantations established for forestry purposes that have yet to reach a crown density of 10 per cent or tree height of 5 m are included under forest, as are areas normally forming part of the forest area that are temporarily unstocked as a result of human intervention or natural causes but that are expected to revert to forest.

The *United Nations List of Protected Areas* [33] is the definitive list of the world's national parks and reserves. It is compiled by the UNEP World Conservation Monitoring Centre working in close collaboration with the World Conservation Union (IUCN) World Commission on Protected Areas. Information is provided by national protected areas authorities and the secretariats of international conventions and programmes.

Notes techniques, tableaux 66 à 68

Tableau 66: Les données relatives aux terres et à la superficie forestière sont compilées par l'Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO). Les données relatives aux aires protégées viennent du Centre mondial de surveillance pour la conservation du Programme des Nations Unies pour l'environnement (PNUE).

Les définitions de la FAO en ce qui concerne les terres et la superficie forestière sont les suivantes:

Superficie totale des terres: Superficie totale, à l'exception des eaux intérieures. Les eaux intérieures désignent généralement les principaux fleuves et lacs.

Terres arables: Terres affectées aux cultures temporaires (les terres sur lesquelles est pratiquée la double culture ne sont comptabilisées qu'une fois), prairies temporaires à faucher ou à pâturer, jardins maraîchers ou potagers et terres en jachère temporaire (moins de cinq ans). Cette définition ne comprend pas les terres abandonnées du fait de la culture itinérante. Les données relatives aux terres arables ne peuvent être utilisées pour calculer la superficie des terres aptes à l'agriculture.

Cultures permanentes: Superficie des terres avec des cultures qui occupent la terre pour de longues périodes et qui ne nécessitent pas d'être replantées après chaque récolte, comme le cacao, le café et le caoutchouc. Cette catégorie comprend les terres plantées d'arbustes à fleurs, d'arbres fruitiers, d'arbres à noix et de vignes, mais ne comprend pas les terres plantées d'arbres destinés à la coupe.

Superficie forestière: Dans l'*Évaluation des ressources forestières mondiales 2000* [10], la FAO a défini les forêts comme suit : les forêts, qui comprennent les forêts naturelles et les plantations forestières, sont des terres où le couvert arboré (ou la densité de peuplement équivalente) est supérieur à 10 % et représente une superficie de plus de 0,5 ha. Les arbres doivent être susceptibles d'atteindre sur place, à leur maturité, une hauteur de 5 m minimum. Il peut s'agir de forêts denses, où les arbres de différente hauteur et le sous-bois couvrent une proportion importante du sol, ou de forêts claires, avec un couvert végétal continu, où le couvert arboré est supérieur à 10 %. Les jeunes peuplements naturels et toutes les plantations d'exploitation forestière n'ayant pas encore atteint une densité de couvert arboré de 10 % ou une hauteur de 5 m sont inclus dans les forêts, de même que les aires formant naturellement partie de la superficie forestière mais temporairement déboisées du fait d'une intervention de l'homme ou de causes naturelles, mais devant redevenir boisées.

Countries vary considerably in their mechanisms for creating and maintaining systems of protected areas. In order to facilitate international comparisons for protected areas, IUCN has adopted a definition of a protected area which is, an area of land and/or sea especially dedicated to the protection and maintenance of biological diversity, and of natural and associated cultural resources, and managed through legal or other effective means.

IUCN has defined a series of six protected area management categories, based on primary management objectives. These categories are as follows:

- Category Ia: Strict Nature Reserve;
- Category Ib: Wilderness Area;
- Category II: National Park;
- Category III: Natural Monument;
- Category IV: Habitat/Species Management Area;
- Category V: Protected Landscape/Seascape;
- Category VI: Managed Resource Protected Area.

Table 67: The sources of the data presented on the emissions of carbon dioxide (CO₂) are the Carbon Dioxide Information Analysis Center (CDIAC) of the Oak Ridge National Laboratory in the USA and the Secretariat of the United Nations Framework Convention on Climate Change (UNFCCC). The majority of the data have been taken from the CDIAC database. The data taken from the UNFCCC database are footnoted accordingly.

The CDIAC estimates of CO₂ emissions are derived primarily from United Nations energy statistics on the consumption of liquid and solid fuels and gas consumption and flaring, and from cement production estimates from the Bureau of Mines of the U.S. Department of Interior. The emissions presented in the table are in units of 1,000 metric tons of carbon dioxide (CO₂), to convert CO₂ into carbon, multiply the data by 0.272756. Full details of the procedures for calculating emissions are given in *Global, Regional, and National Annual CO₂ Emissions Estimates from Fossil Fuel Burning, Hydraulic Cement Production, and Gas Flaring* [3] and in the CDIAC Web site (see <<http://cdiac.esd.ornl.gov>>). Relative to other industrial sources for which CO₂ emissions are estimated, statistics on gas flaring activities are sparse and sporadic. In countries where gas flaring activities account for a considerable proportion of the total CO₂ emissions, the sporadic nature of gas flaring statistics may produce spurious or misleading trends in national CO₂ emissions over the period covered by the table.

The UNFCCC data in the table are indicated by a footnote, and cover (a) the countries that joined the convention (except for Belarus which joined in May 2000) and (b) countries which voluntarily reported time-series

La Liste des Nations Unies des zones protégées [33] est la liste la plus fiable des parcs et réserves naturels du monde. Elle est établie par le Centre mondial de surveillance pour la conservation du PNUE, en collaboration étroite avec la Commission mondiale des aires protégées de l'Union mondiale pour la nature (UICN). Les renseignements sont communiqués par les services nationaux responsables des aires protégées et les secrétariats des conventions et programmes internationaux.

Les mécanismes nationaux de création et d'entretien des systèmes de zones protégées sont très différents d'un pays à l'autre. Pour faciliter les comparaisons internationales, l'UICN a adopté une définition des aires protégées, zone terrestre ou marine (ou les deux) spécialement consacrée à la protection et à la sauvegarde de la diversité biologique et des ressources naturelles, ainsi que des ressources culturelles qui y sont associées, dont la gestion est assurée par des moyens juridiques ou autres moyens efficaces.

L'UICN a défini une série de six catégories de gestion des aires protégées, en fonction des objectifs principaux:

- Catégorie Ia: Réserve naturelle intégrale;
- Catégorie Ib: Zone vierge;
- Catégorie II: Parc national;
- Catégorie III: Monument naturel;
- Catégorie IV: Aire de gestion des habitats/des espèces;
- Catégorie V: Paysage terrestre/marin protégé;
- Catégorie VI: Aire protégée de ressources naturelles.

Tableau 67: Les données sur les émissions de dioxyde de carbone (CO₂) proviennent du Carbon Dioxide Information Analysis Center (CDIAC) du Oak Ridge National Laboratory (États-Unis) et du Secrétariat de la convention-cadre concernant les changements climatiques (CCCC) des Nations Unies. La majorité des données proviennent de la base de données du CDIAC. Les données qui proviennent du Secrétariat de la CCCC sont signalées par une note.

Les estimations du Carbon Dioxide Information Analysis Center sont obtenues essentiellement à partir des statistiques de l'énergie des Nations Unies relatives à la consommation de combustibles liquides et solides, à la production et à la consommation de gaz de torche, et des chiffres de production de ciment du Bureau of Mines du Department of Interior des États-Unis. Les émissions sont indiquées en milliers de tonnes de dioxyde de carbone (à multiplier par 0,272756 pour avoir les chiffres de carbone). On peut voir dans le détail les méthodes utilisées pour calculer les émissions dans *Global, Regional, and National Annual CO₂ Emissions Estimates from Fossil Fuel Burning, Hydraulic Cement Production, and Gas Flaring* [3] et sur le site Web du Carbon Dioxide

data on their emissions to the UNFCCC. The CO₂ data from national reports to the Secretariat of the UNFCCC are based on the methodology of the Intergovernmental Panel for Climate Change (IPCC) 1996 Guidebook.

Table 68: Chlorofluorocarbons (CFCs) are synthetic compounds formerly used as refrigerants and aerosol propellants and known to be harmful to the ozone layer of the atmosphere. In the Montreal Protocol on Substances that Deplete the Ozone Layer, CFCs to be measured are found in vehicle air conditioning units, domestic and commercial refrigeration and air conditioning/heat pump equipment, aerosol products, portable fire extinguishers, insulation boards, panels and pipe covers, and pre-polymers.

The Parties to the Montreal Protocol on Substances that Deplete the Ozone Layer report data on CFCs to the Ozone Secretariat of the United Nations Environment Programme. The data on CFCs are shown in ozone depleting potential (ODP) tons that are calculated by multiplying the quantities in metric tons reported by the Parties, by the ODP of that substance, and added together.

Consumption is defined as production plus imports, minus exports of controlled substances. Feedstocks are exempt and are therefore subtracted from the imports and/or production. Similarly, the destroyed amounts are also subtracted. Negative numbers can occur when destruction and/or exports exceed production plus imports, implying that the destruction and/or exports are from stockpiles.

Information Analysis Center (voir <<http://cdiac.esd.ornl.gov>>). Par rapport à d'autres sources industrielles pour lesquelles on calcule les émissions de CO₂, les statistiques sur la production de gaz de torche sont rares et sporadiques. Dans les pays où cette production représente une proportion considérable de l'ensemble des émissions de dioxyde de carbone, on peut voir apparaître de ce fait des chiffres parasites ou trompeurs pour ce qui est des tendances des émissions nationales de dioxyde de carbone durant la période visée par le tableau.

Les données provenant du secrétariat de la Convention-cadre, qui sont signalées par une note, couvrent (a) les pays qui ont adhéré à la Convention (sauf pour le Bélarus, qui y a adhéré en mai 2000), et (b) les pays qui ont bénévolement communiqué des séries chronologiques sur leurs émissions au secrétariat. Les données sur le CO₂ tirées des rapports de pays au secrétariat de la Convention-cadre ont été obtenues par les méthodes recommandées dans le Manuel de 1996 du Groupe intergouvernemental d'experts pour l'étude du changement climatique.

Tableau 68: Les chlorofluorocarbones (CFC) sont des substances de synthèse utilisées comme réfrigérants et propulseurs d'aérosols, dont on sait qu'elles appauvrissent la couche d'ozone. Aux termes du Protocole de Montréal relatif à des substances qui appauvrissent la couche d'ozone, la production de certains CFC doit être mesurée : ils sont utilisés dans les climatiseurs de véhicules, le matériel domestique et commercial de réfrigération et de climatisation (pompes à chaleur), les produits sous forme d'aérosols, les extincteurs d'incendie portables, les planches, panneaux et gaines isolants, et les prépolymères.

Les Parties au Protocole de Montréal communiquent leurs données concernant les CFC au secrétariat de l'ozone du Programme des Nations Unies pour l'environnement. Les données sur les CFC, indiquées en tonnes de potentiel d'appauvrissement de la couche d'ozone (PAO), sont calculées en multipliant le nombre de tonnes signalé par les Parties par le potentiel d'appauvrissement (coefficient) de la substance considérée, et en faisant la somme de ces PAO.

La consommation est définie comme production de substances contrôlées, plus les importations, moins les exportations. Les produits intermédiaires de l'industrie sont exemptés, et on les soustrait donc des importations et/ou de la production. De même, on soustrait aussi les quantités détruites. On peut obtenir des quantités négatives, lorsque les quantités détruites et/ou exportées sont supérieures à la somme production + importations, ce qui signifie que les quantités détruites ou exportées ont été prélevées sur les stocks accumulés.

- 1 Not including data for the productive sector.
- 2 Not including labour costs at the Ministry of Public Health.
- 3 Figures in millions.
- 4 Under-estimated or based on under-estimated data.
- 5 Data refer to current expenditure only.
- 6 Partial estimates.
- 7 Data refer to government funds only.
- 8 Data refer to funds from abroad only.
- 9 Defence excluded (all or mostly).
- 10 Data refer to R&D activities performed in public enterprises.
- 11 Not including data for the productive sector (non-integrated R&D) and the general service sector.
- 12 Data relate to the Scientific Research Council only.
- 13 National estimate or projection adjusted, if necessary, by OECD.
- 14 Receipts from R&D.
- 15 Not including data for law, humanities and education.
- 16 Not including funds from abroad.
- 17 Part of the total revenue data which could be defined as "revenue for R&D purposes"; detailed specification of sources are not available.
- 18 Denomination change in 1999.
- 19 Due to methodological changes in 1991 data are not comparable with previous years.
- 20 Data refer to scientific and technological activities (STA).
- 21 Data refer to the higher education sector only.
- 22 Data refer to the general service sector only.
- 23 Data refer to the productive sector only.
- 24 Data relate to one research institute only.
- 25 Not including data for social sciences and humanities.
- 26 Data refer to R&D activities which are concentrated mainly in government-financed research establishments. Social sciences and the humanities in the higher education and general service sectors are not included.
- 27 Including funds from private non-profit institutions.

- 1 Non compris les données du secteur de la production.
- 2 Non compris les coûts salariaux du Ministère de la Santé Publique.
- 3 Chiffres en millions.
- 4 Sous-estimation ou chiffre établi sur la base de données sous-estimées.
- 5 Les données se réfèrent aux dépenses courantes seulement.
- 6 Estimations partielles.
- 7 Les données se réfèrent aux fonds publics seulement.
- 8 Les données se réfèrent aux fonds étrangers seulement.
- 9 Non compris la défense.
- 10 Les données se réfèrent aux activités de R-D dans les entreprises publiques.
- 11 Non compris les données du secteur de la production (activités de R-D non intégrées) et du secteur de service général.
- 12 Les données se réfèrent au "Scientific Research Council" seulement.
- 13 Estimations ou projections ajustées pour OCED s'il le faut.
- 14 Recettes de la recherche et développement.
- 15 Non compris les données pour droit, sciences humaines et sciences de l'éducation.
- 16 Non compris les fonds étrangers.
- 17 Partie des données du revenu total que peut être définie comme revenu pour la recherche et développement. Une spécification détaillée des sources n'est pas disponible.
- 18 Changement de dénomination en 1999.
- 19 Suite à des changements de méthodologie en 1991, les données ne sont pas comparables avec celles des années précédentes.
- 20 Les données se réfèrent aux activités scientifiques et technologiques (AST).
- 21 Les données se réfèrent au secteur de l'enseignement supérieur seulement.
- 22 Les données se réfèrent au secteur de service général seulement.
- 23 Les données se réfèrent au secteur de la production seulement.
- 24 Les données ne concernent qu'un institut de recherche.
- 25 Non compris les données pour les sciences sociales et humaines.
- 26 Les données se réfèrent aux activités de R-D concentrées pour la plupart dans les établissements de recherche financés par le gouvernement. Les sciences sociales et humaines dans le secteur de service général ne sont pas inclus.
- 27 Y compris fonds des institutions privées sans but lucratif.

- 1 In 1992, the European Patent Office (EPO) was constituted by the following member countries: Austria, Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Liechtenstein, Luxembourg, Monaco, Netherlands, Portugal, Spain, Sweden, Switzerland, United Kingdom.
- 2 Members of the African Intellectual Property Organization (OAPI), which includes Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Congo, Côte d'Ivoire, Gabon, Guinea, Mali, Mauritania, Niger, Senegal, Togo.

- 1 En 1992, l'Office européen de brevets (OEB) comprenait les pays membres suivants: Allemagne, Autriche, Belgique, Danemark, Espagne, France, Grèce, Irlande, Italie, Liechtenstein, Luxembourg, Monaco, Pays-Bas, Portugal, Royaume-Uni, Suède, Suisse.
- 2 Les membres de l'Organisation africaine de la propriété intellectuelle (OAPI): Bénin, Burkina Faso, Cameroun, Congo, Côte d'Ivoire, Gabon, Guinée, Mali, Mauritanie, Niger, République centrafricaine, Sénégal, Tchad, Togo.

Technical notes, tables 69-71

Table 69: The data presented on personnel engaged in research and experimental development (R&D) are compiled by the UNESCO Institute for Statistics. The definitions and classifications applied by UNESCO in the table are based on those set out in the *Recommendation concerning the International Standardization of Statistics on Science and Technology* (for data covering the years prior to 1998) and in the *Frascati Manual* (for data referring to 1998 and on).

The three categories of personnel shown are defined as follows:

Researchers are professionals engaged in the conception or creation of new knowledge, products, processes, methods and systems, and in the planning and management of R&D projects. Post-graduate students engaged in R&D are considered as researchers. The data shown for researchers for the years prior to 1998 refer to "R&D scientists and engineers".

Technicians (and equivalent staff) comprise persons whose main tasks require technical knowledge and experience in one or more fields of engineering, physical and life sciences, or social sciences and humanities.

Other supporting staff includes skilled and unskilled craftsmen, secretarial and clerical staff participating in or directly associated with R&D projects.

More information can be found on the UNESCO Institute for Statistics Web site <www.uis.unesco.org>.

Table 70: The data presented on gross domestic expenditure on research and development are compiled by the UNESCO Institute for Statistics.

Gross domestic expenditure on R&D (GERD) is total intramural expenditure on R&D performed on the national territory during a given period. It includes R&D performed within a country and funded from abroad but excludes payments made abroad for R&D.

The sources of funds for GERD are classified according to the following five categories:

Business enterprise funds include funds allocated to R&D by all firms, organizations and institutions whose primary activity is the market production of goods and services (other than the higher education sector) for sale to the general public at an economically significant price, and those private non-profit institutes mainly serving these firms, organizations and institutions.

Government funds refer to funds allocated to R&D by the central (federal), state or local government authorities. Public enterprises funds are included in the business enterprise funds sector. These authorities also include private non-profit institutes controlled and

Notes techniques, tableaux 69 à 71

Le tableau 69: Les données présentées sur le personnel employé à des travaux de recherche scientifique et le développement expérimental (R-D) sont compilées par l'Institut de statistique de l'UNESCO. Les définitions et classifications appliquées par l'UNESCO sont basées sur la *Recommandation concernant la normalisation internationale des statistiques relatives à la science et à la technologie* (pour les chiffres des années antérieures à 1998) et sur le *Manuel de Frascati* (à compter de 1998).

Les trois catégories du personnel présentées sont définies comme suivant:

Les chercheurs sont des spécialistes travaillant à la conception ou à la création de connaissances, de produits, de procédés, de méthodes et de systèmes, et dans la planification et la gestion de projets de R-D. Les étudiants diplômés ayant des activités de R-D sont également considérés comme des chercheurs. Les données relatives aux chercheurs pour les années antérieures à 1998 se rapportent aux « scientifiques et ingénieurs employés à des travaux de R-D ».

Techniciens (et personnel assimilé) comprend des personnes dont les tâches principales requièrent des connaissances et une expérience technique dans un ou plusieurs domaines de l'ingénierie, des sciences physiques et de la vie ou des sciences sociales et humaines.

Autre personnel de soutien comprend les travailleurs, qualifiés ou non, et le personnel de secrétariat et de bureau qui participent à l'exécution des projets de R-D ou qui sont directement associés à l'exécution de tels projets.

Pour tout renseignement complémentaire, voir le site Web de l'Institut de statistique de l'UNESCO <www.uis.unesco.org>.

Tableau 70: Les données présentées sur les dépenses intérieures brutes de recherche et développement sont compilées par l'Institut de statistique de l'UNESCO.

Dépense intérieure brute de R-D (DIRD) est la dépense totale intra-muros afférente aux travaux de R-D exécutés sur le territoire national pendant une période donnée. Elle comprend la R-D exécutée sur le territoire national et financée par l'étranger mais ne tient pas compte des paiements effectués à l'étranger pour des travaux de R-D.

Les sources de financement pour la DIRD sont classées selon les cinq catégories suivantes:

Fonds des entreprises inclut les fonds alloués à la R-D par toutes les firmes, organismes et institutions dont l'activité première est la production marchande de biens ou de services (autres que dans le secteur

mainly financed by government.

Higher education funds include funds allocated to R&D by institutions of higher education comprising all universities, colleges of technology, other institutes of post-secondary education, and all research institutes, experimental stations and clinics operating under the direct control of or administered by or associated with higher educational establishments.

Private non-profit funds are funds allocated to R&D by non-market, private non-profit institutions serving the general public, as well as by private individuals and households.

Funds from abroad refer to funds allocated to R&D by institutions and individuals located outside the political frontiers of a country except for vehicles, ships, aircraft and space satellites operated by domestic organizations and testing grounds acquired by such organizations, and by all international organizations (except business enterprises) including their facilities and operations within the frontiers of a country.

The absolute figures for R&D expenditure should not be compared country by country. Such comparisons would require the conversion of national currencies into a common currency by means of special R&D exchange rates. Official exchange rates do not always reflect the real costs of R&D activities and comparisons are based on such rates can result in misleading conclusions, although they can be used to indicate a gross order of magnitude.

More information can be found on the UNESCO Institute for Statistics Web site <www.uis.unesco.org>.

Table 71: Data on patents include patent applications filed directly with the office concerned and grants made on the basis of such applications; inventors' certificates; patents of importation, including patents of introduction, revalidation patents and "patentes precaucionales"; petty patents; patents applied and granted under the Patent Cooperation Treaty (PCT), the European Patent Convention, the Havana Agreement, the Harare Protocol of the African Regional Industrial Property Organization (ARIPO) and the African Intellectual Property Organization (OAPI). The data are compiled and published by the World Intellectual Property Organization (see [37] and <www.wipo.int>).

d'enseignement supérieur) en vue de leur vente au public, à un prix qui correspond à la réalité économique, et les institutions privées sans but lucratif principalement au service de ces entreprises, organismes et institutions.

Fonds de l'Etat sont les fonds fournis à la R-D par le gouvernement central (fédéral), d'état ou par les autorités locales. Les fonds des entreprises publiques sont comprises dans ceux du secteur des entreprises. Les fonds de l'Etat incluent également les institutions privées sans but lucratif contrôlées et principalement financées par l'Etat.

Fonds de l'enseignement supérieur inclut les fonds fournis à la R-D par les établissements d'enseignement supérieur tels que toutes les universités, grandes écoles, instituts de technologie et autres établissements post-secondaires, ainsi que tous les instituts de recherche, les stations d'essais et les cliniques qui travaillent sous le contrôle direct des établissements d'enseignement supérieur ou qui sont administrés par ces derniers ou leur sont associés.

Fonds d'institutions privées à but non lucratif sont les fonds destinés à la R-D par les institutions privées sans but lucratif non marchandes au service du public, ainsi que par les simples particuliers ou les ménages.

Fonds étrangers concernent les fonds destinés à la R-D par les institutions et les individus se trouvant en dehors des frontières politiques d'un pays, à l'exception des véhicules, navires, avions et satellites utilisés par des institutions nationales, ainsi que des terrains d'essai acquis par ces institutions, et par toutes les organisations internationales (à l'exception des entreprises), y compris leurs installations et leurs activités à l'intérieur des frontières d'un pays.

Il faut éviter de comparer les chiffres absolus concernant les dépenses de R-D d'un pays à l'autre. On ne pourrait procéder à des comparaisons détaillées qu'en convertissant en une même monnaie les sommes libellées en monnaie nationale au moyen de taux de change spécialement applicables aux activités de R-D. Les taux de change officiels ne reflètent pas toujours le coût réel des activités de R-D, et les comparaisons établies sur la base de ces taux peuvent conduire à des conclusions trompeuses; toutefois, elles peuvent être utilisées pour donner une idée de l'ordre de grandeur.

Pour tout renseignement complémentaire, voir le site Web de l'Institut de statistique de l'UNESCO <www.uis.unesco.org>.

Tableau 71: Les données relatives aux brevets comprennent les demandes de brevet déposées directement auprès de l'office intéressé et brevets délivrés sur la base de telles demandes; les brevets d'invention; les brevets d'importation; y compris les brevets d'introduction, les brevets de revalidation et les brevets

“precaucionales”; les petits brevets, les brevets demandés et délivrés en vertu du traité de coopération sur les brevets, de la Convention européenne relative aux brevets, de l’Accord de la Havane, du Protocole d’Hararé de l’Organisation régionale africaine de la propriété industrielle (ARIPO) et de l’Organisation africaine de la propriété intellectuelle (OAPI). Les données sont compilées et publiées par l’Organisation mondiale de la propriété intellectuelle (voir [37] et <www.wipo.int>).

Part Four
International Economic Relations

- Chapter XVI**
International merchandise trade
(tables 72-74)
- Chapter XVII**
International tourism (tables 75-77)
- Chapter XVIII**
Balance of payments (table 78)
- Chapter XIX**
International finance (tables 79 and 80)
- Chapter XX**
Development assistance (tables 81-83)

Part Four of the *Yearbook* presents statistics on international economic relations in areas of international merchandise trade, international tourism, balance of payments and assistance to developing countries. The series cover all countries or areas of the world for which data are available.

Quatrième partie
Relations économiques internationales

- Chapitre XVI**
Commerce international des marchandises
(tableaux 72 à 74)
- Chapitre XVII**
Tourisme international (tableaux 75 à 77)
- Chapitre XVIII**
Balance des paiements (tableau 78)
- Chapitre XIX**
Finances internationales (tableaux 79 et 80)
- Chapitre XX**
Aide au développement (tableaux 81 à 83)

La quatrième partie de l'*Annuaire* présente des statistiques sur les relations économiques internationales dans les domaines du commerce international des marchandises, du tourisme international, de la balance des paiements et de l'assistance aux pays en développement. Les séries couvrent tous les pays ou les zones du monde pour lesquels des données sont disponibles.

Source:

United Nations Statistics Division, New York, trade statistics database.

+ For member states of this grouping, see Annex I - Other groupings.

The totals have been re-calculated for all periods shown according to the current composition.

1 Systems of trade: Two systems of recording trade, the General trade system (G) and the Special trade system (S), are in common use. They differ mainly in the way warehoused and re-exported goods are recorded. See the Technical notes for an explanation of the trade systems.

2 United States, Canada, Developed Economies of Europe, Israel, Japan, Australia, New Zealand and South Africa.

3 This classification is intended for statistical convenience and does not necessarily express a judgement about the stage reached by a particular country in the development process.

4 Comprises Eastern Europe and the European countries of the former USSR.

5 Imports FOB.

6 Including the trade of the U.S. Virgin Islands and Puerto Rico, but excluding shipments of merchandise between the United States and its other possessions (Guam, American Samoa, etc). Data

Source:

Organisation des Nations Unies, Division de statistique, New York, la base de données pour les statistiques de commerce extérieur.

+ Pour les Etats membres de ce groupements, voir annexe I - Autres groupements. Les totaux ont été récalculés pour toutes les périodes données suivant la composition présente.

1 Systèmes de commerce: Deux systèmes d'enregistrement du commerce sont couramment utilisés, le Commerce général (G) et le Commerce spécial (S). Ils ne diffèrent que par la façon dont sont enregistrées les marchandises entreposées et les marchandises réexportées. Voir les Notes techniques pour une explication des Systèmes de commerce.

2 Etats-Unis, Canada, pays aux économies développés d'Europe, Israël, Japon, Australie, Nouvelle Zélande et l'Afrique du Sud.

3 Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stage de développement auquel est parvenu un pays donné.

4 Compris de l'Europe l'Est et les pays européennes de l'ancienne URSS.

5 Importations FOB.

6 Y compris le commerce des îles Vierges américaines et de Porto Rico mais non compris les échanges de marchandises entre les Etats-Unis et leurs autres possessions (Guam, Samoa américaines,

72

Total imports and exports

Imports c.i.f. and exports f.o.b., value in million US dollars

Importations et exportations totales

Importations c.a.f. et exportations f.o.b., valeur en millions de dollars E.-U.

- include imports and exports of non-monetary gold.
- 7 Trade data include maquiladoras and exclude goods from customs-bonded warehouses. Total exports include revaluation and exports of silver.
- 8 Export and import values exclude trade in the processing zone.
- 9 Prior to 1986, includes Aruba.
- 10 Exports include re-exports and petroleum products.
- 11 Economic Union of Belgium and Luxembourg. Intertrade between the two countries is excluded. Beginning January 1997, data refer to Belgium only and include trade between Belgium and Luxembourg.
- 12 Prior to January 1991, excludes trade conducted in accordance with the supplementary protocol to the treaty on the basis of relations between the Federal Republic of Germany and the former German Democratic Republic.
- 13 Beginning 1997, trade data for France include the import and export values of French Guiana, Guadeloupe, Martinique, and Reunion.
- 14 Data prior to January 1991 pertaining to the territorial boundaries of the Federal Republic of Germany prior to 3 October 1990.
- 15 Beginning January 1994, foreign trade statistics exclude re-exports.
- 16 Beginning 1990, trade statistics exclude certain oil and chemical products.
- 17 Prior to 1996 data exclude customs free zones, repairs on goods, and operational leasing.
- 18 Exports include gold.
- 19 Beginning in January 1998, foreign trade data refer to South Africa only, excluding intra-trade of the Southern African Common Customs Area. Prior to January 1998, trade data refer to the Southern African Common Customs Area, which includes Botswana, Lesotho, Namibia, South Africa and Swaziland.
- 20 Imports exclude petroleum imported without stated value. Exports cover domestic exports.
- 21 Imports and exports net of returned goods. The figures also exclude Judea and Samaria and the Gaza area.
- 22 Imports exclude military imports.
- 23 Data include Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan.
- 24 Comprises trade of the former Democratic Yemen and the former Yemen Arab Republic including any inter-trade between them.
- 25 Data include oil and gas. Data on the value and volume of oil exports and on the value of total exports are rough estimates based on information published in various petroleum industry journals.
- 26 Data refer to total exports less petroleum exports of Asia Middle East countries where petroleum, in this case, is the sum of SITC groups 333, 334 and 335.
- 27 Beginning 1989, data exclude re-exports.
- 28 Prior to January 1992, data refer to the Socialist Federal Republic of Yugoslavia.
- 29 Prior to 1997, included under Belgium. See also footnote for Belgium.
- 30 Excluding intra-EU trade.
- etc). Les données comprennent les importations et exportations d'or non monétaire.
- 7 Les statistiques du commerce extérieur comprennent maquiladoras et ne comprennent pas les marchandises provenant des entrepôts en douane. Les exportations comprennent la réévaluation et les données sur les exportations d'argent.
- 8 Les valeurs à l'exportation et à l'importation excluent le commerce de la zone de transformation.
- 9 Avant 1986, comprend Aruba.
- 10 Exportations comprennent re-exportations et produits pétroliers.
- 11 L'Union économique belgo-luxembourgeoise. Non compris le commerce entre ces pays. A partir de janvier 1997, les données se rapportent à Belgique seulement et recouvrent les échanges entre la Belgique et le Luxembourg.
- 12 Avant janvier 1991, non compris le commerce effectué en accord avec le protocole additionnel au traité définissant la base des relations entre la République Fédérale d'Allemagne et l'ancienne République Démocratique Allemagne.
- 13 A compter de 1997, les valeurs de commerce pour la France comprennent les valeurs des importations et des exportations de la Guyane française, la Guadeloupe, la Martinique, et la Réunion.
- 14 Les données relatives à la période précédant janvier 1991 correspondent aux limites territoriales de la République fédérale d'Allemagne antérieure au 3 octobre 1990.
- 15 A partir de janvier 1994, les statistiques du commerce extérieur non compris les réexportations.
- 16 A compter de 1990, les statistiques commerciales font exclusion de certains produits pétroliers et chimiques.
- 17 Avant de 1996 les données excluent des zones franches, des réparations sur des marchandises, et le crédit-bail opérationnel.
- 18 Les exportations comprennent l'or.
- 19 A compter de janvier 1998, les données sur le commerce extérieur ne se rapportent qu'à l'Afrique du Sud, et ne tiennent pas compte des échanges commerciaux entre les pays de l'Union douanière de l'Afrique, du Sud, qui incluait l'Afrique du Sud, le Botswana, le Lesotho, la Namibie, et le Swaziland.
- 20 Non compris le pétrole brut dont la valeur des importations n'est pas stipulée. Les exportations sont les exportations d'intérieur.
- 21 Importations et exportations nets, ne comprenant pas les marchandises retournées. Sont également exclus les données de la Judée et de Samaria et ainsi que la zone de Gaza.
- 22 Non compris les importations des équipements militaires.
- 23 Données comprises Arménie, Azerbaïdjan, Géorgie, Kazakhstan, Kirghizistan, Ouzbékistan, Tadjikistan et Turkménistan.
- 24 Y compris le commerce de l'ancienne République populaire démocratique de Yémen, le commerce de l'ancienne République arabe de Yémen et le commerce entre eux.
- 25 Les données comprennent le pétrole et le gaz. Les données relatives à la valeur et au volume des exportations de pétrole et à la valeur des exportations totales sont des estimations approximatives établies sur la base des données des journaux de l'industrie pétrolière.
- 26 Les données se rapportent aux exportations totales moins les exportations pétrolières de moyen-orient d'Asie. Dans ce cas, le pétrole est la somme des groupes CTIC 333, 334 et 335.
- 27 A compter de 1989, les données non compris les réexportations.
- 28 Avant 1992, les données se rapportent à la République fédérative socialiste de Yougoslavie.
- 29 Avant 1997, inclus sous la Belgique. Voir également l'apostille pour la Belgique.
- 30 Non compris le commerce l'intra-UE.

+ Pour les États membres de ce groupement, voir annexe I – Autres groupements.

1 Excludes trade of the countries of Eastern Europe and the former USSR.

1 Non compris le commerce des pays de l'Europe de l'Est et l'ex-URSS.

2 Derived from price indices; national unit value index is discontinued.

2 Calculés à partir des indices des prix; l'indice de la valeur unitaire nationale est discontinué.

3 Series linked at 1988 by a factor calculated by the United Nations Statistics Division.

3 Les séries sont enchaînées à 1988 par un facteur calculé par la Division de Statistique des Nations Unies.

4 Indices are calculated by the United Nations Statistics Division.

4 Les indices sont calculés par la Division de statistique des Nations Unies.

5 Average price indexes of manufacturing industry products.

5 Les indices moyens de prix des produits de l'industrie manufacturière.

6 Industrial product.

6 Produit industriel.

Technical notes, tables 72-74

Tables 72-74: Current data (annual, monthly and/or quarterly) for most of the series are published regularly by the Statistics Division in the United Nations *Monthly Bulletin of Statistics* [26]. More detailed descriptions of the tables and notes on methodology appear in the United Nations *1977 Supplement to the Statistical Yearbook and Monthly Bulletin of Statistics* [57], *International Trade Statistics: Concepts and Definitions* [51] and the *International Trade Statistics Yearbook* [25]. More detailed data including series for individual countries showing the value in national currencies for imports and exports and notes on these series can be found in the *International Trade Statistics Yearbook* [25] and in the *Monthly Bulletin of Statistics* [26].

Data are obtained from national published sources; from data supplied by the governments for publication in United Nations publications and from publications of other United Nations agencies.

Territory

The statistics reported by a country refer to the customs area of the country. In most cases, this coincides with the geographical area of the country.

Systems of trade

Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded:

(a) Special trade (S): special imports are the combined total of imports for direct domestic consumption (including transformation and repair) and withdrawals from bonded warehouses or free zones for domestic consumption. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods. (Nationalized goods are goods which, having been included in special imports, are then exported without transformation);

(b) General trade (G): general imports are the combined total of imports for direct domestic consumption and imports into bonded warehouses or free zones. General exports are the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalized goods plus goods which, after importation, move outward from bonded warehouses or free zones without having been transformed.

Valuation

Goods are, in general, valued according to the transaction value. In the case of imports, the transaction value is the value at which the goods were purchased by

Notes techniques, tableaux 72 à 74

Tableaux 72-74: La Division de statistique des Nations Unies publie régulièrement dans le *Bulletin mensuel de statistique* [26] des données courantes (annuelles, mensuelles et/ou trimestrielles) pour la plupart des séries de ces tableaux. Des descriptions plus détaillées des tableaux et des notes méthodologiques figurent dans *1977 Supplément à l'Annuaire statistique et au Bulletin mensuel de statistique* des Nations Unies [57], dans la publication *Statistiques du commerce international, Concepts et définitions* [51] et dans l'*Annuaire statistique du Commerce international* [25]. Des données plus détaillées, comprenant des séries indiquant la valeur en monnaie nationale des importations et des exportations des divers pays et les notes accompagnant ces séries figurent dans l'*Annuaire statistique du Commerce international* [25] et dans le *Bulletin mensuel de statistique* [26].

Les données proviennent de publications nationales et des informations fournies par les gouvernements pour les publications des Nations Unies ainsi que de publications d'autres institutions des Nations Unies.

Territoire

Les statistiques fournies par pays se rapportent au territoire douanier de ce pays. Le plus souvent, ce territoire coïncide avec l'étendue géographique du pays.

Systèmes de commerce

Deux systèmes d'enregistrement du commerce sont couramment utilisés, qui ne diffèrent que par la façon dont sont enregistrées les marchandises entreposées et les marchandises réexportées:

(a) Commerce spécial (S): les importations spéciales représentent le total combiné des importations destinées directement à la consommation intérieure (transformations et réparations comprises) et les marchandises retirées des entrepôts douaniers ou des zones franches pour la consommation intérieure. Les exportations spéciales comprennent les exportations de marchandises nationales, c'est-à-dire des biens produits ou fabriqués en totalité ou en partie dans le pays, ainsi que les exportations de biens nationalisés. (Les biens nationalisés sont des biens qui, ayant été inclus dans les importations spéciales, sont ensuite réexportés tels quels.)

(b) Commerce général (G): les importations générales sont le total combiné des importations destinées directement à la consommation intérieure et des importations placées en entrepôt douanier ou destinées aux zones franches. Les exportations générales sont le total combiné des exportations de biens nationaux et des réexportations. Ces dernières, dans le système du com-

the importer plus the cost of transportation and insurance to the frontier of the importing country (c.i.f. valuation). In the case of exports, the transaction value is the value at which the goods were sold by the exporter, including the cost of transportation and insurance to bring the goods onto the transporting vehicle at the frontier of the exporting country (f.o.b. valuation).

Currency conversion

Conversion of values from national currencies into United States dollars is done by means of external trade conversion factors which are generally weighted averages of exchange rates, the weight being the corresponding monthly or quarterly value of imports or exports.

Coverage

The statistics relate to merchandise trade. Merchandise trade is defined to include, as far as possible, all goods which add to or subtract from the material resources of a country as a result of their movement into or out of the country. Thus, ordinary commercial transactions, government trade (including foreign aid, war reparations and trade in military goods), postal trade and all kinds of silver (except silver coins after their issue), are included in the statistics. Since their movement affects monetary rather than material resources, monetary gold, together with currency and titles of ownership after their issue into circulation, are excluded.

Commodity classification

The commodity classification of trade is in accordance with the United Nations *Standard International Trade Classification* (SITC) [56].

World and regional totals

The regional, economic and world totals have been adjusted: (a) to include estimates for countries or areas for which full data are not available; (b) to include insurance and freight for imports valued f.o.b.; (c) to include countries or areas not listed separately; (d) to approximate special trade; (e) to approximate calendar years; and (f) where possible, to eliminate incomparabilities owing to geographical changes, by adjusting the figures for periods before the change to be comparable to those for periods after the change.

Quantum and unit value index numbers

These index numbers show the changes in the volume of imports or exports (quantum index) and the average price of imports or exports (unit value index).

Description of tables

Table 72: World imports and exports are the sum of imports and exports of Developed economies, Developing economies and other. The regional totals for im-

merce général, comprennent les exportations de biens nationalisés et de biens qui, après avoir été importés, sortent des entrepôts de douane ou des zones franches sans avoir été transformés.

Evaluation

En général, les marchandises sont évaluées à la valeur de la transaction. Dans le cas des importations, cette valeur est celle à laquelle les marchandises ont été achetées par l'importateur plus le coût de leur transport et de leur assurance jusqu'à la frontière du pays importateur (valeur c.a.f.). Dans le cas des exportations, la valeur de la transaction est celle à laquelle les marchandises ont été vendues par l'exportateur, y compris le coût de transport et d'assurance des marchandises jusqu'à leur chargement sur le véhicule de transport à la frontière du pays exportateur (valeur f.à.b.).

Conversion des monnaies

Le conversion en dollars des Etats-Unis de valeurs exprimées en monnaie nationale se fait par application de coefficients de conversion du commerce extérieur, qui sont généralement les moyennes pondérées des taux de change, le poids étant la valeur mensuelle ou trimestrielle correspondante des importations ou des exportations.

Couverture

Les statistiques se rapportent au commerce des marchandises. Le commerce des marchandises se définit comme comprenant, dans toute la mesure du possible, toutes les marchandises qui ajoutent ou retranchent aux ressources matérielles d'un pays par suite de leur importation ou de leur exportation par ce pays. Ainsi, les transactions commerciales ordinaires, le commerce pour le compte de l'Etat (y compris l'aide extérieure, les réparations pour dommages de guerre et le commerce des fournitures militaires), le commerce par voie postale et les transactions de toutes sortes sur l'argent (à l'exception des transactions sur les pièces d'argent après leur émission) sont inclus dans ces statistiques. La monnaie or ainsi que la monnaie et les titres de propriété après leur mise en circulation sont exclus, car leurs mouvements influent sur les ressources monétaires plutôt que sur les ressources matérielles.

Classification par marchandise

La classification par marchandise du commerce extérieur est celle adoptée dans la *Classification type pour le commerce international* des Nations Unies (CTCI) [56].

Totaux mondiaux et régionaux

Les totaux économiques, régionaux et mondiaux ont été ajustés de manière: (a) à inclure les estimations

ports and exports and have been adjusted to exclude the re-exports of countries or areas comprising each region. Estimates for certain countries or areas not shown separately as well as for those shown separately but for which no data are yet available are included in the regional and world totals. Export and import values in terms of U.S. dollars are derived by the United Nations Statistics Division from data published in national publications, from data in the replies to the *Monthly Bulletin of Statistics* questionnaires and from data published by the International Monetary Fund (IMF) in the publication *International Financial Statistics* [15].

Table 73: These index numbers show the changes in the volume (quantum index) and the average price (unit value index) of total imports and exports. The terms of trade figures are calculated by dividing export unit value indices by the corresponding import unit value indices. The product of the net terms of trade and the quantum index of exports is called the index of the purchasing power of exports. The footnotes to countries appearing in table 72 also apply to the index numbers in this table.

Table 74: Manufactured goods are defined here to comprise sections 5 through 8 of the Standard International Trade Classification (SITC). These sections are: chemicals and related products, manufactured goods classified chiefly by material, machinery and transport equipment and miscellaneous manufactured articles. The economic and geographic groupings in this table are in accordance with those of table 72, although table 72 includes more detailed geographical sub-groups which make up the groupings "other developed market economies" and "developing market economies" of this table.

The unit value indices are obtained from national sources, except those of a few countries which the United Nations Statistics Division compiles using their quantity and value figures. For countries that do not compile indices for manufactured goods exports conforming to the above definition, sub-indices are aggregated to approximate an index of SITC sections 5-8. Unit value indices obtained from national indices are rebased, where necessary, so that 1990=100. Indices in national currency are converted into US dollars using conversion factors obtained by dividing the weighted average exchange rate of a given currency in the current period by the weighted average exchange rate in the base period. All aggregate unit value indices are current period weighted.

The indices in Special Drawing Rights (SDRs) are calculated by multiplying the equivalent aggregate indices in United States dollars by conversion factors obtained by dividing the SDR/US \$ exchange rate in the

ont été ajustés de manière: (a) à inclure les estimations pour les pays ou régions pour lesquels on ne disposait pas de données complètes; (b) à inclure l'assurance et le fret dans la valeur f.o.b. des importations; (c) à inclure les pays ou régions non indiqués séparément; (d) à donner une approximation du commerce spécial; (e) à les ramener à des années civiles; et (f) à éliminer, dans la mesure du possible, les données non comparables par suite de changements géographiques, en ajustant les chiffres correspondant aux périodes avant le changement de manière à les rendre comparables à ceux des périodes après le changement.

Indices de quantum et de valeur unitaire

Ces indices indiquent les variations du volume des importations ou des exportations (indice de quantum) et du prix moyen des importations ou des exportations (indice de valeur unitaire).

Description des tableaux

Tableau 72: Les importations et les exportations totales pour le monde se composent des importations et exportations des Economies développées, des Economies en développement et des autres. Les totaux régionaux pour importations et exportations ont été ajustés pour exclure les re-exportations des pays ou zones qui comprennent la région. Les totaux régionaux et mondiaux comprennent des estimations pour certains pays ou zones ne figurant pas séparément mais pour lesquels les données ne sont pas encore disponibles. Les valeurs en dollars des E.U. des exportations et des importations ont été obtenues par la Division de statistique des Nations Unies à partir des réponses aux questionnaires du *Bulletin Mensuel de Statistique*, des données publiées par le Fonds Monétaire International dans la publication *Statistiques financières internationales* [15].

Tableau 73: Ces indices indiquent les variations du volume (indice de quantum) et du prix moyen (indice de valeur unitaire) des importations et des exportations totales. Les chiffres relatifs aux termes de l'échange se calculent en divisant les indices de valeur unitaire des exportations par les indices correspondants de valeur unitaire des importations. Le produit de la valeur nette des termes de l'échange et de l'indice du quantum des exportations est appelé indice du pouvoir d'achat des exportations. Les notes figurant au bas du tableau 72 concernant certains pays s'appliquent également aux indices du présent tableau.

Tableau 74: Les produits manufacturés se définissent comme correspondant aux sections 5 à 8 de la Classification type pour le commerce international (CTCI). Ces sections sont: produits chimiques et produits connexes, biens manufacturés classés principalement par

current period by the rate in the base period.

The quantum indices are derived from the value data and the unit value indices. All aggregate quantum indices are base period weighted.

matière première, machines et équipements de transport et articles divers manufacturés. Les groupements économiques et géographiques de ce tableau sont conformes à ceux du tableau 72; toutefois, le tableau 72 comprend des subdivisions géographiques plus détaillées qui composent les groupements "autres pays développés à économie de marché" et "pays en développement à économie de marché" du présent tableau.

Les indices de valeur unitaire sont obtenus de sources nationales, à l'exception de ceux de certains pays que la Division de statistique des Nations Unies compile en utilisant les chiffres de ces pays relatifs aux quantités et aux valeurs. Pour les pays qui n'établissent pas d'indices conformes à la définition ci-dessus pour leurs exportations de produits manufacturés, on fait la synthèse de sous-indices de manière à établir un indice proche de celui des sections 5 à 8 de la CTCI. Le cas échéant, les indices de valeur unitaire obtenus à partir des indices nationaux sont ajustés sur la base 1990=100. On convertit les indices en monnaie nationale en indices en dollars des Etats-Unis en utilisant des facteurs de conversion obtenus en divisant la moyenne pondérée des taux de change d'une monnaie donnée pendant la période courante par la moyenne pondérée des taux de change de la période de base. Tous les indices globaux de valeur unitaire sont pondérés pour la période courante.

On calcule les indices en droits de tirages spécial (DTS) en multipliant les indices globaux équivalents en dollars des Etats-Unis par les facteurs de conversion obtenus en divisant le taux de change DTS/dollars E.U. de la période courante par le taux correspondant de la période de base.

On détermine les indices de quantum à partir des données de valeur et des indices de valeur unitaire. Tous les indices globaux de quantum sont pondérés par rapport à la période de base.

World Tourism Organization (WTO), Madrid, WTO statistics database and the "Yearbook of Tourism Statistics", 2002 edition.

+ For a listing of the Member States of the regions of origin, see Annex I, with the following exceptions:

Africa includes the countries and territories listed under Africa in Annex I but excludes Egypt, Guinea-Bissau, Liberia, Libyan Arab Jamahiriya, Mozambique and Western Sahara.

Americas is as shown in Annex I, but excludes Falkland Islands (Malvinas), French Guyana, Greenland and Saint Pierre and Miquelon.

Europe is as shown in Annex I, but excludes Andorra, Channel Islands, Faeroe Islands, Holy See, Isle of Man and Svalbard and Jan Mayen Islands. The Europe group also includes Armenia, Azerbaijan, Cyprus, Israel, Kyrgyzstan, Turkey and Turkmenistan.

Asia, East and South East/Oceania includes the countries and territories listed under Eastern Asia and South-eastern Asia in Annex I (except for Timor-Leste), and under Oceania except for Christmas Island, Cocos Island, Norfolk Island, Nauru, Wake Island, Johnston Island, Midway Islands, Pitcairn, Tokelau and Wallis and Futuna Islands. The Asia, East and South East/Oceania group also includes Taiwan Province of China.

Southern Asia is as shown in Annex I under South-central Asia, but excludes Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan.

Western Asia is as shown in Annex I but excludes Armenia, Azerbaijan, Cyprus, Georgia, Israel, Occupied Palestinian Territory, and Turkey. The Western Asia group also includes Egypt and the Libyan Arab Jamahiriya.

- 1 Arrivals of non-resident tourists at hotels and similar establishments.
- 2 Arrivals of non-resident tourists at national borders (including tourists and same-day visitors).
- 3 Including nationals of the country residing abroad.
- 4 Including arrivals from Western Samoa. Beginning 1990, excluding arrivals from Western Samoa.
- 5 Arrivals of non-resident tourists at national borders (excluding same-day visitors).
- 6 Excluding nationals of the country residing abroad.
- 7 Air and sea arrivals.
- 8 Arrivals correspond to a new series and source of data from 1990 to 1999.
- 9 Arrivals of non-resident tourists in all types of tourism accommodation establishments.
- 10 Excluding crew members.
- 11 Including private accommodation.
- 12 Including transit passengers, border permits and returning residents.
- 13 Air arrivals.
- 14 International tourist arrivals in hotels of regional capitals.
- 15 Change in methodology.
- 16 Excluding children without own passports. (Bulgaria: 1998-2000).
- 17 Air arrivals at Pochentong and Siem Reap Airports. Region Not Specified 1998 and 2000: Including arrivals at Siem Reap Airport by direct-flights; 1998: 10,423; 2000: 87,012.

- 25 Beginning 1996, including camp sites with more than 74 units only.
- 26 Departures by air.
- 27 Prior to 1996, international tourist arrivals at Addis Ababa Airport.
- 28 Including nationals of the country residing abroad. 1996-1999: Arrivals at Bole airport only. 1998-1999: Arrivals compiled by country of residence. 2000: Arrivals through all ports of entry.
- 29 Since 1989 survey at frontiers and car study realized by SOFRES. 1992 and 1993: Estimates based on the frontier survey. 1994 and 1996: Frontier survey. 1997: Update of the frontier survey 1996. 1995, 1998 - 2000: Estimates.
- 30 2000: Estimated by the "Institut de la Statistique (ISPF)".
- 31 Arrivals at Libreville Airport.
- 32 Charter tourists only.
- 33 The data relate to the territory of the Federal Republic of Germany prior to 3 October 1990. As of 1990, tourists from the former German Democratic Republic will be regarded as domestic tourists.
- 34 Data based on surveys.
- 35 Arrivals at 21 traditional hotel establishments. 2000: Arrivals at 83 traditional hotel establishments.
- 36 Air arrivals at Conakry airport.
- 37 Departures.
- 38 Prior to 1996: travellers. From 1996 New methodology, excluding seasonal and border workers.
- 39 Excluding nationals of the country residing abroad. All data are estimates, projected using 1989 market shares. Source: Economic survey various years.
- 10.423; 2000: 87.012.
- 18 A l'exclusion des arrivées de personnes d'ethnie chinoise en provenance de "Chine, Hong Kong RAS", Macao et Taiwan: 1987: 25.174.446; 1988: 29.852.598; 1989: 28.040.424; 1990: 25.714.506; 1991: 30.639.658; 1992: 34.108.578; 1993: 36.871.088; 1994: 38.502.396; 1995: 40.499.795; 1996: 44.383.182; 1997: 50.159.917; 1998: 56.370.654; 1999: 64.363.298; 2000: 73.283.449. Y compris également les apatrides et les employés des organisations des Nations Unis.
- 19 A partir de 1996, les chiffres ont été ajustés pour inclure les arrivées de non-macanais arrivant via Macao.
- 20 Y compris les arrivées par mer, terre et air (hélicoptère). 1995, Nov.: Début de l'inclusion des arrivées par air (Aéroport international de Macao SAR). Y compris les apatrides et les chinois qui ne résident pas de manière permanente à Hong Kong SAR, Chine: 1992: 93.965; 1993: 92.679; 1994: 147.304; 1995: 167.361; 1996: 189.364; 1997: 182.344.
- 21 A partir de 1996, changement de la source national des données.
- 22 Avant 1997, arrivées par voie aérienne à l'aéroport international FHB de Port-Bouet. Les arrivées aux frontières terrestres, à l'aéroport de Bouaké, ainsi qu'à l'aéroport Air Ivoire d'Abidjan ne sont pas prises en compte. 1997-1998 : Arrivées par voie aérienne à l'aéroport international FHB de Port-Bouet et arrivées aux frontières terrestres.
- 23 Y compris les arrivées dans des ports à tourisme nautique.
- 24 1991: Janvier-juin; 1992: Incomplet; 1993: Juillet-décembre; 1994: Janvier-juin; 1995: estimation.
- 25 A partir de 1996, y compris terrains de camping de plus de 74 unités seulement.
- 26 Départs par voie aérienne.
- 27 Avant 1996, arrivées par voie aérienne (Aéroport Addis-Abeba).
- 28 Y compris les nationaux du pays résidant à l'étranger. 1996-1999: Arrivées à l'aéroport de Bole seulement. 1998-1999: Arrivées compilées par pays de résidence. 2000: Arrivées à travers tous les ports d'entrée.
- 29 A partir de 1989 enquête aux frontières et étude autocar réalisée par la SOFRES. 1992 et 1993: Estimation sur la base des enquêtes aux frontières. 1994 et 1996: Enquêtes aux frontières. 1997 : Actualisation de l'enquête aux frontières 1996. 1995, 1998 à 2000 : Estimation.
- 30 2000 : Estimation de la fréquentation touristique réalisée par l'Institut de la Statistique (ISPF)".
- 31 Arrivées à l'aéroport de Libreville.
- 32 Arrivées en vols à la demande seulement.
- 33 Les données se réfèrent au territoire de la République fédérale d'Allemagne avant le 3 octobre 1990. A partir de 1990, les touristes en provenance de l'ancienne République Démocratique Allemande seront considérés comme des touristes nationaux.
- 34 Données obtenues au moyen d'enquêtes.
- 35 Arrivées dans 21 établissements hôteliers. 2000: Arrivées dans 83 établissements hôteliers.
- 36 Arrivées par voie aérienne à l'aéroport de Conakry.
- 37 Départs.
- 38 Avant 1996: voyageurs. A partir de 1996 Nouvelle méthodologie, à l'exclusion des travailleurs saisonniers et frontaliers.
- 39 A l'exclusion des nationaux du pays résidant à l'étranger. Toutes les données représentent des estimations, dont la projection a été faite sur la base des taux de marché de l'année 1989. Source: Enquête économique de diverses années.

Tourist/visitor arrivals by region of origin *[cont.]*Arrivées de touristes/visiteurs par région de provenance *[suite]*

- 40 Prior to 1996, arrivals at Tarawa and Christmas Islands.
41 Including nationals residing abroad and from June 1988, also crew members.
42 Excluding Syrian nationals, Palestinians and students.
43 Excluding sanatoria and rest houses.
44 Foreign tourist departures; includes Singapore residents crossing the frontier by road through Johore Causeway.
45 Tourist arrivals.
46 Arrivals in the States of Kosrae, Chuuk, Pohnpei and Yap.
47 Arrivals at Yangon by air.
48 Data regarding to short term movements are compiled from a random sample of passenger declarations. Including nationals of the country residing abroad. Source: Statistivs New Zealand, External Migration.
49 Air arrivals (Niamey Airport).
50 Including Niuan residents usually in New Zealand.
51 Air arrivals (Palau International Airport). 1996-1997: arrivals by nationality. 1998-2000: arrivals by country of residence.
52 Total number of visitors broken down by permanent residence who arrived in Panama at Tocumen International Airport and Paso Canoas border post.
53 Including arrivals from abroad to insular possessions of Madeira and the Azores.
54 Arrivals by air. Fiscal year July to June. Figures for fiscal year 2000 have been rounded up to the nearest hundred.
55 Persons who enjoyed the services of the economic agents which carry out the tourist's activity in the republic (except left-bank Dniester river regions and municipality of Bender).
56 Data for 1992 correspond to all CIS countries. 1994: Excluding arrivals by road from Belarus, Kazakhstan and Uzbekistan.
57 Prior to 1994, air arrivals. Beginning 1994, air and sea arrivals.
58 Arrivals at Princess Juliana International airport. Including visitors to St. Maarten (the French side of the island).
59 Including Italian visitors.
60 Including Malaysian citizens arriving by land.
61 2000: Excluding arrivals in private accommodation = 7,086.
62 Beginning January 1992, contract and border traffic concession workers are excluded.
63 The 1995-2000 series have been technically adjusted and refer to arrivals of non-resident tourists at national borders (excluding same-day visitors). They now exclude passengers residing in Spain who enter the country by international air transport. This statistical improvement has resulted in the revision of the data published until now with a decrease in the number of arrivals.
64 Arrivals at Zanderij Airport.
65 Arrivals in hotels only.
66 Including domestic tourism and nationals of the country residing abroad.
67 Data refer to Dubai only.
68 Excluding transit passengers.
- 40 Avant 1996, arrivées aux îles Tarawa et Christmas.
41 Y compris les nationaux résidant à l'étranger, à partir de juin 1988, également membres des équipages.
42 A l'exclusion des ressortissants syriens, palestiniens et sous-études.
43 A l'exclusion des sanatoria et des maisons de repos.
44 Départs de touristes étrangers; y compris les résidents de Singapour traversant la frontière par voie terrestre à travers le Johore Causeway.
45 Arrivées de touristes.
46 Arrivées dans les États de Kosrae, Chuuk, Pohnpei et Yap.
47 Arrivées à Yangon par voie aérienne.
48 Les données relatives aux mouvements de courte durée sont obtenues à partir d'un échantillon aléatoire de déclarations des passagers. Y compris les nationaux du pays résidant à l'étranger. Source : Statistiques de la Nouvelle Zélande, Immigration.
49 Arrivées par voie aérienne (Aéroport de Niamey).
50 Y compris les nationaux de Niue résidant habituellement en Nouvelle-Zélande.
51 Arrivées par voie aérienne (Aéroport international de Palau). 1996-1997 : arrivées par nationalité. 1998-2000 : arrivées par pays de résidence.
52 Nombre total de visiteurs arrivées au Panama par l'aéroport international de Tocúmen et le poste frontière de Paso Canoas, classes selon leur résidence permanente.
53 Y compris les arrivées en provenance de l'étranger aux possessions insulaires de Madère et des Açores.
54 Arrivées par voie aérienne. Année fiscale de juillet à juin. Les chiffres pour l'année fiscale 2000 ont été arrondis au centième près.
55 Personnes qui ont bénéficié des services des agents économiques chargés de l'activité touristique dans le pays (à l'exception des régions de la rive gauche du Dniester et la municipalité de Bender).
56 Les données de 1992 couvrent l'ensemble des pays CEI. 1994: Exception faite des arrivées par le route en provenance de Bélarus, Kazakhstan et Ouzbékistan.
57 Avant 1996, arrivées par voie aérienne. A partir de 1994, arrivées par voie aérienne et maritime.
58 Arrivées à l'aéroport international "Princess Juliana". Y compris les visiteurs à Saint-Martin (partie française de l'île).
59 Y compris les visiteurs italiens.
60 Y compris les arrivées de malaisiens par voie terrestre.
61 2000: A l'exclusion des arrivées dans l'hébergement privé = 7.086.
62 A partir de janvier 1992, les données excluent les travailleurs contractuels et ceux de la zone frontière.
63 La série 1995-2000 a été modifiée. Cette série exclue maintenant les passagers résidents en Espagne qui rentrent dans le pays par vols internationaux. Cette amélioration statistique a donné lieu à une révision qui montre une diminution dans le chiffre des arrivées (par rapport aux chiffres publiés jusqu'à présent).
64 Arrivées à l'aéroport de Zanderij.
65 Arrivées dans les hôtels uniquement.
66 Y compris le tourisme interne et les nationaux résidant à l'étranger.
67 Les données se réfèrent au Dubai seulement.
68 A l'exclusion des passagers en transit.

Source:

Organisation mondiale du tourisme (OMT), Madrid, "Annuaire des statistiques du tourisme - 2002 édition" et la base de données de l'OMT.

1 The World totals are global estimates prepared by WTO. The estimated part relates only to those countries that were unable to provide the information contained in WTO Database as of June 2002.

2 Air arrivals.

3 Arrivals through all ports of entry.

4 Incorporates all revenues obtained from the sector based on estimation.

5 Hotel receipts.

6 Including receipts from cruise passengers and frontier visitors.

1 Les chiffres mondiaux sont des estimations globales de l'OMT. La partie estimative ne concerne que les pays qui n'ont pas été en mesure de communiquer les données intégrées à la base de l'OMT au 1er juin 2002.

2 Arrivées par voie aérienne.

3 Arrivées à travers tous les ports d'entrée.

4 Comporte une estimation de toutes les recettes du secteur.

5 Recettes des hôtels.

6 Y compris les recettes provenant des passagers de navires de

- 14 Données relatives à la rubrique "Voyages" de la balance des paiements.

Technical notes, tables 75-77

The data on international tourism have been supplied by the World Tourism Organization (WTO), which publishes detailed tourism information in the *Yearbook of Tourism Statistics* [38]. Additional information on data collection methods and definitions can be found in the *Methodological Supplement to World Travel and Tourism Statistics* [63] also published by the WTO. (See also [54] and [55]).

For statistical purposes, the term “international visitor” describes “any person who travels to a country other than that in which he/she has his/her usual residence but outside his/her usual environment for a period not exceeding 12 months and whose main purpose of visit is other than the exercise of an activity remunerated from within the country visited”.

International visitors include:

(a) *Tourists* (overnight visitors): “visitors who stay at least one night in a collective or private accommodation in the country visited”; and

(b) *Same-day visitors*: “visitors who do not spend the night in a collective or private accommodation in the country visited”.

The figures do not include immigrants, residents in a frontier zone, persons domiciled in one country or area and working in an adjoining country or area, members of the armed forces and diplomats and consular representatives when they travel from their country of origin to the country in which they are stationed and vice-versa.

The figures also exclude persons in transit who do not formally enter the country through passport control, such as air transit passengers who remain for a short period in a designated area of the air terminal or ship passengers who are not permitted to disembark. This category includes passengers transferred directly between airports or other terminals. Other passengers in transit through a country are classified as visitors.

Tables 75 and 76: Data on arrivals of international (or non-resident) visitors may be obtained from different sources. In some cases data are obtained from border statistics derived from administrative records (police, immigration, traffic and other type of controls applied at national borders), and eventually, completed by means of border statistical surveys. In other cases, data are obtained from different types of tourism accommodation establishments (hotels and similar establishments and/or all types of tourism accommodation establishments).

Unless otherwise stated, table 75 shows the number of tourist/visitor arrivals at frontiers classified by their region of origin. Totals correspond to the total number of arrivals from the regions indicated in the ta-

Notes techniques, tableaux 75 à 77

Les données sur le tourisme international ont été fournies par l'Organisation mondiale du tourisme (l'OMT) qui publie des renseignements détaillés sur le tourisme dans l'*Annuaire des statistiques du tourisme* [38]. On trouvera plus de renseignements sur les méthodes de collecte et sur les définitions dans « *Methodological Supplement to World Travel and Tourism Statistics* » [63] publié par l'OMT. (Voir aussi [54] et [55]).

A des fins statistiques, l'expression “*visiteur international*” désigne “toute personne qui se rend dans un pays autre que celui où elle a son lieu de résidence habituelle, mais différent de son environnement habituel, pour une période de 12 mois au maximum, dans un but principal autre que celui d'y exercer une profession rémunérée”.

Entrent dans cette catégorie:

(a) Les *touristes* (visiteurs passant la nuit), c'est à dire “les visiteurs qui passent une nuit au moins en logement collectif ou privé dans le pays visité”;

(b) Les *visiteurs ne restant que la journée*, c'est à dire “les visiteurs qui ne passent pas la nuit en logement collectif ou privé dans le pays visité”.

Ces chiffres ne comprennent pas les immigrants, les résidents frontaliers, les personnes domiciliées dans une zone ou un pays donné et travaillant dans une zone ou pays limitrophe, les membres des forces armées et les membres des corps diplomatique et consulaire lorsqu'ils se rendent de leur pays d'origine au pays où ils sont en poste, et vice versa.

Ne sont pas non plus inclus les voyageurs en transit, qui ne pénètrent pas officiellement dans le pays en faisant contrôler leurs passeports, tels que les passagers d'un vol en escale, qui demeurent pendant un court laps de temps dans une aire distincte de l'aérogare, ou les passagers d'un navire qui ne sont pas autorisés à débarquer. Cette catégorie comprend également les passagers transportés directement d'une aérogare à l'autre ou à un autre terminal. Les autres passagers en transit dans un pays sont classés parmi les visiteurs.

Tableaux 75 et 76: Les données relatives aux arrivées des visiteurs internationaux (ou non résidents) peuvent être obtenues de différentes sources. Dans certains cas, elles proviennent des statistiques des frontières tirées des registres administratifs (contrôles de police, de l'immigration, de la circulation et autres effectués aux frontières nationales) et, éventuellement, complétées à l'aide d'enquêtes statistiques aux frontières. Dans d'autres cas, elles proviennent de différents types d'établissements d'hébergement touristique (hôtels et établissements assimilés et/ou tous types

ble. However, these totals may not correspond to the number of tourist arrivals shown in table 76. The latter excludes same-day visitors whereas they may be included in table 75. More detailed information can be found in the *Yearbook of Tourism Statistics* [38].

When a person visits the same country several times a year, an equal number of arrivals is recorded. Likewise, if a person visits several countries during the course of a single trip, his/her arrival in each country is recorded separately. Consequently, *arrivals* cannot be assumed to be equal to the number of persons traveling.

Tourism expenditure (in the country of reference) corresponds to the "expenditure of non-resident visitors (tourists and same-day visitors)" within the economic territory of the country of reference. International transport is excluded. The data are obtained by the WTO from the item "Travel receipts" of the Balance of Payments of each country shown in the *Balance of Payments Statistics Yearbook* published by the International Monetary Fund [14].

Table 77: The data on tourism expenditure in other countries are obtained from the item "Travel expenditure" of the Balance of Payments of each country and corresponds to the "expenditure of resident visitors (tourists and same-day visitors)" outside the economic territory of the country of reference.

For more information, see the *Yearbook of Tourism Statistics* published by the World Tourism Organization [38] and the *Balance of Payments Statistics Yearbook* published by the International Monetary Fund [14].

d'établissements d'hébergement touristique).

Sauf indication contraire, le tableau 75 indique le nombre d'arrivées de touristes/visiteurs par région de provenance. Les totaux correspondent au nombre total d'arrivées de touristes des régions indiquées sur le tableau. Les chiffres totaux peuvent néanmoins, ne pas coïncider avec le nombre des arrivées de touristes indiqué dans le tableau 76, qui ne comprend pas les visiteurs ne restant que la journée, lesquels peuvent au contraire être inclus dans les chiffres du tableau 75. Pour plus de renseignements, consulter l'*Annuaire des statistiques du tourisme* [38].

Lorsqu'une personne visite le même pays plusieurs fois dans l'année, il est enregistré un nombre égal d'arrivées. En outre, si une personne visite plusieurs pays au cours d'un seul et même voyage, son arrivée dans chaque pays est enregistrée séparément. Par conséquent, on ne peut pas partir du postulat que les *arrivées* sont égales au nombre de personnes qui voyagent.

Dépenses touristiques (dans le pays de référence) correspondent aux «dépenses des visiteurs (touristes et visiteurs de la journée) non résidents» dans le territoire économique du pays dont il s'agit. Les données excluent les dépenses du transport international. Ils sont tirées par l'OMT du poste «recettes au titre des voyages» de la balance des paiements de chaque pays présentée dans le "*Balance of Payments Statistics Yearbook*" publié par le Fonds monétaire international [14].

Tableau 77: Les dépenses touristiques dans d'autres pays sont tirées du poste «dépenses au titre des voyages» de la balance des paiements de chaque pays et correspondent aux «dépenses des visiteurs (touristes et visiteurs de la journée) résidents» en dehors du territoire économique du pays de référence.

On trouvera plus de renseignements dans l'*Annuaire des statistiques du tourisme* publié par l'Organisation mondiale du tourisme [38] et dans "*Balance of Payments Statistics Yearbook*" publié par le Fonds monétaire international [14].

1 BLEU trade data refer to the Belgium-Luxembourg Economic Union and exclude transactions between the two countries. Beginning in 1997, trade data are for Belgium only, which includes trade between Belgium and Luxembourg.

2 Services only.

1 Les données sur le commerce extérieur se rapportent à l'Union économique belgo-luxembourgeoise (UEBL) et ne couvrent pas les transactions entre les deux pays. A compter de 1997, les données sur le commerce extérieur ne se rapportent qu'à la Belgique, et recouvrent les échanges entre la Belgique et le Luxembourg.

2 Service seulement.

Technical notes, table 78

A balance of payments can be broadly described as the record of an economy's international economic transactions. It shows (a) transactions in goods, services and income between an economy and the rest of the world, (b) changes of ownership and other changes in that economy's monetary gold, special drawing rights (SDRs) and claims on and liabilities to the rest of the world, and (c) unrequited transfers and counterpart entries needed to balance in the accounting sense any entries for the foregoing transactions and changes which are not mutually offsetting.

The balance of payments are presented on the basis of the methodology and presentation of the fifth edition of the *Balance of Payments Manual* (BPM5) [41], published by the International Monetary Fund in September 1993. The BPM5 incorporates several major changes to take account of developments in international trade and finance over the past decade, and to better harmonize the Fund's balance of payments methodology with the methodology of the 1993 *System of National Accounts* (SNA) [59]. The Fund's balance of payments has been converted for all periods from the BPM4 basis to the BPM5 basis; thus the time series conform to the BPM5 methodology with no methodological breaks.

The detailed definitions concerning the content of the basic categories of the balance of payments are given in the *Balance of Payments Manual (fifth edition)* [41]. Brief explanatory notes are given below to clarify the scope of the major items.

Goods: Exports f.o.b. and *Goods: Imports f.o.b.* are both measured on the "free-on-board" (f.o.b.) basis—that is, by the value of the goods at the border of the exporting country; in the case of imports, this excludes the cost of freight and insurance incurred beyond the border of the exporting country.

Services and income covers transactions in real resources between residents and non-residents other than those classified as merchandise, including (a) shipment and other transportation services, including freight, insurance and other distributive services in connection with the movement of commodities, (b) travel, i.e. goods and services acquired by non-resident travellers in a given country and similar acquisitions by resident travellers abroad, and (c) investment income which covers income of non-residents from their financial assets invested in the compiling economy (debit) and similar income of residents from their financial assets invested abroad (credit).

Current Transfers, n.i.e.: *Credit* comprises all current transfers received by the reporting country, except those made to the country to finance its "overall bal-

Notes techniques, tableau 78

La balance des paiements peut se définir d'une façon générale comme le relevé des transactions économiques internationales d'une économie. Elle indique (a) les transactions sur biens, services et revenus entre une économie et le reste du monde, (b) les transferts de propriété et autres variations intervenues dans les avoirs en or monétaire de cette économie, dans ses avoirs en droits de tirages spéciaux (DTS) ainsi que dans ses créances financières sur le reste du monde ou dans ses engagements financiers envers lui et (c) les "inscriptions de transferts sans contrepartie" et de "contrepartie" destinées à équilibrer, d'un point de vue comptable, les transactions et changements précités qui ne se compensent pas réciproquement.

Les données de balance des paiements sont présentées conformément à la méthodologie et à la classification recommandées dans la cinquième édition du *Manuel de la balance des paiements* [41], publiée en septembre 1993 par le Fonds monétaire international. La cinquième édition fait état de plusieurs changements importants qui ont été opérés de manière à rendre compte de l'évolution des finances et des changes internationaux pendant la décennie écoulée et à harmoniser davantage la méthodologie de la balance des paiements du FMI avec celle du *Système de comptabilité nationale* (SCN) [59] de 1993. Les statistiques incluses dans la balance des paiements du FMI ont été converties et sont désormais établies, pour toutes les périodes, sur la base de la cinquième et non plus de la quatrième édition; en conséquence, les séries chronologiques sont conformes aux principes de la cinquième édition, sans rupture due à des différences d'ordre méthodologique.

Les définitions détaillées relatives au contenu des postes fondamentaux de la balance des paiements figurent dans le *Manuel de la balance des paiements (cinquième édition)* [41]. De brèves notes explicatives sont présentées ci-après pour clarifier la portée de ces principales rubriques.

Les Biens: exportations, f.à.b. et Biens: importations, f.à.b. sont évalués sur la base f.à.b. (franco à bord)—c'est-à-dire à la frontière du pays exportateur; dans le cas des importations, cette valeur exclut le coût du fret et de l'assurance au-delà de la frontière du pays exportateur.

Services et revenus: transactions en ressources effectuées entre résidents et non résidents, autres que celles qui sont considérées comme des marchandises, notamment: (a) expéditions et autres services de transport, y compris le fret, l'assurance et les autres services de distribution liés aux mouvements de marchandises; (b) voyages, à savoir les biens et services acquis par des

ance”, hence, the label “n.i.e.” (not included elsewhere). (Note: some of the capital and financial accounts labeled “n.i.e.” denote that *Exceptional Financing items* and *Liabilities Constituting Foreign Authorities’ Reserves* (LCFARs) have been excluded.)

Capital Account, n.i.e.: *Credit* refers mainly to capital transfers linked to the acquisition of a fixed asset other than transactions relating to debt forgiveness plus the disposal of nonproduced, nonfinancial assets. *Capital Account: Debit* refers mainly to capital transfers linked to the disposal of fixed assets by the donor or to the financing of capital formation by the recipient, plus the acquisition of nonproduced, nonfinancial assets.

Financial Account, n.i.e. is the net sum of the balance of direct investment, portfolio investment, and other investment transactions.

Net Errors and Omissions is a residual category needed to ensure that all debit and credit entries in the balance of payments statement sum to zero and reflects statistical inconsistencies in the recording of the credit and debit entries.

Reserves and Related Items is the sum of transactions in reserve assets, LCFARs, exceptional financing, and use of Fund credit and loans.

For further information see *International Financial Statistics* [15] and <www.imf.org>.

voyageurs non résidents dans un pays donné et achats similaires faits par des résidents voyageant à l'étranger; et (c) revenus des investissements, qui correspondent aux revenus que les non résidents tirent de leurs avoirs financiers placés dans l'économie déclarante (débit) et les revenus similaires que les résidents tirent de leurs avoirs financiers placés à l'étranger (crédit).

Les transferts courants, n.i.a.: *Crédit* englobent tous les transferts courants reçus par l'économie qui établit sa balance des paiements, à l'exception de ceux qui sont destinés à financer sa “balance globale”—c'est ce qui explique la mention “n.i.a.” (non inclus ailleurs). (Note: comptes de capital et d'opérations financières portent la mention “n.i.a.”, ce qui signifie que les postes de *Financement exceptionnel* et les *Engagements constituant des réserves pour les autorités étrangères* ont été exclus de ces composantes du compte de capital et d'opérations financières.

Le Compte de capital, n.i.a.: *crédit* retrace principalement les transferts de capital liés à l'acquisition d'un actif fixe autres que les transactions ayant trait à des remises de dettes plus les cessions d'actifs non financiers non produits. *Le Compte de capital: débit* retrace principalement les transferts de capital liés à la cession d'actifs fixes par le donateur ou au financement de la formation de capital par le bénéficiaire, plus les acquisitions d'actifs non financiers non produits.

Le solde du *Compte d'op. Fin., n.i.a.* (compte d'opérations financières, n.i.a.) est la somme des soldes des investissements directs, des investissements de portefeuille et des autres investissements.

Le poste des *Erreurs et omissions nettes* est une catégorie résiduelle qui est nécessaire pour assurer que la somme de toutes les inscriptions effectuées au débit et au crédit est égal à zéro et qui laisse apparaître les écarts entre les montants portés au débit et ceux qui sont inscrits au crédit.

Le montant de *Réserves et postes apparentés* est égal à la somme de transactions afférentes aux avoirs de réserve, aux engagements constituant des réserves pour les autorités étrangères, au financement exceptionnel et à l'utilisation des crédits et des prêts du FMI.

- 1 Principal rate.
- 2 Pesos per million US dollars through 1983, per thousand US dollars through 1988 and per US dollar thereafter.
- 3 Beginning 1999, Euros per US dollar. See Euro Area.
- 4 Prior to January 1999, the official rate was pegged to the French franc. On 12 January 1994, the CFA franc was devalued to CFAF 100 per French franc from CFAF 50 at which it had been fixed since 1948. From 1 January 1999, the CFAF is pegged to the euro at a rate of CFA francs 655.957 per euro.
- 5 Bolivianos per million US dollars through 1983, per thousand US dollars for 1984, and per US dollar thereafter.
- 6 Reals per trillion US dollars through 1983, per billion US dollars 1984-1988, per million US dollars 1989-1992, and per US dollar thereafter.
- 7 The official rate is pegged to the French franc. Beginning January 12, 1994, the CFA franc was devalued to CFAF 75 per French franc from CFAF 50 at which it had been fixed since 1948.
- 8 New Zaires per million US dollars through 1990, per thousand US dollars for 1991-1995, and per US dollar thereafter.
- 9 "Euro Area" is an official descriptor for the European Economic and Monetary Union (EMU). The participating member states of the EMU are Austria, Belgium, Finland, France, Germany,

- 1 Taux principal.
- 2 Pesos par million de dollars des États-Unis jusqu'en 1983, par millier de dollars des États-Unis jusqu'en 1988 et par dollar des États-Unis après cette date.
- 3 A partir de 1999, euros pour un dollar des États-Unis. Voir la Zone euro.
- 4 Avant janvier 1999, le taux officiel était établi par référence au franc français. Le 12 janvier 1994, le franc CFA a été dévalué; son taux par rapport au franc français, auquel il est rattaché depuis 1948, est passé de 50 à 100 francs CFA pour 1 franc français. A compter du 1er janvier 1999, le taux officiel est établi par référence à l'euro à un taux de 655 957 francs CFA pour un euro.
- 5 Bolivianos par million de dollars des États-Unis jusqu'en 1983, par millier de dollars des États-Unis en 1984, et par dollar des États-Unis après cette date.
- 6 Reals par trillion de dollars des États-Unis jusqu'en 1983, par milliard de dollars des États-Unis 1984-1988, par million de dollars des États-Unis 1989-1992, et par dollar des États-Unis après cette date.
- 7 Le taux de change officiel est rattaché au taux de change du franc français. Le 12 janvier 1994, le CFA a été dévalué de 50 par franc français, valeur qu'il avait conservée depuis 1948, à 75 par franc français.
- 8 Nouveaux zaires par million de dollars des États-Unis jusqu'en 1990, par millier de dollars des États-Unis en 1991 et 1995, et par dollar des États-Unis après cette date.
- 9 L'expression "zone euro" est un intitulé officiel pour l'Union économique et monétaire (UEM) européenne. L'UEM est composée des pays membres suivants : Allemagne, Autriche,

1 The following abbreviations have been used in the table:
LDOD: Long-term debt outstanding and disbursed
IBRD: International Bank for Reconstruction and Development
IDA: International Development Association
LINT: Loan interest
LTDS: Long-term debt service

1 Les abréviations ci-après ont été utilisées dans le tableau:
LDOD: Dette à long terme
BIRD: Banque internationale pour la reconstruction et le développement
IDA: Association internationale de développement
LINT: Paiement d'intérêts
LTDS: Service de la dette à long terme

Technical notes, tables 79 and 80

Table 79: Foreign exchange rates are shown in units of national currency per US dollar. The exchange rates are classified into three broad categories, reflecting both the role of the authorities in the determination of the exchange and/or the multiplicity of exchange rates in a country. The *market rate* is used to describe exchange rates determined largely by market forces; the *official rate* is an exchange rate determined by the authorities, sometimes in a flexible manner. For countries maintaining multiple exchange arrangements, the rates are labeled *principal rate*, *secondary rate*, and *tertiary rate*. Unless otherwise stated, the table refers to end of period and period averages of market exchange rates or official exchange rates. For further information see *International Financial Statistics* [15] and <www.imf.org>.

Table 80: Data were extracted from *Global Development Finance 2002* [35], published by the World Bank.

Long term external debt is defined as debt that has an original or extended maturity of more than one year and is owed to non-residents and repayable in foreign currency, goods, or services. A distinction is made between:

- Public debt which is an external obligation of a public debtor, which could be a national government, a political sub-division, an agency of either of the above or, in fact, any autonomous public body;

- Publicly guaranteed debt, which is an external obligation of a private debtor that is guaranteed for repayment by a public entity;

- Private non-guaranteed external debt, which is an external obligation of a private debtor that is not guaranteed for repayment by a public entity.

The data referring to public and publicly guaranteed debt do not include data for (a) transactions with the International Monetary Fund, (b) debt repayable in local currency, (c) direct investment and (d) short-term debt (that is, debt with an original maturity of less than a year).

The data referring to private non-guaranteed debt also exclude the above items but include contractual obligations on loans to direct-investment enterprises by foreign parent companies or their affiliates.

Data are aggregated by type of creditor. The breakdown is as follows:

Official creditors:

- (a) Loans from international organizations (multilateral loans), excluding loans from funds administered by an international organization on behalf of a single donor government. The latter are classified as loans from governments;

- (b) Loans from governments (bilateral loans) and

Notes techniques, tableaux 79 et 80

Tableau 79: Les taux des changes sont exprimés par nombre d'unités de monnaie nationale pour un dollar des Etats-Unis. Les taux de change sont classés en trois catégories, qui dénotent le rôle des autorités dans l'établissement des taux de change et/ou la multiplicité des taux de change dans un pays. Par *taux du marché*, on entend les taux de change déterminés essentiellement par les forces du marché; le *taux officiel* est un taux de change établi par les autorités, parfois selon des dispositions souples. Pour les pays qui continuent de mettre en œuvre des régimes de taux de change multiples, les taux sont désignés par les appellations suivantes: "taux principal", "taux secondaire" et "taux tertiaire". Sauf indication contraire, le tableau indique des taux de fin de période et les moyennes sur la période, des taux de change du marché ou des taux de change officiels. Pour plus de renseignements, voir *Statistiques financières internationales* [15] et <www.imf.org>.

Tableau 80: Les données sont extraites de *Global Development Finance 2002* [35] publié par la Banque mondiale.

La dette extérieure à long terme désigne la dette dont l'échéance initiale ou reportée est de plus d'un an, due à des non résidents et remboursable en devises, biens ou services. On établit les distinctions suivantes:

- La dette publique, qui est une obligation extérieure d'un débiteur public, pouvant être un gouvernement, un organe politique, une institution de l'un ou l'autre ou, en fait, tout organisme public autonome.

- La dette garantie par l'Etat, qui est une obligation extérieure d'un débiteur privé, dont le remboursement est garanti par un organisme public.

- La dette extérieure privée non garantie, qui est une obligation extérieure d'un débiteur privé, dont le remboursement n'est pas garanti par un organisme public.

Les statistiques relatives à la dette publique ou à la dette garantie par l'Etat ne comprennent pas les données concernant: (a) les transactions avec le Fonds monétaire international; (b) la dette remboursable en monnaie nationale; (c) les investissements directs; et (d) la dette à court terme (c'est-à-dire la dette dont l'échéance initiale est inférieure à un an).

Les statistiques relatives à la dette privée non garantie ne comprennent pas non plus les éléments précités, mais comprennent les obligations contractuelles au titre des prêts consentis par des sociétés mères étrangères ou leurs filiales à des entreprises créées dans le cadre d'investissements directs.

Les données sont groupées par type de créancier, comme suit:

Créanciers publics:

- (a) Les prêts obtenus auprès d'organisations interna-

from autonomous public bodies;

Private creditors:

(a) Suppliers: Credits from manufacturers, exporters, or other suppliers of goods;

(b) Financial markets: Loans from private banks and other private financial institutions as well as publicly issued and privately placed bonds;

(c) Other: External liabilities on account of nationalized properties and unclassified debts to private creditors.

A distinction is made between the following categories of external public debt:

— Debt outstanding (including undisbursed) is the sum of disbursed and undisbursed debt and represents the total outstanding external obligations of the borrower at year-end;

— Debt outstanding (disbursed only) is total outstanding debt drawn by the borrower at year end;

— Commitments are the total of loans for which contracts are signed in the year specified;

— Disbursements are drawings on outstanding loan commitments during the year specified;

— Service payments are actual repayments of principal amortization and interest payments made in foreign currencies, goods or services in the year specified;

— Net flows (or net lending) are disbursements minus principal repayments;

— Net transfers are net flows minus interest payments or disbursements minus total debt-service payments.

The countries included in the table are those for which data are sufficiently reliable to provide a meaningful presentation of debt outstanding and future service payments.

tionales (prêts multilatéraux), à l'exclusion des prêts au titre de fonds administrés par une organisation internationale pour le compte d'un gouvernement donateur précis, qui sont classés comme prêts consentis par des gouvernements;

(b) Les prêts consentis par des gouvernements (prêts bilatéraux) et par des organisations publiques autonomes.

Créanciers privés:

(a) Fournisseurs: Crédits consentis par des fabricants exportateurs et autre fournisseurs de biens;

(b) Marchés financiers: prêts consentis par des banques privées et autres institutions financières privées, et émissions publiques d'obligations placées auprès d'investisseurs privés;

(c) Autres créanciers: engagements vis-à-vis de l'extérieur au titre des biens nationalisés et dettes diverses à l'égard de créanciers privés.

On fait une distinction entre les catégories suivantes de dette publique extérieure:

— L'encours de la dette (y compris les fonds non décaissés) est la somme des fonds décaissés et non décaissés et représente le total des obligations extérieures en cours de l'emprunteur à la fin de l'année;

— L'encours de la dette (fonds décaissés seulement) est le montant total des tirages effectués par l'emprunteur sur sa dette en cours à la fin de l'année;

— Les engagements représentent le total des prêts dont les contrats ont été signés au cours de l'année considérée;

— Les décaissements sont les sommes tirées sur l'encours des prêts pendant l'année considérée;

— Les paiements au titre du service de la dette sont les remboursements effectifs du principal et les paiements d'intérêts effectués en devises, biens ou services pendant l'année considérée;

— Les flux nets (ou prêts nets) sont les décaissements moins les remboursements de principal;

— Les transferts nets désignent les flux nets moins les paiements d'intérêts, ou les décaissements moins le total des paiements au titre du service de la dette.

Les pays figurant sur ce tableau sont ceux pour lesquels les données sont suffisamment fiables pour permettre une présentation significative de l'encours de la dette et des paiements futurs au titre du service de la dette.

Source:

Organisation for Economic Co-operation and Development (OECD), Paris, "Geographical Distribution of Financial Flows to Aid Recipients, 1996 – 2000" and the OECD Development Assistance Database. Per capita calculated by the UN Statistics Division.

- As reported by OECD/DAC, covers agencies of the United Nations family, the European Union, IDA and the concessional lending facilities of regional development banks. Excludes non – concessional flows (i.e., less than 25% grant elements).
- Population based on estimates of mid-year population.
- Data refer to Yugoslavia, SFR unspecified.

Source:

Organisation de coopération et de développement économiques (OCDE), Paris, "Répartition géographique des ressources financières allouées aux pays bénéficiaires de l'aide, 1996 – 2000" et la base de données de l'OCDE sur l'aide au développement. Les données par habitant ont été calculées par la Division de statistique de l'ONU.

- Communiqué par le Comité d'aide au développement de l'OCDE. Comprend les institutions et organismes du système des Nations Unies, l'Union européenne, l'Association internationale de développement, et les mécanismes de prêt à des conditions privilégiées des banques régionales de développement. Les apports aux conditions du marché (élément de libéralité inférieur à 25%) en sont exclus.
- Population d'après des estimations de la population au milieu de l'année.
- Les données concernent Yougoslavie, Rfs non spécifié.

PNUD : Programme des Nations Unies pour le développement

FNUAP : Fonds des Nations Unies pour la population

UNICEF : Fonds des Nations Unies pour l'enfance

PAM : Programme alimentaire mondial.

Technical notes, tables 81-83

Table 81 presents estimates of flows of financial resources to individual recipients either directly (bilaterally) or through multilateral institutions (multilaterally).

The multilateral institutions include the World Bank Group, regional banks, financial institutions of the European Union and a number of United Nations institutions, programmes and trust funds.

The main source of data is the Development Assistance Committee of OECD to which member countries reported data on their flow of resources to developing countries and territories and countries and territories in transition, and multilateral institutions.

Additional information on definitions, methods and sources can be found in OECD's *Geographical Distribution of Financial Flows to Aid Recipients* [21] and <www.oecd.org>.

Table 82 presents the development assistance expenditures of donor countries. This table includes donors' contributions to multilateral agencies, so the overall totals differ from those in table 81, which include disbursements by multilateral agencies.

Table 83 includes data on expenditures on operational activities for development undertaken by the organizations of the United Nations system. Operational activities encompass, in general, those activities of a development cooperation character that seek to mobilize or increase the potential and capacity of countries to promote economic and social development and welfare, including the transfer of resources to developing countries or regions in a tangible or intangible form. The table also covers, as a memo item, expenditures on activities of an emergency character, the purpose of which is immediate relief in crisis situations, such as assistance to refugees, humanitarian work and activities in respect of disasters.

Expenditures on operational activities for development are financed from contributions from governments and other official and non-official sources to a variety of funding channels in the United Nations system. These include United Nations funds and programmes such as contributions to the United Nations Development Programme, contributions to funds administered by the United Nations Development Programme, and regular (assessed) and other extrabudgetary contributions to specialized agencies.

Data are taken from the 2000 and 2001 reports of the Secretary-General to the General Assembly on operational activities for development [28].

Notes techniques, tableaux 81 à 83

Le *Tableau 81* présente les estimations des flux de ressources financières mises à la disposition des pays soit directement (aide bilatérale) soit par l'intermédiaire d'institutions multilatérales (aide multilatérale).

Les institutions multilatérales comprennent le Groupe de la Banque mondiale, les banques régionales, les institutions financières de l'Union européenne et un certain nombre d'institutions, de programmes et de fonds d'affectation spéciale des Nations Unies.

La principale source de données est le Comité d'aide au développement de l'OCDE, auquel les pays membres ont communiqué des données sur les flux de ressources qu'ils mettent à la disposition des pays et territoires en développement et en transition et des institutions multilatérales.

Pour plus de renseignements sur les définitions, méthodes et sources, se reporter à la publication de l'OCDE, la *Répartition géographique des ressources financières de aux pays bénéficiaires de l'Aide* [21] et <www.oecd.org>.

Le *Tableau 82* présente les dépenses que les pays donateurs consacrent à l'aide publique au développement (APD). Ces chiffres incluent les contributions des donateurs à des agences multilatérales, de sorte que les totaux diffèrent de ceux du tableau 81, qui incluent les dépenses des agences multilatérales.

Le *Tableau 83* présente des données sur les dépenses consacrées à des activités opérationnelles pour le développement par les organisations du système des Nations Unies. Par "activités opérationnelles", on entend en général les activités ayant trait à la coopération au développement, qui visent à mobiliser ou à accroître les potentialités et aptitudes que présentent les pays pour promouvoir le développement et le bien-être économiques et sociaux, y compris les transferts de ressources vers les pays ou régions en développement sous forme tangible ou non. Ce tableau indique également, pour mémoire, les dépenses liées à des activités revêtant un caractère d'urgence, qui ont pour but d'apporter un secours immédiat dans les situations de crise, telles que l'aide aux réfugiés, l'assistance humanitaire et les secours en cas de catastrophe.

Les dépenses consacrées aux activités opérationnelles pour le développement sont financées au moyen de contributions que les gouvernements et d'autres sources officielles et non officielles apportent à divers organes de financement, tels que fonds et programmes du système des Nations Unies. On peut citer notamment les contributions au Programme des Nations Unies pour le développement, les contributions aux fonds gérés par le Programme des Nations Unies pour le développement, les contributions régulières (budgétaires) et les contributions extrabudgétaires aux institutions spécialisées.

Les données sont extraites des rapports annuels de 2000 et de 2001 du Secrétaire général à la session de l'Assemblée générale sur les activités opérationnelles pour le développement [28].

Annex I

Country and area nomenclature, regional and other groupings

A. Changes in country or area names

In the periods covered by the statistics in the *Statistical Yearbook*, the following changes in designation have taken place:

Brunei Darussalam was formerly listed as Brunei;
Burkina Faso was formerly listed as Upper Volta;
Cambodia was formerly listed as Democratic

Kampuchea;

Cameroon was formerly listed as United Republic of Cameroon;

Côte d'Ivoire was formerly listed as Ivory Coast;

Czech Republic, Slovakia: Since 1 January 1993, data for the Czech Republic and Slovakia, where available, are shown separately under the appropriate country name. For periods prior to 1 January 1993, where no separate data are available for the Czech Republic and Slovakia, unless otherwise indicated, data for the former Czechoslovakia are shown under the country name "former Czechoslovakia";

Democratic Republic of the Congo was formerly listed as Zaïre;

Germany: Through the accession of the German Democratic Republic to the Federal Republic of Germany with effect from 3 October 1990, the two German States have united to form one sovereign State. As from the date of unification, the Federal Republic of Germany acts in the United Nations under the designation "Germany". All data shown which pertain to Germany prior to 3 October 1990 are indicated separately for the Federal Republic of Germany and the former German Democratic Republic based on their respective territories at the time indicated;

Hong Kong Special Administrative Region of China: Pursuant to a Joint Declaration signed on 19 December 1984, the United Kingdom restored Hong Kong to the People's Republic of China with effect from 1 July 1997; the People's Republic of China resumed the exercise of sovereignty over the territory with effect from that date;

Macao Special Administrative Region of China: Pursuant to the joint declaration signed on 13 April 1987, Portugal restored Macao to the People's Republic of China with effect from 20 December 1999; the People's Republic of China resumed the exercise of sovereignty over the territory with effect from that date;

Myanmar was formerly listed as Burma;

Palau was formerly listed as Pacific Islands and includes data for Federated States of Micronesia, Marshall Islands and Northern Mariana Islands;

Saint Kitts and Nevis was formerly listed as Saint Christopher and Nevis;

Serbia and Montenegro: As of 4 February 2003, the official name of the "Federal Republic of Yugoslavia" has been changed to "Serbia and Montenegro". Unless otherwise indicated, data provided for Yugoslavia prior to 1 January 1992 refer to the Socialist Federal

Annexe I

Nomenclature des pays ou zones, groupements régionaux et autres groupements

A. Changements dans le nom des pays ou zones

Au cours des périodes sur lesquelles portent les statistiques, dans l'*Annuaire Statistique* les changements de désignation suivants ont eu lieu:

Le *Brunéi Darussalam* apparaissait antérieurement sous le nom de Brunéi;

Le *Burkino Faso* apparaissait antérieurement sous le nom de la Haute-Volta;

Le *Cambodge* apparaissait antérieurement sous le nom de la Kampuchea démocratique;

Le *Cameroun* apparaissait antérieurement sous le nom de République-Unie du Cameroun;

République tchèque, Slovaquie: Depuis le 1er janvier 1993, les données relatives à la République tchèque, et à la Slovaquie, lorsqu'elles sont disponibles, sont présentées séparément sous le nom de chacun des pays. En ce qui concerne la période précédant le 1er janvier 1993, pour laquelle on ne possède pas de données séparées pour les deux Républiques, les données relatives à l'ex-Tchécoslovaquie sont, sauf indication contraire, présentées sous le titre "l'ex-Tchécoslovaquie";

La *République démocratique du Congo* apparaissait antérieurement sous le nom de Zaïre;

Allemagne: En vertu de l'adhésion de la République démocratique allemande à la République fédérale d'Allemagne, prenant effet le 3 octobre 1990, les deux Etats allemands se sont unis pour former un seul Etat souverain. A compter de la date de l'unification, la République fédérale d'Allemagne est désigné à l'ONU sous le nom d'"Allemagne". Toutes les données se rapportant à l'Allemagne avant le 3 octobre figurent dans deux rubriques séparées basées sur les territoires respectifs de la République fédérale d'Allemagne et l'ex-République démocratique allemande selon la période indiquée;

Hong Kong, région administrative spéciale de Chine: Conformément à une Déclaration commune signée le 19 décembre 1984, le Royaume-Uni a rétrocédé Hong Kong à la République populaire de Chine, avec effet au 1er juillet 1997; la souveraineté de la République populaire de Chine s'exerce à nouveau sur le territoire à compter de cette date;

Macao, région administrative spéciale de Chine: Conformément à une Déclaration commune signée le 13 avril 1987, le Portugal a rétrocédé Macao à la République populaire de Chine, avec effet au 20 décembre 1999; la souveraineté de la République populaire de Chine s'exerce à nouveau sur le territoire à compter de cette date;

Le *Myanmar* apparaissait antérieurement sous le nom de Birmanie;

Les *Palaos* apparaissait antérieurement sous le nom de Iles du Pacifique y compris les données pour les Etats fédérés de Micronésie, les îles Marshall et îles Mariannes du Nord;

Saint-Kitts-et-Nevis apparaissait antérieurement sous le nom de Saint-Christophe-et-Nevis;

Serbie-et-Monténégro: A compter de février 2003, la "République fédérale de Yougoslavie" ayant changé de nom officiel, est devenue la "Serbie-et-Monténégro". Sauf indication contraire, les données fournies pour la Yougoslavie avant le 1er janvier 1992 se rapportent à la République fédé-

Republic of Yugoslavia which was composed of six republics. Data provided for Yugoslavia after that date refer to the Federal Republic of Yugoslavia which is composed of two republics (Serbia and Montenegro);

Timor-Leste: Formerly East Timor;

Former USSR: In 1991, the Union of Soviet Socialist Republics formally dissolved into fifteen independent countries (Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan). Whenever possible, data are shown for the individual countries. Otherwise, data are shown for the former USSR;

Yemen: On 22 May 1990 Democratic Yemen and Yemen merged to form a single State. Since that date they have been represented as one Member with the name 'Yemen'.

Data relating to the People's Republic of China generally include those for Taiwan Province in the field of statistics relating to population, area, natural resources and natural conditions such as climate. In other fields of statistics, they do not include Taiwan Province unless otherwise stated.

B. Regional groupings

The scheme of regional groupings given below presents seven regions based mainly on continents. Five of the seven continental regions are further subdivided into 21 regions that are so drawn as to obtain greater homogeneity in sizes of population, demographic circumstances and accuracy of demographic statistics [22, 59]. This nomenclature is widely used in international statistics and is followed to the greatest extent possible in the present *Yearbook* in order to promote consistency and facilitate comparability and analysis. However, it is by no means universal in international statistical compilation, even at the level of continental regions, and variations in international statistical sources and methods dictate many unavoidable differences in particular fields in the present *Yearbook*. General differences are indicated in the footnotes to the classification presented below. More detailed differences are given in the footnotes and technical notes to individual tables.

Neither is there international standardization in the use of the terms "developed" and "developing" countries, areas or regions. These terms are used in the present publication to refer to regional groupings generally considered as "developed": these are Europe and the former USSR, the United States of America and Canada in Northern America, and Australia, Japan and New Zealand in Asia and Oceania. These designations are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process. Differences from this usage are indicated in the notes to individual tables.

relative socialiste de Yougoslavie, qui était composée de six républiques. Les données fournies pour la Yougoslavie après cette date se rapportent à la République fédérative de Yougoslavie, qui est composée de deux républiques (Serbie et Monténégro);

Timor-Leste: Ex Timor oriental;

L'ex-URSS: En 1991, l'Union des républiques socialistes soviétiques s'est séparé en 15 pays distincts (Arménie, Azerbaïdjan, Bélarus, Estonie, Géorgie, Kazakhstan, Kirghizistan, Lettonie, Lituanie, République de Moldova, Fédération de Russie, Tadjikistan, Turkménistan, Ukraine, Ouzbékistan). Les données sont présentées pour ces pays pris séparément quand cela est possible. Autrement, les données sont présentées pour l'ex-URSS;

Yémen: Le Yémen et le Yémen démocratique ont fusionné le 22 mai 1990 pour ne plus former qu'un seul Etat, qui est depuis lors représenté comme tel à l'Organisation, sous le nom 'Yémen'.

Les données relatives à la République populaire de Chine comprennent en général les données relatives à la province de Taïwan lorsqu'il s'agit de statistiques concernant la population, la superficie, les ressources naturelles, et les conditions naturelles telles que le climat, etc. Dans les statistiques relatives à d'autres domaines, la province de Taïwan n'est pas comprise, sauf indication contraire.

B. Groupements régionaux

Le système de groupements régionaux présenté ci-dessous comporte sept régions basés principalement sur les continents. Cinq des sept régions continentales sont elles-mêmes subdivisées, formant ainsi 21 régions délimitées de manière à obtenir une homogénéité accrue dans les effectifs de population, les situations démographiques et la précision des statistiques démographiques [22, 59]. Cette nomenclature est couramment utilisée aux fins des statistiques internationales et a été appliquée autant qu'il a été possible dans le présent *Annuaire* en vue de renforcer la cohérence et de faciliter la comparaison et l'analyse. Son utilisation pour l'établissement des statistiques internationales n'est cependant rien moins qu'universelle, même au niveau des régions continentales, et les variations que présentent les sources et méthodes statistiques internationales entraînent inévitablement de nombreuses différences dans certains domaines de cet *Annuaire*. Les différences d'ordre général sont indiquées dans les notes figurant au bas de la classification présentée ci-dessous. Les différences plus spécifiques sont mentionnées dans les notes techniques et notes infrapaginales accompagnant les divers tableaux.

L'application des expressions "développés" et "en développement" aux pays, zones ou régions n'est pas non plus normalisée à l'échelle internationale. Ces expressions sont utilisées dans la présente publication en référence aux groupements régionaux généralement considérés comme "développés", à savoir l'Europe et l'ex-URSS, les Etats-Unis d'Amérique et le Canada en Amérique septentrionale, et l'Australie, le Japon et la Nouvelle-Zélande dans la région de l'Asie et du Pacifique. Ces appellations sont employées pour des raisons de commodité statistique et n'expriment pas nécessairement un jugement sur le stade de développement atteint par tel ou tel pays ou zone. Les cas différant de cet usage sont signalés dans les notes accompagnant les tableaux concernés.

C. Other groupings

Following is a list of other groupings and their compositions presented in the *Yearbook*. These groupings are organized mainly around economic and trade interests in regional associations.

Andean Common Market (ANCOM)

Bolivia
Colombia
Ecuador
Peru
Venezuela

Asia-Pacific Economic Cooperation (APEC)

Australia
Brunei Darussalam
Canada
Chile
China
China, Hong Kong Special Administrative Region
Indonesia
Japan
Malaysia
Mexico
New Zealand
Papua New Guinea
Peru
Philippines
Republic of Korea
Russian Federation
Singapore
Taiwan Province of China
Thailand
United States of America
Viet Nam

Association of Southeast Asian Nations (ASEAN)

Brunei Darussalam
Cambodia
Indonesia
Lao People's Democratic Republic
Malaysia
Myanmar
Philippines
Singapore
Thailand
Viet Nam

Caribbean Community and Common Market (CARICOM)

Antigua and Barbuda
Bahamas (member of the Community only)
Barbados

Polynésie

| | |
|-----------------------|-------------------|
| Iles Cook | Samoa |
| Iles Wallis-et-Futuna | Samoa américaines |
| Nioué | Tokélaou |
| Pitcairn | Tonga |
| Polynésie française | Tuvalu |

C. Autres groupements

On trouvera ci-après une liste des autres groupements et de leur composition, présentée dans l'*Annuaire*. Ces groupements correspondent essentiellement à des intérêts économiques et commerciaux d'après les associations régionales.

Marché commun andin (ANCOM)

Bolivie
Colombie
Equateur
Pérou
Vénézuéla

Coopération économique Asie-Pacifique (CEAP)

Australie
Brunéi Darussalam
Canada
Chili
Chine
Chine, Hong Kong, région administrative spéciale
Etats-Unis d'Amérique
Fédération de Russie
Indonésie
Japon
Malaisie
Mexique
Nouvelle-Zélande
Papouasie-Nouvelle-Guinée
Pérou
Philippines
Province chinoise de Taiwan
République de Corée
Singapour
Thaïlande
Viet Nam

Association des nations de l'Asie du Sud-Est (ANASE)

Brunéi Darussalam
Cambodge
Indonésie
Malaisie
Myanmar
Philippines
République démocratique populaire lao
Singapour
Thaïlande
Viet Nam

Communauté des Caraïbes et Marché commun des Caraïbes (CARICOM)

Antigua-et-Barbuda
Bahamas (membre de la communauté seulement)
Barbade

Belize
 Dominica
 Grenada
 Guyana
 Haïti
 Jamaïca
 Montserrat
 Saint Kitts and Nevis
 Saint Lucia
 Saint Vincent and the Grenadines
 Suriname
 Trinidad and Tobago

Central American Common Market (CACM)

Costa Rica
 El Salvador
 Guatemala
 Honduras
 Nicaragua

Common Market for Eastern and Southern Africa (COMESA)

Angola
 Burundi
 Comoros
 Democratic Republic of the Congo
 Djibouti
 Egypt
 Eritrea
 Ethiopia

- a The continent of North America comprises Northern America, Caribbean and Central America.
b As determined by the General Assembly in its resolution 49/133.

- a Le continent de l'Amérique du Nord comprend l'Amérique septentrionale, les Caraïbes et l'Amérique centrale.
b Comme déterminé par l'Assemblée générale dans sa résolution 49/133.

Annex II

Conversion coefficients and factors

The metric system of weights and measures is employed in the *Statistical Yearbook*. In this system, the relationship between units of volume and capacity is: 1 litre = 1 cubic decimetre (dm³) exactly (as decided by the 12th International Conference of Weights and Measures, New Delhi, November 1964).

Section A shows the equivalents of the basic metric, British imperial and United States units of measurements. According to an agreement between the national standards institutions of English-speaking nations, the British and United States units of length, area and volume are now identical, and based on the yard = 0.9144 metre exactly. The weight measures in both systems are based on the pound = 0.45359237 kilogram exactly (Weights and Measures Act 1963 (London), and *Federal Register* announcement of 1 July 1959: *Refinement of Values for the Yard and Pound* (Washington D.C.)).

Section B shows various derived or conventional conversion coefficients and equivalents.

Section C shows other conversion coefficients or factors which have been utilized in the compilation of certain tables in the *Statistical Yearbook*. Some of these are only of an approximate character and have been employed solely to obtain a reasonable measure of international comparability in the tables.

For a comprehensive survey of international and national systems of weights and measures and of units weights for a large number of commodities in different countries, see *World Weights and Measures* [61].

Annexe II

Coefficients et facteurs de conversion

L'*Annuaire statistique* utilise le système métrique pour les poids et mesures. La relation entre unités métriques de volume et de capacité est: 1 litre = 1 décimètre cube (dm³) exactement (comme fut décidé à la Conférence internationale des poids et mesures, New Delhi, novembre 1964).

La section A fournit les équivalents principaux des systèmes de mesure métrique, britannique et américain. Suivant un accord entre les institutions de normalisation nationales des pays de langue anglaise, les mesures britanniques et américaines de longueur, superficie et volume sont désormais identiques, et sont basées sur le yard = 0.9144 mètre exactement. Les mesures de poids se rapportent, dans les deux systèmes, à la livre (pound) = 0.45359237 kilogramme exactement ("Weights and Measures Act 1963" (Londres), et "Federal Register Announcement of 1 July 1959: Refinement of Values for the Yard and Pound" (Washington, D.C.)).

La section B fournit divers coefficients et facteurs de conversion conventionnels ou dérivés.

La section C fournit d'autres coefficients ou facteurs de conversion utilisés dans l'élaboration de certains tableaux de l'*Annuaire statistique*. D'aucuns ne sont que des approximations et n'ont été utilisés que pour obtenir un degré raisonnable de comparabilité sur le plan international.

Pour une étude d'ensemble des systèmes internationaux et nationaux de poids et mesures, et d'unités de poids pour un grand nombre de produits dans différents pays, voir "*World Weights and Measures*" [61].

A. Equivalents of metric, British imperial and United States units of measure

| Metric units Unités métriques | British imperial and US equivalents Equivalents en mesures britanniques et des Etats-Unis |
|--|--|
| Length — Longueur | |
| 1 centimetre — centimètre (cm) | 0.3937008 inch |
| 1 metre — mètre (m) | 3.280840 feet 1.093613 yard |
| 1 kilometre — kilomètre (km) | 0.6213712 mile 0.5399568 int. naut. mile |
| Area — Superficie | |
| 1 square centimetre — (cm ²) | 0.1550003 square inch |
| 1 square metre — (m ²) | 10.763910 square feet 1.195990 square yards |
| 1 hectare — (ha) | 2.471054 acres |
| 1 square kilometre — (km ²) | 0.3861022 square mile |
| Volume | |
| 1 cubic centimetre — (cm ³) | 0.06102374 cubic inch |
| 1 cubic metre — (m ³) | 35.31467 cubic feet 1.307951 cubic yards |
| Capacity — Capacité | |
| 1 litre (l) | 0.8798766 imp. quart 1.056688 U.S. liq. quart 0.908083 U.S. dry quart |
| 1 hectolitre (hl) | 21.99692 imp. gallons 26.417200 U.S. gallons 2.749614 imp. bushels 2.837760 U.S. bushels |
| Weight or mass — Poids | |
| 1 kilogram (kg) | 35.27396 av. ounces 32.15075 troy ounces 2.204623 av. pounds |
| 1 ton — tonne (t) | 1.1023113 short tons 0.9842065 long tons |

A. Equivalents des unités métriques, britanniques et des Etats-Unis

| British imperial and US units Unités britanniques et des Etats-Unis | Metric equivalents Equivalents en mesures métriques |
|--|---|
| 1 inch | 2.540 cm |
| 1 foot | 30.480 cm |
| 1 yard | 0.9144 m |
| 1 mile | 1609.344 m |
| 1 international nautical mile | 1852.000 m |
| 1 square inch | 6.45160 cm ² |
| 1 square foot | 9.290304 dm ² |
| 1 square yard | 0.83612736 m ² |
| 1 acre | 0.40468856 ha |
| 1 square mile | 2.589988 km ² |
| 1 cubic inch | 16.38706 cm ³ |
| 1 cubic foot | 28.316847 dm ³ |
| 1 cubic yard | 0.76455486 m ³ |
| 1 British imperial quart | 1.136523 l |
| 1 U.S. liquid quart | 0.9463529 l |
| 1 U.S. dry quart | 1.1012208 l |
| 1 imperial gallon | 4.546092 l |
| 1 U.S. gallon | 3.785412 l |
| 1 imperial bushel | 36.368735 l |
| 1 U.S. bushel | 35.239067 l |
| 1 av. ounce | 28.349523 g |
| 1 troy ounce | 31.10348 g |
| 1 av. pound | 453.59237 g |
| 1 cental (100 lb.) | 45.359237 kg |
| 1 hundredweight (112 lb.) | 50.802345 kg |
| 1 short ton (2 000 lb.) | 0.9071847 t |
| 1 long ton (2 240 lb.) | 1.0160469 t |

B. Various conventional or derived coefficients**Railway and air transport**

1 passenger-mile = 1.609344 voyageur (passager) -
kilomètre

1 short ton-mile = 1.459972 tonne-kilomètre

1 long ton-mile = 1.635169 tonne kilomètre

Ship tonnage

1 register ton (100 cubic feet) — tonne de jauge =
2.83m³

1 British shipping ton (42 cubic feet) = 1.19m³

1 U.S. shipping ton (40 cubic feet) = 1.13m³

1 deadweight ton (dwt ton = long ton) = 1.016047

metric ton — tonne métrique

Electric energy

1 Kilowatt (kW) = 1.34102 British horsepower (hp)
1.35962 cheval vapeur (cv)

C. Other coefficients or conversion factors employed in *Statistical Yearbook* tables**Roundwood**

Equivalent in solid volume without bark.

Sugar

1 metric ton raw sugar = 0.9 metric ton refined
sugar.

For the United States and its possessions:

1 metric ton refined sugar = 1.07 metric tons
raw sugar.

B. Divers coefficients conventionnels ou dérivés**Transport ferroviaire et aérien**

1 voyageur (passager) - kilomètre = 0.621371)
passenger-mile

1 tonne-kilomètre = 0.684945 short ton-mile

0.611558 long ton-mile

Tonnage de navire

1 cubic metre - m³ = 0.353 register ton - tonne de
jauge

0.841 British shipping ton

0.885 US shipping ton

1 metric ton — tonne métrique — 0.984 dwt ton

Energie électrique

1 British horsepower (hp) = 0.7457 kW

1 cheval vapeur (cv) = 0.735499 kW

C. Autres coefficients ou facteurs de conversion utilisés dans les tableaux de l'*Annuaire statistique***Bois rond**

Equivalences en volume solide sans écorce.

Sucre

1 tonne métrique de sucre brut = 0.9 tonne métrique
de sucre raffiné.

Pour les Etats-Unis et leurs possessions:

1 tonne métrique de sucre raffiné = 1.07 t.m. de
sucre brut.

Annex III

Tables added and omitted

A. Tables added

The present issue of the *Statistical Yearbook* (2000) includes the following five tables which were not presented in the previous issue:

Table 9: Education at the primary, secondary and tertiary levels;

Table 24: Government final consumption expenditure by function at current prices;

Table 25: Household consumption expenditure by purpose in current prices;

Table 68: Ozone-depleting chlorofluorocarbons;

Table 70: Gross domestic expenditure on R&D by source of funds.

B. The following six tables which were presented in the previous issues (45th and 46th) are not presented in the present issue. They will be updated in future issues of the *Yearbook* when new data become available:

Table 9: Population in urban and rural areas, rates of growth and largest urban agglomeration population (46th issue);

Table 10: Public expenditure on education: total and current (45th issue);

Table 11: Selected indicators of life expectancy, childbearing and mortality (46th issue);

Table 17: Television and radio receivers (46th issue);

Table 66: Water supply and sanitation coverage (45th issue);

Table 67: Threatened species (45th issue).

Annexe III

Tableaux ajoutés et supprimés

A. Tableaux ajoutés

Dans ce numéro de l'*Annuaire statistique* (2000), les cinq tableaux suivants qui n'ont pas été présentés dans le numéro antérieur, ont été ajoutés:

Tableau 9: Enseignement primaire, secondaire et supérieur;

Tableau 24: Consommation finale des administrations publiques par fonction aux prix courants;

Tableau 25: Dépenses de consommation des ménages par fonction aux prix courants;

Tableau 68: Chlorofluorocarbones qui appauvrissent la couche d'ozone;

Tableau 70: Dépenses intérieures brutes de recherche et développement par source de fonds.

B. Les six tableaux suivants qui ont été repris dans les éditions antérieures (la 45^{ème} et la 46^{ème} éditions) n'ont pas été repris dans la présente édition. Ils seront actualisés dans les futures livraisons de l'*Annuaire* à mesure que des données nouvelles deviendront disponibles:

Tableau 9: Population urbaine, population rurale, taux d'accroissement et population de l'agglomération urbaine la plus peuplée (46^{ème} édition);

Tableau 10: Dépenses publiques afférentes à l'éducation: totales et ordinaires (45^{ème} édition);

Tableau 11: Choix d'indicateurs de l'espérance de vie, de maternité et de la mortalité (46^{ème} édition);

Tableau 17: Récepteurs de télévision et de radiodiffusion sonore (46^{ème} édition);

Tableau 66: Accès à l'eau et à l'assainissement (45^{ème} édition);

Tableau 67: Espèces menacées (45^{ème} édition).

Index

Note: References to tables are indicated by **boldface** type. For citations of organizations, see the Index of Organizations.

- aggregates, national account (e.g., GDP), relationships between, **174–184, 224**
- agricultural production, **14, 319–327**
 - method of calculating series, 29–30, 400
 - per capita, **15**
 - sources of information, 400
- agricultural products (nonfood):
 - defined, 400
 - external trade in, **10**
 - price indexes, **10**
 - prices, **294–300, 319–327**
 - See also food
- agriculture, hunting, forestry, fishing:
 - employment, **242–245, 246–258**
 - production, **9, 319–402**
 - value added by, **163–173**
- aid. *See* development assistance
- AIDS:
 - cumulative cases, **65–72**
 - deaths, **65–72**
 - reported cases, by year, **65–72**
 - sources of data, 79
- AIDS epidemic update* (UN, WHO), 79
- airline traffic. *See* civil aviation
- aluminium:
 - defined, 506
 - production, **10, 482–485**
- apparel industry. *See* textile, apparel, leather industry
- arable lands, as percentage of total land area, **619–626**
- asses, number raised, **344–362**
- automobiles. *See* motor vehicles, passenger
- aviation. *See* civil aviation
- balance of payments:
 - by category of payment, **747–780**
 - definition of terms, **779–780**
- Balance of Payments Manual* (IMF), 779
- Balance of Payments Statistics Yearbook* (IMF), 745
- beef, veal, and buffalo, production, **414–428**
- beer:
 - defined, 505
 - production, **429–433**
- beverage industry. *See* food, beverages, tobacco industries
- beverages, alcoholic. *See* beer
- births, rate of, **12–13**
- book production:
 - method of calculating series, 131–132
 - by UDC class, **81–87**
- boring machines. *See* drilling and boring machines
- briquettes:
 - defined, 617
 - production, **600–615**
- brown coal. *See* lignite and brown coal
- buffalo. *See* beef, veal, and buffalo
- business enterprises, research and development expenditures, **652–655**
- business services industry. *See* finance, insurance, real estate, business service industries
- call money rates. *See* money market rate
- capital account:
 - in balance of payments, **747–780**
 - defined, 780
- capital goods, prices, **294–300**
- carbon dioxide emissions, **627–636**
 - method of calculating series, 645–646
- cars. *See* motor vehicles, passenger
- cattle and buffaloes, number raised, **344–362**
- cellulosic and non-cellulosic fibre:
 - defined, 506
 - production, **9**
- cellulosic and non-cellulosic fibre fabrics, production, **440–447**
- cement:
 - defined, 506
 - production, **10, 465–471**
- central banks, discount rates, **227–231**
- cereals (grain):
 - defined, 400
 - production, **9, 328–335**
- chemical industry, production, **16–22, 194–221, 465–474**
- chlorofluorocarbon (CFC) consumption, **637–643**
 - method of calculating series, 646
- cigarettes, production, **434–439**
- cinemas:
 - definition of terms, 131–132
 - method of calculating series, 131–132
 - number, attendance, and receipts, **97–102**
- civil aviation:
 - definition of terms, **570–571**
 - passengers and freight carried, **554–569**
- Civil Aviation Statistics of the World* (ICAO), 571
- clothing and footwear:
 - expenditures, as percentage of household consumption, **190–193**

- See also* fabrics
- coal:
 defined, 616
 production, 9, 16–22, 600–615
- coke:
 defined, 617
 production, 600–615
- commodities:
 classification of, 696
 conversion tables for, 836–837
 external trade in, 10
- commodities, primary. *See* primary commodities
- communication industry. *See* transportation, storage and communication industries
- communications, 81–132
- community, social and personal service industries, employment, 242–245
- compensation of employees to and from the rest of the world, as percentage of GDP, 174–184
- construction industry:
 employment, 242–245, 246–258
 value added by, 163–173
- consumer prices, 294–300
 indexes of, 301–315
- consumption. *See* government final consumption;
 household final consumption
- consumption of fixed capital, as percentage of GDP, 174–184
- conversion factors, currency, 152, 223
- conversion tables:
 for selected commodities, 836–837
 for units of measure and weight, 836–837
- cotton, production, 9
- cotton fabrics:
 defined, 505–506
 production, 440–447
- countries and areas:
 boundaries and legal status of, not implied by this publication, ii
 economic and regional associations, 831–835
 recent name changes, xiii, 826–827
 regional groupings for statistical purposes, 3, 827
 statistics reported for, 695, 696
 surface area, 35–46
See also developed countries or areas; developing countries or areas
- croplands, permanent, as percentage of total land area, 619–626
- crops:
 production, 9
See also agricultural production
- crude oil. *See* petroleum, crude
- cultural indicators, 81–132
 sources of information, 131–132
- currency:
 conversion factors, 152, 223
 exchange rates, 152, 781–795
 method of calculating series, 4, 151, 223, 696, 697
- current transfers:
 in balance of payments, 747–780
 defined, 779–780
- customs areas, 695
- death, rate of, 12–13
- defence, national:
 employment, 246–258
 expenditures, as percentage of government final consumption, 185–189
Demographic Yearbook (UN), 29, 47
- developed countries or areas:
 defined, ii, 3, 827
 development assistance from, 817
- developing countries or areas:
 defined, ii, 3, 827
 development assistance to, 817
 external debt of, 797–803
- development assistance, 807–825
 bilateral and multilateral, to individuals, 807–816
 to developing countries and multilateral organizations, 817
 United Nations system, 818–824, 825
- Development Assistance Committee (DAC) countries, development assistance from, 817
- Digest of Statistics - Traffic* (ICAO), 571
- discount rates, 227–231
 defined, 241
- domestic production, prices, 294–300
- domestic service, employment, 246–258
- domestic supply, prices, 294–300
- drilling and boring machines:
 defined, 507
 production, 10, 496–500
- earnings. *See* wages
- economic activity (industry):
 employment by, 242–245
 value added by kind of, 163–173
- economic associations, country lists, 831–835

كيفية الحصول على منشورات الأمم المتحدة

يمكن الحصول على منشورات الأمم المتحدة من المكتبات ودور التوزيع في جميع أنحاء العالم . استعملها من المكتبة التي تتعامل معها أو اكتب إلى : الأمم المتحدة ، قسم البيع في نيويورك أو في جنيف .

如何获取联合国出版物

联合国出版物在全世界各地的书店和经售处均有发售。请向书店询问或写信到纽约或日内瓦的联合国销售组。

HOW TO OBTAIN UNITED NATIONS PUBLICATIONS

United Nations publications may be obtained from bookstores and distributors throughout the world. Consult your bookstore or write to: United Nations, Sales Section, New York or Geneva.

COMMENT SE PROCURER LES PUBLICATIONS DES NATIONS UNIES

Les publications des Nations Unies sont en vente dans les librairies et les agences dépositaires du monde entier. Informez-vous auprès de votre libraire ou adressez-vous à : Nations Unies, Section des ventes, New York ou Genève.

КАК ПОЛУЧИТЬ ИЗДАНИЯ ОРГАНИЗАЦИИ ОБЪЕДИНЕННЫХ НАЦИЙ

Издания Организации Объединенных Наций можно купить в книжных магазинах и агентствах во всех районах мира. Наводите справки об изданиях в вашем книжном магазине или пишите по адресу: Организация Объединенных Наций, Секция по продаже изданий, Нью-Йорк или Женева.

COMO CONSEGUIR PUBLICACIONES DE LAS NACIONES UNIDAS

Las publicaciones de las Naciones Unidas están en venta en librerías y casas distribuidoras en todas partes del mundo. Consulte a su librero o diríjase a: Naciones Unidas, Sección de Ventas, Nueva York o Ginebra.

Statistical Yearbook 2000

Data available as of 31 January 2003

The United Nations *Statistical Yearbook* is the world's most comprehensive compilation of currently available international statistics for all countries and areas of the world. This issue presents 83 tables on the following topics, primarily for the years 1991-2000 or 1992-2001:

Population
Education and literacy
Health and nutrition
Culture and communication
National accounts and industrial production
Finance
Labour force
Wages and prices
Agriculture, forestry and fishing
Manufacturing
Transport
Energy
Environment
Science and technology
Intellectual property
International merchandise trade
International tourism
Balance of payments
Development assistance

Statistical sources and methods are documented in technical notes to each chapter to aid interpretation and further research.

Prepared by the Statistics Division of the United Nations Secretariat

Annuaire statistique 2000

Données disponibles au 31 janvier 2003

L'*Annuaire statistique* des Nations Unies est un inventaire complet de statistiques internationales disponibles à cette date pour tous les pays ou zones du monde. Cette édition comprend 83 tableaux sur les sujets suivants, principalement pour les années 1991 à 2000 ou 1992 à 2001 :

Statistiques démographiques;
Éducation et alphabétisation;
Santé et nutrition;
Culture et communication;
Comptabilités nationales et production industrielle;
Finances;
Main-d'œuvre;
Salaires et prix;
Agriculture, forêts et pêche;
Industries manufacturières;
Transports;
Énergie;
Environnement;
Science et technologie;
Propriété intellectuelle;
Commerce international des marchandises;
Tourisme international;
Balance des paiements;
Aide au développement.

Les sources et les méthodes statistiques peuvent être vérifiées dans les notes techniques de chaque chapitre afin d'aider à l'interprétation des statistiques et à d'autres recherches.

L'*Annuaire* est établi par la Division de statistique du Secrétariat de l'Organisation des Nations Unies
